The World Turned Upside Down? Greg Albo, Leo Panitch, 2018-12-24 *A World Turned Upside Down?* poses two overarching questions for the new period opened by the Trump election and the continued growth of right-wing nationalisms. Is there an unwinding of neoliberal globalization taking place, or will globalization continue to deepen, but still deny the free cross-border movement of labor? Would such an unwinding entail an overall shift in power and accumulation to specific regions of the Global South that might overturn the current world order and foster the disintegration of the varied regional blocs that have formed? These questions are addressed through a series of essays that carefully map the national, class, racial, and gender dimensions of the state, capitalism, and progressive forces today. Sober assessment is crucial for the left to gain its political bearings in this trying period and the uncertainties that lie ahead.

Socialist Register 2019 Leo Pantick, Albo Greg, 2020 Since the Great Financial Crisis swept across the world in 2008, there have been few certainties regarding the trajectory of global capitalism, let alone the politics taking hold in individual states. This has now given way to palpable confusion regarding what sense to make of this world in a political conjuncture marked by Donald Trump's 'Make America Great Again' presidency of the United States, on the one hand, and, on the other, Xi Jinping's ambitious agenda in consolidating his position as 'core leader' at the top of the Chinese state.// - Is a major redrawing of the map of global capitalism underway? - Is an unwinding of globalization in train, or will it continue, but with closure to the mobility of labour? - Is there a legitimacy crisis for neoliberalism even while neoliberal practices continue to

form state policy? - Are we witnessing an authoritarian mutation of liberal democracy in the 21st century? - Should the strategic issues today be posed in terms of 'socialism versus barbarism redux'?//CONTRIBUTORS: AIJAZ AHMAD - ELMAR ALTVATER - NICOLE ASCHOFF -MARCO BOFFO - PATRICK BOND - ALAN CAFRUNY - BEN FIN - ANA GARCIA- JAYATI GHOSH - SAM GINDIN - ADAM HANIEH - DOUG HENWOOD -RAY KIEL - COLIN LEY - LIN CHU - BIRGIT MAHNKOPF - UMUT OZS - LEOPANITCH - ALFREDO SAAD-FILHO - SEAN KENJI STARRS - DAVID WHYTE

Life, Politics, and Resistance in Kashmir after 2019 Shubh Mathur,Mirza Saaib Be'g,2024-05-15 The forcible integration of Kashmir into the Indian union has unleashed a new wave of intense political repression, human rights violations and resource appropriation in Kashmir and has once again made the conflict a focus of international attention. This has led to a paradigm shift in global perceptions and created space for new understandings of the conflict and its possible resolutions. *Life, Politics, and Resistance in Kashmir after 2019: A Multidisciplinary Understanding of the Conflict* brings together original research and analysis by emerging and established scholars from a range of disciplines to offer a profoundly transformative understanding of the history and experience of Kashmir and the Kashmiris. This book builds a Kashmir-centric narrative of contemporary political and social developments through a discussion of topics ranging from struggles for human rights to environmental destruction and resource appropriation, as well as mental health and the experiences of women, children, political prisoners, and minorities.

The New BJP Nalin Mehta,2024-07-11 This book examines how the BJP became the world's largest political party. It goes beyond the usual narrative of the party's Hindutva politics to explain how, under Narendra Modi, the party reshaped the Indian polity using its own brand of social engineering. According to the findings of this book, this reconstruction was cleverly powered by new caste coalitions, the claim of a new welfare state that focused on marginalised social groups and the making of a women-voter base. Based on data from three unique indices—the Mehta-Singh Social Index, which studies the caste composition of Indian political parties; the Narad Index, which calculates communication patterns across topics and audiences; and PollNiti, which connects and tallies hundreds of political and economic datasets—The New BJP is full of startling insights into the way both the party and the country function. Previously untapped historical records, exclusive interviews with party leaders and comprehensive reportage from across India provide a fresh understanding of the BJP's growth areas, including the Northeast and south India. A lucid and objective study of the BJP and India today, this book will be useful to researchers, journalists, students, activists and general public alike. Print edition not for sale in South Asia (Bangladesh, Bhutan, India, Nepal, Pakistan and Sri Lanka).

A New Global Geometry? Greg Albo,2024-06-18 Scrutinizes possibilities for an equalised global order, in light of recent conflicts between the world's major powers The “post-Cold War era is definitively over,” asserted US President Joe Biden as

he launched the new National Security Strategy, warning in late 2022 that “a competition is underway between the major powers to shape what comes next.” American leadership, the document declared, would be more necessary than ever to define the future of the international order,” insisting that the US must marshal its unparalleled economic, military, and diplomatic resources to confront its geopolitical rivals. Socialist Register 2024: A New Global Geometry? takes stock of momentous changes on the horizon: Even if these geopolitical shifts do not spell the end of globalization, how might they alter its historical trajectory? While it is premature to speak of the end of the liberal economic order, let alone the development of a multipolar international system, can we begin to assess the dimensions of a new global geometry? And, how might we assess the potential vulnerabilities of socialist movements worldwide, alongside the potential resistance our movements might manage to present, grounded in our historical demands for a democratic and equalizing world order?

The Correct Decision: Freedom Versus Evil And Ignorance Jamil Kazoun,2019-09-22 For the first time in recorded history of man, a mathematical formula has been developed to measure the accuracy and error in a vote, in a group decision. Humans have lived for thousands of years making big and small decisions that dominate their life in politics, law, economics and culture, without ever measuring these decisions' mathematical accuracy and error. Specific formulas for this did not exist. Now, a formula exists! A congress, a parliament, a senate, a court, a Supreme Court, a jury, a corporate board, or a commission have no excuse any longer for allowing votes that are not measured for accuracy and error. The content shows how the uneducated public acts as a mob that uses the law to control others or steal their property just as a mob that uses guns to do the same. The author describes many lawmakers and the uneducated public as thieves stealing by force-of-law from one person to give another, just as Robin Hood was a thief that stole by force-of-weapon from innocent people and was glorified by those who received stolen property and cared less how this stolen property was gained, as long as it was given to them. Individuals will learn from this book how to create Freedom Coalitions instead the current system of Oppression Coalitions that are the basis of current Mob Rule political systems. The new basis for freedom will be mathematics, a scientific solid and sustainable foundation for human freedom.

Comparative Criminology Across Western and African Perspectives Sungi, Simeon P.,Ouassini, Nabil,2022-06-03 Crime prevention is essential to the success of any civilization. Effective criminal justice systems contribute greatly to the prevention of crime. However, clashing traditional and modern theories regarding appropriate action within criminal justice organizations can cause these systems to fail even when personnel is beyond reproach. Successfully blending traditional and modern theories on criminal justice can bolster justice systems and allow them to be successful. Comparative Criminology Across Western and African Perspectives is a critical scholarly publication that addresses comparative issues pertaining to empirical research and theoretical frameworks on criminology in Africa. Highlighting topics such as policing ethics, criminal theory, and victims' rights, this book is ideal for academicians, law enforcement, victim advocates, lawmakers, correctional

officers, correctional rehabilitation counselors, criminologists, researchers, policymakers, government officials, and students.

Upside Down Dan Meyer,2016-03-28 We the People have had it pretty good since WWII. Our prosperity has resulted in our collective apathy toward the corrupt progression of what once were servants of the People into life-long career politicians in Washington, D.C. who have become our elite political ruling class. Power corrupts and absolute power corrupts absolutely. Today in our United States we have an all-powerful central government enabled by a subservient media propelling our nation toward the living hell described in George Orwell's 1984 where truth cannot be found-where freedom does not exist. *Upside Down* clearly defines the immediate action We the People can and must take to restore what used to be our government of, by, and for the people. If we choose to continue to sit on the sidelines and not get involved, we will transition from apathy to dependence and out of that dependence will come the bondage from which we rose 239 years ago.

Upside Down Michael L Roeder,2024-06-22 *Upside Down* is a book about eight serious political, social and economic issues which have the potential, each separately or several together, to push America into the abyss. Chapters 1-8 are issue specific and each chapter has the author's solutions in bold, black print. For example, Chapter 1 is about our current political system, a system in dire straits. As a History major in college, I have been a life-long student of the American political system and have been active in local politics. Chapter 7 is about war and its potential consequences for this country and the world. My thirty-two years of military service and actual involvement in the Persian Gulf conflict in Saudi Arabia and Kuwait, fueled my continued interest in military history after retirement. Chapter 9 summarizes the book and Chapter 10 is a daily update of those issues which continued to unfold after this book went to the publisher on December 6, 2023.

Decolonising and Internationalising Geography Bruno Schelhaas, Federico Ferretti, André Reyes Novaes, Marcella Schmidt di Friedberg, 2020-07-30 International scholarship is increasingly aware that the 'geographical tradition' is a contentious and contested field: while critical reflections on the imperial past of the discipline are still ongoing, new tendencies including decolonial studies and geographies of internationalism are focusing on the progressive aspects of plural geographical traditions. This volume contains selected papers presented at two Symposia of the Commission on the History of Geography of the International Geographical Union within the 25th International Congress of History of Science and Technology which took place in Rio de Janeiro in July 2017. The papers address processes of 'decolonising' and 'internationalising' science in the 19th and 20th century, with a special emphasis on geography. Internationalization, circulation and dissemination of geographical concepts and ideas are in the focus. The volume includes case studies on Latin America, tropical regions as well as Europe and Japan. There is also an emphasis on the history of international congresses and organizations and on the international circulation of knowledge.

Harmon, Gayle Clemans, 2009-09-23 This work is filled with 350 works by well-known artists such as Joyce Kozloff, Ed Ruscha, Julian Schnabel, and Olafer Eliasson. Re-Mapping Centre and Periphery Tessa Hauswedell, Axel Körner, Ulrich Tiedau, 2019-03-25 Historians often assume a one-directional transmission of knowledge and ideas, leading to the establishment of spatial hierarchies defined as centres and peripheries. In recent decades, transnational and global history have contributed to a more inclusive understanding of intellectual and cultural exchanges that profoundly challenged the ways in which we draw our mental maps. Covering the early modern and modern periods, Re-Mapping Centre and Periphery investigates the asymmetrical and multi-directional structure of such encounters within Europe as well as in a global context. Exploring subjects from the shores of the Russian Empire to nation-making in Latin America, the international team of contributors demonstrates how, as products of human agency, centre and periphery are conditioned by mutual dependencies; rather than representing absolute categories of analysis, they are subjective constructions determined by a constantly changing discursive context. Through its analysis, the volume develops and implements a conceptual framework for remapping centres and peripheries, based on conceptual history and discourse history. As such, it will appeal to a wide variety of historians, including transnational, cultural and intellectual, and historians of early modern and modern periods.
