Disease Control Priorities, Third Edition (Volume 9) Dean T. Jamison,Hellen Gelband,Susan Horton,Prabhat Jha,Charles N. Mock,Rachel Nugent,2017-12-06 As the culminating volume in the DCP3 series, volume 9 will provide an overview of DCP3 findings and methods, a summary of messages and substantive lessons to be taken from DCP3, and a further discussion of cross-cutting and synthesizing topics across the first eight volumes. The introductory chapters (1-3) in this volume take as their starting point the elements of the Essential Packages presented in the overview chapters of each volume. First, the chapter on intersectoral policy priorities for health includes fiscal and intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low-income setting in order to propose a highest-priority essential package. Second, the chapter on packages of care and delivery platforms for universal health coverage (UHC) includes

health sector interventions, primarily clinical and public health services, and uses the same approach to propose a highest priority package of interventions and policies that meet similar criteria, provides cost estimates, and describes a pathway to UHC.
