Site-Specific Art Nick Kaye. 2013-04-15 Site-Specific Art charts the development of an experimental art form in an experimental way. Nick Kaye traces the fascinating historical antecedents of today's installation and performance art, while also assembling a unique documentation of contemporary practice around the world. The book is divided into individual analyses of the themes of space, materials, site, and frames. These are interspersed by specially commissioned documentary artwork from some of the world's foremost practitioners and artists working today. This interweaving of critique and creativity has never been achieved on this scale before. Site-Specific Art investigates the relationship of architectural theory to an understanding of contemporary site related art and performance, and rigorously questions how such works can be documented. The artistic processes involved are demonstrated through entirely new primary articles from: * Meredith Monk * Station House Opera * Brith Gof * Forced Entertainment. This volume is an astonishing contribution to debates around experimental cross-arts practice.

Creating Cultural Monsters Julie B. Wiest. 2016-04-19 Serial murderers generate an abundance of public interest, media coverage, and law enforcement attention, yet after decades of studies, serial murder researchers have been unable to answer the most important question: Why? Providing a unique and comprehensive exploration, *Creating Cultural Monsters: Serial Murder in America* explains connections between American culture and the incidence of serial murder, including reasons why most identified serial murderers are white, male Americans. It describes the omnipresence of serial murder in American media and investigates what it would take to decrease its occurrence. Presenting empirically supported arguments that have the potential to revolutionize how serial murder is understood, studied, and investigated, this volume: Places the serial murder phenomenon in a cultural context, promoting qualitative understanding and the potential for reducing its frequency Includes an illustrated model that explains how people utilize cultural values to construct lines of action according to their cultural competencies Demonstrates how the American cultural milieu fosters serial murder and the creation of white male serial murderers Provides a critique of the American mass media's role in the development and notoriety of serial murder Describes the framework on which the majority of definitions of serial murder are based Drawn from years of dedicated research of Dr. Julie B. Wiest, this volume presents a new approach to the study of U.S. serial murder, offers important implications for law enforcement and mass media, and forms a basis for future research on serial murder, murder, and

violence in the U.S. and in other nations.

Media Spectacle Douglas Kellner.2003-08-29 During the mid-1990s, the O.J. Simpson murder trial dominated the media in the United States and were circulated throughout the world via global communications networks. The case became a spectacle of race, gender, class and violence, bringing in elements of domestic melodrama, crime drama and legal drama. According to this fascinating new book, the Simpson case was just one example of what the author calls 'media spectacle' - a form of media culture that puts contemporary dreams, nightmares, fantasies and values on display. Through the analysis of several such media spectacles - including Elvis, The X Files, Michael Jordan, and the Bill Clinton sex scandals - Doug Kellner draws out important insights into media, journalism, the public sphere and politics in an era of new technologies. In this excellent follow up to his best selling *Media Culture*, Kellner's fascinating new volume delivers an informative read for students of sociology, culture and media.

Unthought N. Katherine Hayles. 2017-04-05 N. Katherine Hayles is known for breaking new ground at the intersection of the sciences and the humanities. In *Unthought*, she once again bridges disciplines by revealing how we think without thinking—how we use cognitive processes that are inaccessible to consciousness yet necessary for it to function. Marshalling fresh insights from neuroscience, cognitive science, cognitive biology, and literature, Hayles expands our understanding of cognition and demonstrates that it involves more than consciousness alone. Cognition, as Hayles defines it, is applicable not only to nonconscious processes in humans but to all forms of life, including unicellular organisms and plants. Startlingly, she also shows that cognition operates in the sophisticated information-processing abilities of technical systems: when humans and cognitive technical systems interact, they form “cognitive assemblages”—as found in urban traffic control, drones, and

the trading algorithms of finance capital, for instance—and these assemblages are transforming life on earth. The result is what Hayles calls a “planetary cognitive ecology,” which includes both human and technical actors and which poses urgent questions to humanists and social scientists alike. At a time when scientific and technological advances are bringing far-reaching aspects of cognition into the public eye, *Unthought* reflects deeply on our contemporary situation and moves us toward a more sustainable and flourishing environment for all beings.

Good Strategy/Bad Strategy Richard Rumelt.2011-07-19 *Good Strategy/Bad Strategy* clarifies the muddled thinking underlying too many strategies and provides a clear way to create and implement a powerful action-oriented strategy for the real world. Developing and implementing a strategy is the central task of a leader. A good strategy is a specific and coherent response to—and approach for—overcoming the obstacles to progress. A good strategy works by harnessing and applying power where it will have the greatest effect. Yet, Rumelt shows that there has been a growing and unfortunate tendency to equate Mom-and-apple-pie values, fluffy packages of buzzwords, motivational slogans, and financial goals with “strategy.” In *Good Strategy/Bad Strategy*, he debunks these elements of “bad strategy” and awakens an understanding of the power of a “good strategy.” He introduces nine sources of power—ranging from using leverage to effectively focusing on growth—that

are eye-opening yet pragmatic tools that can easily be put to work on Monday morning, and uses fascinating examples from business, nonprofit, and military affairs to bring its original and pragmatic ideas to life. The detailed examples range from Apple to General Motors, from the two Iraq wars to Afghanistan, from a small local market to Wal-Mart, from Nvidia to Silicon Graphics, from the Getty Trust to the Los Angeles Unified School District, from Cisco Systems to Paccar, and from Global Crossing to the 2007–08 financial crisis. Reflecting an astonishing grasp and integration of economics, finance, technology, history, and the brilliance and foibles of the human character, *Good Strategy/Bad Strategy* stems from Rumelt’s decades of digging beyond the superficial to address hard questions with honesty and integrity.

No Medium Craig Dworkin. 2013-02-15 Close readings of ostensibly “blank” works—from unprinted pages to silent music—that point to a new understanding of media. In *No Medium*, Craig Dworkin looks at works that are blank, erased, clear, or silent, writing critically and substantively about works for which there would seem to be not only nothing to see but nothing to say. Examined closely, these ostensibly contentless works of art, literature, and music point to a new understanding of media and the limits of the artistic object. Dworkin considers works predicated on blank sheets of paper, from a fictional collection of poems in Jean Cocteau's *Orphée* to the actual publication of a ream of typing paper as a book of poetry; he compares Robert Rauschenberg's *Erased De Kooning Drawing* to the artist Nick Thurston's erased copy of Maurice Blanchot's *The Space of Literature* (in which only Thurston's marginalia were visible); and he scrutinizes the sexual politics of photographic representation and the implications of obscured or obliterated subjects of photographs. Reexamining the famous case of John Cage's *4'33"*, Dworkin links Cage's composition to Rauschenberg's *White Paintings*, Ken Friedman's *Zen for Record* (and Nam June Paik's *Zen for Film*), and other works, offering also a “guide to further listening” that surveys more than 100 scores and recordings of “silent” music. Dworkin argues that we should understand media not as blank, base things but as social events, and that there is no medium, understood in isolation, but only and always a plurality of media:

interpretive activities taking place in socially inscribed space.
