**The Science of Effective Mentorship in STEMM** National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Higher Education and Workforce, Committee on Effective Mentoring in STEMM, 2020-01-24  
Mentorship is a catalyst capable of unleashing one's potential for discovery, curiosity, and participation in STEMM and subsequently improving the training environment in which that STEMM potential is fostered. Mentoring relationships provide developmental spaces in which students' STEMM skills are honed and pathways into STEMM fields can be discovered. Because mentorship can be so influential in shaping the future STEMM workforce, its occurrence should not be left to chance or idiosyncratic implementation. There is a gap between what we know about effective mentoring and how it is practiced in higher education. The Science of Effective Mentorship in STEMM studies mentoring programs and practices at the undergraduate and graduate levels. It explores the importance of mentorship, the science of mentoring relationships, mentorship of underrepresented students in STEMM, mentorship structures and behaviors, and institutional cultures that support mentorship. This report and its complementary interactive guide present insights on effective programs and practices that can be adopted and adapted by institutions, departments, and individual faculty members.

*The Luck Factor* Max Gunther, 2010-03-02 Do you want to be one of the lucky ones? Luck. We can't see it or touch it, but we can feel it. Luck is a largely unexplored phenomenon, because many believe it to be uncontrollable. But what if luck could be influenced? What if it were possible to harness it to our own advantage? Taking us on a richly anecdotal ride through the popular theories and histories of luck -- from pseudoscience to paganism, through mathematics to magic -- Max Gunther arrives at a precise set of conclusions as to the nature of luck and the possibility of managing it. By drawing out the logical truths hidden in the examples of outrageous fortune he shares throughout this book, Gunther presents readers with 'The Luck Factor' -- the five traits that lucky people have in common. He then shows you how you can use this approach to improve your luck and turn your fortune around. This book is a must-read for anyone who wants to change their luck -- for

the better!

**Aquatic Insects** Kleber Del-Claro,Rhainer Guillermo,2019-06-10 This book presents a broad view of the ecology and behavior of aquatic insects, raising awareness of this conspicuous and yet little known fauna that inhabits inland waterbodies such as rivers, lakes and streams, and is particularly abundant and diverse in tropical ecosystems. The chapters address topics such as distribution, dispersal, territoriality, mating behavior, parental care and the role of sensory systems in the response to external and internal cues. In the context of ecology, it discusses aquatic insects as bio indicators that may be used to assess environmental disturbances, either in protected or urban areas, and provides insights into how genetic connectivity can support the development of novel conservation strategies. It also explores how aquatic insects can inspire solutions for various problems faced by modern society, presenting examples in the fields of material science, optics, sensorics and robotics.

**Digital Heritage** Marinos Ioannides,Dieter Fellner,Andreas Georgopoulos,Diofantos Hadjimitsis,2010-11-02 This volume comprises the proceedings of the Third International Euro-Mediterranean Conference (EuroMed 2010) on the historical island of Cyprus. The focal point of this conference was digital heritage, which all of us involved in the documentation of cultural heritage continually strive to implement. The excellent selection of papers published in the proceedings reflects in the best possible way the benefits of exploiting modern technological advances for the restoration, preservation and e-documentation of any kind of cultural heritage. Above all, we should always bear in mind that what we do now may be used by people in another century to repair, rebuild or conserve the buildings, monuments, artifacts and landscapes that seem important. Recent events like earthquakes, tsunamis, volcanic eruptions, fires and insurrections show that we can never be too prepared for damage to, and loss of, the physical and, non-tangible elements of our past and, in general, our cultural heritage. To reach this ambitious goal, the topics covered included experiences in the use of innovative recording technologies and methods, and how to take best advantage of the results obtained to build up new instruments and improved methodologies for documenting in multimedia formats, archiving in digital libraries and managing a cultural heritage. Technological advances are very often reported in detail in specialized fora. This volume of proceedings establishes bridges of communication and channels of co-eration between the various disciplines involved in cultural heritage preservation.

**Computer Network Time Synchronization** David L. Mills,2006-03-24 What started with the sundial has, thus far, been

refined to a level of precision based on atomic resonance: Time. Our obsession with time is evident in this continued scaling down to nanosecond resolution and beyond. But this obsession is not without warrant. Precision and time synchronization are critical in many applications, such as air traffic

**Seeds of Terror** Maria Ressa, 2011-02-05 For anyone wishing to understand the next, post-9/11 generation of al-Qaeda planning, leadership, and tactics, there is only one place to begin: Southeast Asia. In fact, such countries as the Philippines, Indonesia, Thailand, and Malaysia have been crucial nodes in the al-Qaeda network since long before the strikes on the Pentagon and World Trade Center, but when the allies overran Afghanistan, the new camps in Southeast Asia became the key training grounds for the future. It is in the Muslim strongholds in the Philippines and Indonesia that the next generation of al-Qaeda can be found. In this powerful, eye-opening work, Maria Ressa casts the most illuminating light ever on this fascinating but little-known terrorist HQ. Every major al-Qaeda attack since 1993 has had a connection to the Philippines, and Maria Ressa, CNN's lead investigative reporter for Asia and a Filipino-American who has lived in the region since 1986, has broken story after story about them. From the early, failed attempts to assassinate Pope John Paul II and Bill Clinton to the planning of the 9/11 strikes and the 48 Hours of Terror, in which eleven American jetliners were to be blown up over the Pacific, she has interviewed the terrorists, their neighbors and families, and the investigators from six different countries who have tracked them down. After the Bali bombing, al-Qaeda's worst strike since 9/11, which killed more than two hundred, Ressa broke major revelations about how it was planned, why it was a Plan B substitute for an even more ambitious scheme aimed at Singapore, and why the suicide bomber recruited to deliver the explosives almost caused the whole plan to fall apart when he admitted he could barely drive a car. Above all, Ressa has seen how al-Qaeda's tactics are shifting under the pressures of the war on terror. Rather than depending upon its own core membership (estimated at three to four thousand at its peak), the network is now enmeshing itself in local conflicts, co-opting Muslim independence movements wherever they can be found, and helping local revolutionaries to fund, plan, and execute sinister attacks against their neighbors and the West. If history is any guide, al-Qaeda revisits its plans over and over until they can succeed -- and many of those plans have already been discovered and are here revealed, thanks to classified investigative documents uncovered by Ressa.

**Islamic Geometric Patterns** Jay Bonner, 2017-08-17 The main focus of this unique book is an in-depth examination of the polygonal technique; the primary method used by master artists of the past in creating Islamic geometric patterns. The author details the design methodology responsible for this all-but-lost art form and presents evidence for its use from the historical record, both of which are vital contributions to the understanding of this ornamental tradition. Additionally, the author examines the historical development of Islamic geometric patterns, the significance of geometric design within the broader context of Islamic ornament as a whole, the formative role that geometry plays throughout the Islamic ornamental

arts (including calligraphy, the floral idiom, dome decoration, geometric patterns, and more), and the underexamined question of pattern classification. Featuring over 600 beautiful color images, *Islamic Geometric Patterns: Their Historical Development and Traditional Methods of Construction* is a valuable addition to the literature of Islamic art, architecture and geometric patterns. This book is ideal for students and scholars of geometry, the history of mathematics, and the history of Islamic art, architecture, and culture. In addition, artists, designers, craftspeople, and architects will all find this book an exceptionally informative and useful asset in their fields. Jay Bonner is an architectural ornamentalist and unaffiliated scholar of Islamic geometric design. He received his MDes from the Royal College of Art in London (1983). He has contributed ornamental designs for many international architectural projects, including the expansion of both the al-Masjid al-Haram (Grand Mosque) in Mecca, and the al-Masjid an Nawabi (Prophet's Mosque) in Medina, as well the Tomb of Sheikh Hujwiri in Lahore, and the Ismaili Centre in London - to name but a few. He is committed to the revitalization of Islamic geometric design through the teaching of traditional methodological practices. To this end, in addition to publishing, Jay Bonner has lectured and taught design seminars at many universities and conferences in North America, Europe, North Africa and Asia.

**The Advantage** Patrick M. Lencioni, 2012-03-14 There is a competitive advantage out there, arguably more powerful than any other. Is it superior strategy? Faster innovation? Smarter employees? No, New York Times best-selling author, Patrick Lencioni, argues that the seminal difference between successful companies and mediocre ones has little to do with what they know and how smart they are and more to do with how healthy they are. In this book, Lencioni brings together his vast experience and many of the themes cultivated in his other best-selling books and delivers a first: a cohesive and comprehensive exploration of the unique advantage organizational health provides. Simply put, an organization is healthy when it is whole, consistent and complete, when its management, operations and culture are unified. Healthy organizations outperform their counterparts, are free of politics and confusion and provide an environment where star performers never want to leave. Lencioni's first non-fiction book provides leaders with a groundbreaking, approachable model for achieving organizational health—complete with stories, tips and anecdotes from his experiences consulting to some of the nation's leading organizations. In this age of informational ubiquity and nano-second change, it is no longer enough to build a competitive advantage based on intelligence alone. *The Advantage* provides a foundational construct for conducting business in a new way—one that maximizes human potential and aligns the organization around a common set of principles.

*Mapping between X.400 (1988)/ISO 10021 and RFC 822* Steve Hardcastle-Kille, 1992 Describes a set of mappings which will enable interworking between systems operating the CCITT X.400 (1988) Recommendations on Message Handling Systems / ISO IEC 10021 Message Oriented Text Interchange Systems (MOTIS( [CCITT/ISO88a], and systems using the RFC 822 mail protocol [Crocker82a] or protocols derived from RFC 822. Aims to maximize the services offered across the

boundary, whilst not requiring unduly complex mappings. Specifies a mapping between two protocols.

**Tattooed Skin and Health** J. Serup, N. Kluger, W. Bäuml, 2015-03-26 With about 10-20% of the adult population in Europe being tattooed, there is a strong demand for publications discussing the various issues related to tattooed skin and health. Until now, only a few scientific studies on tattooing have been published. This book discusses different aspects of the various medical risks associated with tattoos, such as allergic reactions from red tattoos, papulo-nodular reactions from black tattoos as well as technical and psycho-social complications, in addition to bacterial and viral infections. Further sections are dedicated to the composition of tattoo inks, and a case is made for the urgent introduction of national and international regulations. Distinguished authors, all specialists in their particular fields, have contributed to this publication which provides a comprehensive view of the health implications associated with tattooing. The book covers a broad range of topics that will be of interest to clinicians and nursing staff, toxicologists and regulators as well as laser surgeons who often face the challenge of having to remove tattoos, professional tattooists and producers of tattoo ink.

**Malaysian Politics in the New Media Age** Pauline Pooi Yin Leong, 2019-08-21 This book provides a comprehensive overview of the impact of the Internet on Malaysian politics and how it has played a pivotal role in influencing the country's political climate. It lays out the background of Malaysia's political history and media environment, and addresses the ramifications of media-isation for the political process, including political public relations, advertising and online campaigns. The book examines the Internet's transformative role and effect on Malaysian democracy, as well as its consequences for political actors and the citizenry, such as the development of cyber-warfare, and the rise of propaganda or "fake" news in the online domain. It also investigates the interplay between traditional and new media with regard to the evolution of politics in Malaysia, especially as a watchdog on accountability and transparency, and contributes to the current discourse on the climate of Malaysian politics following the rise of new media in the country. This book is particularly timely in the wake of the 2018 Malaysian general election, and will be of interest to students and researchers in communications, politics, new media and cultural studies.
