Little astronauts can find out about planets, stars, asteroids, space travel, the International Space Station and lots more. With lots to spot and talk about, vivid illustrations and simple language, this is a fun and entertaining way to introduce little children to a fascinating subject. With links to carefully selected websites where children can find out more about constellations and space via the Usborne Quicklinks website.

The Space Book Jim Bell,2018 Presents a series of 250 significant events in the history of astronomy and space exploration, from the original formation of the galaxies, to the space mission to the planet Mars, to speculation about the end of the universe.

There's No Place Like Space Tish Rabe,2019-06-18 The Cat in the Hat takes readers on an out of this world reading adventure through outer space! The Cat in the Hat's Learning Library is a nonfiction picture book series that introduces beginning readers ages 5-8 to important basic concepts. Learn about the solar system, planets, the constellations, and astronauts, and explore the wonders of space with the help of everyone's favorite Cat in the Hat! Perfect for aspiring astronauts, or any kid who loves learning and science. The universe is a mysterious place. We are only just learning what happens in space. Featuring beloved characters from Dr. Seuss's The Cat in the Hat, the Learning Library are unjacketed hardcover picture books that explore a range of nonfiction topics about the world we live in and include an index, glossary, and suggestions for further reading.

Beyond Earth Bob Krone,2006 This is a critical time for the space program, and for all of us. Even the significant steps that we have taken since the dawn of the space age in 1957, including orbital flight, the Moon landings, and orbiting space

stations, will in retrospect seem to be tiny steps compared to what lies ahead. Migrating into space will challenge us beyond anything we have previously accomplished, and we are destined to face adventures that are both fantastically breathtaking and supremely dangerous. Beyond Earth is for everyone interested in humankind's next great adventure -- the human settlement of the Solar System. A unique collection of world-class scholars, scientists, engineers, managers, astronauts, artists, authors, and professors examine the key questions of our unique circumstance at the dawn of a new era in space exploration and development: Why does space matter to us? What can we use it for? How can we get there efficiently? What will ordinary life be like in space? What will our homes be like on the Moon? On Mars? In orbit? Will we play? Will we love? The book does not stop with questions. It goes beyond the dramatic, the superficial, and the overly technical to the prescriptive, literally laying the brick and mortar for our future space faring civilisation. Contributing authors come from both hard and soft sciences; include education and the arts; and ask children, who will be the future space dwellers, for their visions. They document needed research. There are three underlying assumptions driving this book: First, that the human urge for flight, exploration and survival, plus its curiosity about the universe, are deeply embedded in our genes and in our minds; Second, that even if these urges were ignored, the continual improvement of the quality of life for the human race on earth, and perhaps even its ultimate survival, hinge on the successes of human exploration and habitation of space; and, Third that our generation can use the opportunity presented by outwards expansion to design a rewarding and exciting future of collaboration to capitalise on the lessons learned from human history on Earth.

[The Pop-Up, Pull-out Space Book](#) ,2024-04-30 Explore the Solar System with this exciting and immersive pop-up space book for kids. Pay a visit to the planets, stop off at the Moon, and gaze at the stars. The Pop-up, Pull-out Space Book is a must have for curious children. Featuring a spectacular 3D pop-up Solar System, exciting pull-out pages, and fun quizzes and facts, this book is the perfect introduction to space and the Solar System. Starting with a quick tour of our place in space, this fantastic book acts as a tour guide, visiting each planet in turn. From our local star, the Sun, the adventure will lead to all eight planets of the Solar System before reaching Pluto, the rest of the Milky Way and beyond. Fun facts, a pull-out fact file, and an exciting quiz are provided for each planet you stop off at. Stunning space photography is interwoven with the most up-to-date information about planets in our Solar System and their exploration. Text is broken down into easy-to-digest chunks to create a fun, beautiful, and educational resource for children. The spectacular, out-of-this world pop-up and pull-out features create a magical reading experience. This revised edition features a stunning new jacket, a fresh new look for the spreads, and the very latest information about space discoveries and missions.

Mousetronaut Mark Kelly,2012-10-09 A #1 New York Times bestseller “This little mouse may well inspire some big dreams.” —Kirkus Reviews “In this picture book based on the space shuttle Endeavor...Meteor is one of the smallest mice, but the most hardworking...the values of being small, useful, solving problems, and working hard—as opposed to being big

and strong—will inspire young readers.” —School Library Journal “Inspired by this real-life mouse, Kelly’s first children’s book tells the story of Meteor, a lightly anthropomorphized rodent who turns his tininess into an advantage when an important key gets stuck in a crack between two monitors...textured images and vivid portraits that make it absolutely clear that space travel is a larger-than-life adventure.” —Publishers Weekly A heartwarming picture book tale of the power of the small, from bestselling author and retired NASA astronaut Commander Mark Kelly. Astronaut Mark Kelly flew with “micronauts” on his first spaceflight aboard space shuttle Endeavour in 2001. Mousetronaut tells the story of a small mouse that wants nothing more than to travel to outer space. The little mouse works as hard as the bigger mice to show readiness for the mission . . . and is chosen for the flight! While in space, the astronauts are busy with their mission when disaster strikes—and only the smallest member of the crew can save the day. With lively illustrations by award-winning artist C. F. Payne, Mousetronaut is a charming tale of perseverance, courage, and the importance of the small!

If I Were an Astronaut Eric Braun,2010 Discusses activities astronauts do while they're in space.

Endurance Scott Kelly,2017-10-17 NATIONAL BEST SELLER A stunning, personal memoir from the astronaut and modern-day hero who spent a record-breaking year aboard the International Space Station—a message of hope for the future that will inspire for generations to come. The veteran of four spaceflights and the American record holder for consecutive days spent in space, Scott Kelly has experienced things very few have. Now, he takes us inside a sphere utterly hostile to human life. He describes navigating the extreme challenge of long-term spaceflight, both life-threatening and mundane: the devastating effects on the body; the isolation from everyone he loves and the comforts of Earth; the catastrophic risks of colliding with space junk; and the still more haunting threat of being unable to help should tragedy strike at home—an agonizing situation Kelly faced when, on a previous mission, his twin brother's wife, American Congresswoman Gabrielle Giffords, was shot while he still had two months in space. Kelly's humanity, compassion, humor, and determination resonate throughout, as he recalls his rough-and-tumble New Jersey childhood and the youthful inspiration that sparked his astounding career, and as he makes clear his belief that Mars will be the next, ultimately challenging, step in spaceflight. In *Endurance*, we see the triumph of the human imagination, the strength of the human will, and the infinite wonder of the galaxy.

The Fascinating Space Book for Kids Lisa Reichley,2021-10-12 From asteroids to zodiac constellations--500 amazing space facts for kids ages 8 to 12 Do you know a kid who wants to know all about space? This intergalactic entry into space books for kids is bursting with 500 out-of-this-world facts for hours of space exploration from the comfort of Earth. Alongside full-color pictures on every page, kids can adventure through stars, planets, and space technology with this book of astronomy for kids. Go beyond other space books for kids with trivia such as: Mars is often referred to as the red planet because its surface is red due to iron oxide, or rust. The average lifespan of a star is 10 billion years. All the other planets in

our solar system could fit between Earth and its moon. Kids will light up as they discover ice giants and famous astronomers with this standout among space books for kids.

Your Place in the Universe Paul M. Sutter, 2018 An astrophysicist presents an in-depth yet accessible tour of the universe for lay readers, while conveying the excitement of astronomy. How is a galaxy billions of lightyears away connected to us? Is our home nothing more than a tiny speck of blue in an ocean of night? In this exciting tour of a universe far larger than we can imagine, cosmologist Paul M. Sutter emphasizes how amazing it is that we are part of such a huge, complex, and mysterious place. Through metaphors and uncomplicated language, Sutter breathes life into the science of astrophysics, unveiling how particles, forces, and fields interplay to create the greatest of cosmic dramas. Touched with the author's characteristic breezy, conversational style--which has made him a breakout hit on venues such as The Weather Channel, the Science Channel, and his own popular Ask a Spaceman! podcast--he conveys the fun and wonder of delving deeply into the physical processes of the natural universe. He weaves together the past and future histories of our universe with grounded descriptions of essential modern-day physics as well as speculations based on the latest research in cosmology. Topics include our place in the Milky Way galaxy; the cosmic web--a vast web-like pattern in which galaxies are arranged; the origins of our universe in the big bang; the mysteries of dark matter and dark energy; how science has dramatically changed our relationship to the cosmos; conjectures about the future of reality as we know it; and more. For anyone who has ever stared at the starry night sky and wondered how we humans on Earth fit into the big picture, this book is an essential roadmap.

Apollo in the Age of Aquarius Neil M. Maher, 2017-03-27 In summer 1969, astronauts landed on the moon and hippie hordes descended on Woodstock--two era-defining events that are not entirely coincidental. Neil M. Maher shows how NASA's celestial aspirations were tethered to terrestrial concerns of the time: the civil rights struggle, the antiwar movement, environmentalism, feminism, and the culture wars.

Facts from Space! Dean Regas, 2016-10-01 A guided tour through the universe--and beyond! From the sun's super-hot core to the many moons of Neptune, we're traveling to the far reaches of our solar system and beyond! Astronomer Dean Regas presents Facts from Space!--an exciting education on everything outside our atmosphere. Inside, you'll discover space facts and celestial trivia, including: A day on Venus is longer than its year. Early space missions ejected human waste into space, where it froze into intricate crystals that still float in space today. After being in space, some astronauts returned to Earth up to 2 inches taller than when they left. The stars in the Big Dipper are shifting among themselves and will look like a Big Spatula by the year 75,000. And more! Packed with fascinating information, it's a stellar read for sci-fi fans and at-home astronomers alike!

The Smallest Lights in the Universe Sara Seager, 2020-08-18 LOS ANGELES TIMES BOOK PRIZE WINNER • An MIT

astrophysicist reinvents herself in the wake of tragedy and discovers the power of connection on this planet, even as she searches our galaxy for another Earth, in this “bewitching” (Anthony Doerr, The New York Times Book Review) memoir. “Sara Seager’s exploration of outer and inner space makes for a stunningly original memoir.”—Abraham Verghese, author of Cutting for Stone Sara Seager has always been in love with the stars: so many lights in the sky, so much possibility. Now a pioneering planetary scientist, she searches for exoplanets—especially that distant, elusive world that sustains life. But with the unexpected death of Seager’s husband, the purpose of her own life becomes hard for her to see. Suddenly, at forty, she is a widow and the single mother of two young boys. For the first time, she feels alone in the universe. As she struggles to navigate her life after loss, Seager takes solace in the alien beauty of exoplanets and the technical challenges of exploration. At the same time, she discovers earthbound connections that feel every bit as wondrous, when strangers and loved ones alike reach out to her across the space of her grief. Among them are the Widows of Concord, a group of women offering advice on everything from home maintenance to dating, and her beloved sons, Max and Alex. Most unexpected of all, there is another kind of one-in-a-billion match, not in the stars but here at home. Probing and invigoratingly honest, *The Smallest Lights in the Universe* is its own kind of light in the dark.

Uranus Colleen Sexton,2012-08-01 The planet Uranus has a bright blue-green color because of methane gas in its atmosphere. Young children will learn about the discovery of Uranus, how it has been explored, and why it is tilted on its side!

Space Forces Fred Scharmen,2021-11-02 The radical history of space exploration from the Russian Cosmists to Elon Musk Many societies have imagined going to live in space. What they want to do once they get up there - whether conquering the unknown, establishing space colonies, privatising the moon's resources - reveals more than expected. In this fascinating radical history of space exploration, Fred Scharmen shows that often science and fiction have combined in the imagined dreams of life in outer space, but these visions have real implications for life back on earth. For the Russian Cosmists of the

1890s space was a place to pursue human perfection away from the Earth. For others, such as Wernher Von Braun, it was an engineering task that combined, in the Space Race, the Cold War, and during World War II, with destructive geopolitics. Arthur C. Clark in his speculative books offered an alternative vision of wonder that is indifferent to human interaction. Meanwhile NASA planned and managed the space station like an earthbound corporation. Today, the market has arrived into outer space and exploration is the plaything of superrich technology billionaires, who plan to privatise the mineral wealth for themselves. Are other worlds really possible? Bringing these figures and ideas together reveals a completely different story of our relationship with outer space, as well as the dangers of our current direction of extractive capitalism and colonisation.

The Ultimate Book of Space Claudia Martin, 2021-08-15 From the marvels of the solar system, to the origins of Earth, and the mysteries of dark matter: discover all these and so much more, in this definitive children's guide to space. Beautifully realised, specially commissioned artworks and images from the most powerful space telescopes reveal extraordinary vistas of other planets, distant stars, and spiralling galaxies. Meanwhile, complex ideas are made simple by clear, easy-to-understand diagrams, fact-packed feature boxes, and ingenious infographics. Are you ready to step into the unknown? Get ready to discover the power of gravity; explore the many moons of Jupiter and Saturn; and behold the fearsome majesty of black holes. It's the ultimate visitor's guide to our Universe! A fantastic book for children aged 8+. ABOUT THE SERIES In order to create reference books deserving of the title 'Ultimate', we have brought together world-class children's authors, expert consultants, sought-after illustrators, and exceptional international photographers. Every title is meticulously researched, and presents information with clarity, passion, and intelligence.

The Great Big Book of Space Peter Grego, 2009 Take a trip around the solar system and out beyond the stars with this comprehensive guide to the universe. Features details of key space technologies, planetary facts and figures and a detailed look at our own planet Earth.
