Pluriversal Politics Arturo Escobar.2020-04-24 In *Pluriversal Politics* Arturo Escobar engages with the politics of the possible and how established notions of what is real and attainable preclude the emergence of radically alternative visions of the future. Reflecting on the experience, philosophy, and practice of indigenous and Afro-descendant activist-intellectuals and on current Latin American theoretical-political debates, Escobar chronicles the social movements mobilizing to defend their territories from large-scale extractive operations in the region. He shows how these movements engage in an ontological politics aimed at bringing about the pluriverse—a world consisting of many worlds, each with its own ontological and epistemic grounding. Such a politics, Escobar contends, is key to crafting myriad world-making stories telling of different possible futures that could bring about the profound social transformations that are needed to address planetary crises. Both a call to action and a theoretical provocation, *Pluriversal Politics* finds Escobar at his critically incisive best.

Pocket Maps and Public Poetry in the English Renaissance Katarzyna Lecky.2019-04-11 Katarzyna Lecky explores how early modern British poets paid by the state adapted inclusive modes of nationhood charted by inexpensive, small-format maps. She explores chapbooks ('cheapbooks') by Edmund Spenser, Samuel Daniel, Ben Jonson, William Davenant, and John Milton alongside the portable cartography circulating in the same retail print industry. Domestic pocket maps were designed for heavy use by a broad readership that included those on the fringes of literacy. The era's de facto laureates all banked their success as writers appealing to this burgeoning market share by drawing the nation as the property of the commonwealth rather than the Crown. This book investigates the accessible world of small-format cartography as it emerges in the texts of the poets raised in the expansive public sphere in which pocket maps flourished. It works at the intersections of space, place, and national identity to reveal the geographical imaginary shaping the flourishing business of cheap print. Its placement of poetic economies within mainstream systems of trade also demonstrates how cartography and poetry worked together to mobilize average consumers as political agents. This everyday form of geographic poiesis was also a strong platform for poets writing for monarchs and magistrates when their visions of the nation ran counter to the interests of the government.

[Mooring the Global Archive](#) Martin Dusinberre.2023-09-30 Martin Dusinberre follows the Yamashiro-maru steamship across Asian and Pacific waters in an innovative history of Japan's engagement with the outside world in the late-nineteenth

century. This compelling in-depth analysis reconstructs the lives of some of the thousands of male and female migrants who left Japan for work in Hawai'i, Southeast Asia and Australia. These stories bring together transpacific historiographies of settler colonialism, labour history and resource extraction in new ways. Drawing on an unconventional and deeply material archive, from gravestones to government files, paintings to song, and from digitized records to the very earth itself, Dusinberre addresses key questions of method and authorial positionality in the writing of global history. This engaging investigation into archival practice asks, what is the global archive, where is it cited, and who are 'we' as we cite it? This title is also available as Open Access.

The Enduring Tension Donald J. Devine.2021-01-26 Western civilization fashioned a capitalism that created a worldwide economic cornucopia and higher standards of living than any other system, yet its legitimacy is often questioned by its beneficiaries. Boston University Emeritus Professor Angelo M. Codevilla, proclaims Donald Devine's *The Enduring Tension between Capitalism and the Moral Order*, "the best answer to this question since Adam Smith's. Like Smith, Devine shows the mutually sustaining nature of morality and economic freedom, and provides a much-needed clearing away of the confusion with which recent authors have befogged this essential relationship." Devine begins with Karl Marx setting capitalism's roots in feudalism and the implications of that traditionalist inheritance, finally transformed by Rousseau's "Christian heresy," which turned the vision of heavenly perfection into an impossibly perfect ideal for earthly society. To unravel this capitalist enigma, Devine identifies the roots of the confusion, critiques the rationalized responses, and identifies the remedy—the revival of an historical Lockean pluralism able to fuse a moral scaffolding sufficient to hold the walls and preserve the best of capitalist civilization.

Medieval Bodies: Life and Death in the Middle Ages Jack Hartnell.2019-11-12 With wit, wisdom, and a sharp scalpel, Jack Hartnell dissects the medieval body and offers a remedy to our preconceptions. Just like us, medieval men and women worried about growing old, got blisters and indigestion, fell in love, and had children. And yet their lives were full of miraculous and richly metaphorical experiences radically different from our own, unfolding in a world where deadly wounds might be healed overnight by divine intervention, or where the heart of a king, plucked from his corpse, could be held aloft as a powerful symbol of political rule. In this richly illustrated and unusual history, Jack Hartnell uncovers the fascinating ways in which people thought about, explored, and experienced their physical selves in the Middle Ages, from Constantinople to Cairo and Canterbury. Unfolding like a medieval pageant, and filled with saints, soldiers, caliphs, queens, monks and monstrous beasts, this book throws light on the medieval body from head to toe—revealing the surprisingly sophisticated medical knowledge of the time. Bringing together medicine, art, music, politics, philosophy, religion, and social history, Hartnell's work is an excellent guide to what life was really like for the men and women who lived and died in the Middle Ages. Perfumed and decorated with gold, fetishized or tortured, powerful even beyond death, these medieval bodies are not

passive and buried away; they can still teach us what it means to be human. Some images in this ebook are not displayed due to permissions issues.

Island Futures Mimi Sheller.2020-10-16 In *Island Futures* Mimi Sheller delves into the ecological crises and reconstruction challenges affecting the entire Caribbean region during a time of climate catastrophe. Drawing on fieldwork on postearthquake reconstruction in Haiti, flooding on the Haitian-Dominican border, and recent hurricanes, Sheller shows how ecological vulnerability and the quest for a just recovery in the Caribbean emerge from specific transnational political, economic, and cultural dynamics. Because foreigners are largely ignorant of Haiti's political, cultural, and economic contexts, especially the historical role of the United States, their efforts to help often exacerbate inequities. Caribbean survival under ever-worsening environmental and political conditions, Sheller contends, demands radical alternatives to the pervasive neocolonialism, racial capitalism, and US military domination that have perpetuated what she calls the coloniality of climate. Sheller insists that alternative projects for Haitian reconstruction, social justice, and climate resilience—and the sustainability of the entire region—must be grounded in radical Caribbean intellectual traditions that call for deeper transformations of transnational economies, ecologies, and human relations writ large.

Socialist Register 2019 Leo Pantick,Albo Greg.2020 Since the Great Financial Crisis swept across the world in 2008, there have been few certainties regarding the trajectory of global capitalism, let alone the politics taking hold in individual states. This has now given way to palpable confusion regarding what sense to make of this world in a political conjuncture marked by Donald Trump's 'Make America Great Again' presidency of the United States, on the one hand, and, on the other, Xi Jinping's ambitious agenda in consolidating his position as 'core leader' at the top of the Chinese state.// - Is a major redrawing of the map of global capitalism underway? - Is an unwinding of globalization in train, or will it continue, but with closure to the mobility of labour? - Is there a legitimacy crisis for neoliberalism even while neoliberal practices continue to form state policy? - Are we witnessing an authoritarian mutation of liberal democracy in the 21st century? - Should the strategic issues today be posed in terms of 'socialism versus barbarism redux'?//CONTRIBUTORS: AIJAZ AHMAD - ELMAR ALTVATER - NICOLE ASCHOFF -MARCO BOFFO - PATRICK BOND - ALAN CAFRUNY - BEN FIN - ANA GARCIA- JAYATI GHOSH - SAM GINDIN - ADAM HANIEH - DOUG HENWOOD -RAY KIEL - COLIN LEY - LIN CHU - BIRGIT MAHNKOPF - UMUT OZS - LEOPANITCH - ALFREDO SAAD-FILHO - SEAN KENJI STARRS - DAVID WHYTE

The World Turned Upside Down? Greg Albo, Leo Panitch. 2018-12-24 *A World Turned Upside Down?* poses two overarching questions for the new period opened by the Trump election and the continued growth of right-wing nationalisms. Is there an unwinding of neoliberal globalization taking place, or will globalization continue to deepen, but still deny the free cross-border movement of labor? Would such an unwinding entail an overall shift in power and accumulation to specific regions of the Global South that might overturn the current world order and foster the disintegration of the varied regional blocs that have formed? These questions are addressed through a series of essays that carefully map the national, class, racial, and gender dimensions of the state, capitalism, and progressive forces today. Sober assessment is crucial for the left to gain its political bearings in this trying period and the uncertainties that lie ahead.

The Correct Decision: Freedom Versus Evil And Ignorance Jamil Kazoun. 2019-09-22 For the first time in recorded history of man, a mathematical formula has been developed to measure the accuracy and error in a vote, in a group decision. Humans have lived for thousands of years making big and small decisions that dominate their life in politics, law, economics and culture, without ever measuring these decisions' mathematical accuracy and error. Specific formulas for this did not exist. Now, a formula exists! A congress, a parliament, a senate, a court, a Supreme Court, a jury, a corporate board, or a commission have no excuse any longer for allowing votes that are not measured for accuracy and error. The content shows how the uneducated public acts as a mob that uses the law to control others or steal their property just as a mob that uses guns to do the same. The author describes many lawmakers and the uneducated public as thieves stealing by force-of-law from one person to give another, just as Robin Hood was a thief that stole by force-of-weapon from innocent people and was glorified by those who received stolen property and cared less how this stolen property was gained, as long as it was given to them. Individuals will learn from this book how to create Freedom Coalitions instead the current system of Oppression Coalitions that are the basis of current Mob Rule political systems. The new basis for freedom will be mathematics, a scientific solid and sustainable foundation for human freedom.

Anglo Nostalgia Edoardo Campanella, Marta Dassu. 2019-08 Does not seek to judge the wisdom of Britain leaving the EU, but exposes nostalgia's great danger: the oversimplification of reality. Nostalgia has become a major force in global politics. While Donald Trump promises to make America great again, Xi Jinping calls for a great rejuvenation of the Chinese people, and a majority of Russians still mourn the Soviet Union. Now, hardline Brexiteers are yearning for a revival of the British Empire. Despite its romantic flavor, nostalgia is a malaise - a combination of paranoia and melancholy that idealizes the past, while denigrating the present. This epidemic of mythicizing national history is shaping politics in risky ways, fueled by ageing populations, shifts in the global order, and technological disruption. Nowhere has more starkly epitomized this new age of nostalgic nationalism than Britain, where Brexiteers trapped in an idealized past are reviving calls for a political Anglosphere, founded on dreams of their buccaneering heritage and inherent connection with their true kith and kin. Drawing

on psychology, political science, history and popular culture, *Anglo Nostalgia* analyses the rapid spread of this global phenomenon, before focusing on Brexit as a case study. Without seeking to judge the wisdom of Britain leaving the EU, Campanella and Dassu expose nostalgia's great danger: the oversimplification of reality, leading to unprecedented political miscalculations and rising geopolitical tensions.

Extraterritoriality Victor Fan. 2019-07-17 Examining how Hong Kong filmmakers, spectators and critics wrestled with this perturbation between the Leftist Riots (1967) and the aftermath of the Umbrella Movement (2014), this book traces how Hong Kong's extraterritoriality has been framed: in its position of being doubly occupied and doubly abandoned by contesting juridical, political, linguistic and cultural forces. Extraterritoriality scrutinises creative works in mainstream cinema, independent films, television, video artworks and documentaries - especially those by marginalised artists - actively rewriting and reconfiguring how Hong Kong cinema and media are to be defined and located.

The Cato Street Conspiracy Jason McElligott, Martin Conboy. 2019-12-17 If the Cato Street Conspiracy had been successful, Britain would have been proclaimed a republic by tradesmen of English, Scots, Irish and black Jamaican backgrounds. This book explains the conspiracy, and why you have never heard of it.

No Go World Ruben Andersson.2019-04-02 War-torn deserts, jihadist killings, trucks weighted down with contraband and migrants—from the Afghan-Pakistan borderlands to the Sahara, images of danger depict a new world disorder on the global margins. With vivid detail, Ruben Andersson traverses this terrain to provide a startling new understanding of what is happening in remote “danger zones.” Instead of buying into apocalyptic visions, Andersson takes aim at how Western states and international organizations conduct military, aid, and border interventions in a dangerously myopic fashion, further disconnecting the world’s rich and poor. Using drones, proxy forces, border reinforcement, and outsourced aid, risk-obsessed powers are helping to remap the world into zones of insecurity and danger. The result is a vision of chaos crashing into fortified borders, with national and global politics riven by fear. Andersson contends that we must reconnect and snap out of this dangerous spiral, which affects us whether we live in Texas or Timbuktu. Only by developing a new cartography of hope can we move beyond the political geography of fear that haunts us.

Comparative Criminology Across Western and African Perspectives Sungi, Simeon P., Ouassini, Nabil. 2022-06-03 Crime prevention is essential to the success of any civilization. Effective criminal justice systems contribute greatly to the prevention of crime. However, clashing traditional and modern theories regarding appropriate action within criminal justice organizations can cause these systems to fail even when personnel is beyond reproach. Successfully blending traditional and modern theories on criminal justice can bolster justice systems and allow them to be successful. *Comparative Criminology Across Western and African Perspectives* is a critical scholarly publication that addresses comparative issues pertaining to empirical research and theoretical frameworks on criminology in Africa. Highlighting topics such as policing ethics, criminal theory, and victims' rights, this book is ideal for academicians, law enforcement, victim advocates, lawmakers, correctional officers, correctional rehabilitation counselors, criminologists, researchers, policymakers, government officials, and students.

Decolonising and Internationalising Geography Bruno Schelhaas, Federico Ferretti, André Reyes Novaes, Marcella Schmidt di Friedberg. 2020-07-30 International scholarship is increasingly aware that the 'geographical tradition' is a contentious and contested field: while critical reflections on the imperial past of the discipline are still ongoing, new tendencies including decolonial studies and geographies of internationalism are focusing on the progressive aspects of plural geographical traditions. This volume contains selected papers presented at two Symposia of the Commission on the History of Geography of the International Geographical Union within the 25th International Congress of History of Science and Technology which took place in Rio de Janeiro in July 2017. The papers address processes of 'decolonising' and 'internationalising' science in the 19th and 20th century, with a special emphasis on geography. Internationalization, circulation and dissemination of geographical concepts and ideas are in the focus. The volume includes case studies on Latin America, tropical regions as well as Europe and Japan. There is also an emphasis on the history of international congresses and organizations and on the international circulation of knowledge.

Upside Down Dan Meyer. 2016-03-28 "We the People" have had it pretty good since WWII. Our prosperity has resulted in our collective apathy toward the corrupt progression of what once were servants of the People into life-long "career politicians" in Washington, D.C. who have become our elite political ruling class. Power corrupts and absolute power corrupts absolutely. Today in our United States we have an all-powerful central government enabled by a subservient media propelling our nation toward the living hell described in George Orwell's 1984 where truth cannot be found—where freedom does not exist. *Upside Down* clearly defines the immediate action "We the People" can and must take to restore what used to be our government of, by, and for the people. If we choose to continue to sit on the sidelines and not get involved, we will transition from apathy to dependence and out of that dependence will come the bondage from which we rose 239 years ago.

Rethinking Leadership for a Green World Andrew Taylor. 2022-03-20 First James Lovelock, and recently Prince

William and David Attenborough believe that we have reached a tipping point in the process of climate change. Whether they are right or not, it is certainly true that the impact of humankind upon the ecology of the earth has reached a point where real changes in human behaviour are required. If managers are to be enablers of planetary survival then we need to develop a new approach to risk, which explicitly includes ecological limits upon economic behaviour. This implies a fundamental reorientation of their role in allocating resources to minimise risk and maximise reward. This book brings together some of the brightest contemporary thinkers on leadership, complexity and sustainability to consider the big ideas that we will need to make the changes required, and to outline the major themes that can inform a new approach to constructing a green world. It looks at how to ensure that local models of sustainability are able to flourish in the context of global networks and presents specific case studies of markets and organisations that offer insights into the development integrated solutions and the leadership lessons we can learn. Combining both theory and practice, this book serves to guide business managers and provides deeper insight and critical perspectives on some of the key issues facing leaders moving towards the green economy. It also provides useful supplementary reading for students in business and environmental studies.

When the World Turned Upside Down Luis Martínez-Fernández. 2022-12-31 All History Is Contemporary History is a collection of 60 essays and opinion columns and 30 editorial posters, all written and created between 2017 and 2022, a period of momentous-some unimaginable-developments in the United States and across the world. This book stands at the intersection between opinion journalism and history, its individual components offering a dialogue between past and present (or present and past). They are, to use the often-quoted phrase, first drafts of history. Over the past five years, the world has witnessed several unimaginables about which I felt compelled to write. Some of the book's essays identify, analyze and connect parallels between the U.S. Antebellum and Civil War and the contemporary increasingly polarized context that reached an explosive peak during the 2020 elections and the violent attack on the U.S. Capitol on January 6, 2021. Shrouded in a cloud of unprecedented global pestilence, the world has witnessed dramatic political and geopolitical change, mostly for the worse: China, Russia, Hungary, Belarus, Myanmar, Cuba, even Puerto Rico. Essays in this book discuss these transformations from a historical perspective as well as mass popular resistance, in places like Cuba, where they seemed unimaginable. The book's final section, entitled Not Boring at all: Globalization and World Politics, explores the global ramifications of the COVID-19 Pandemic, geopolitical rearrangements related to China's meteoric ascendance as world power, Russia's militaristic expansionism and related topics--

The World Powers James Branstrom.2021-03-03 Geopolitics is the study of the effects of Earth's geography on politics and international relations. In one of the best books about geopolitics, now updated to include 2016 geopolitical developments, journalist examines Russia, China, the US, Latin America, the Middle East, Africa, Europe, Japan, Korea, and Greenland and the Arctic--their weather, seas, mountains, rivers, deserts, and borders--to provide a context often missing from our political reportage: how the physical characteristics of these countries affect their strengths and vulnerabilities and the decisions made by their leaders.

Female Identity in Contemporary Fictional Purgatorial Worlds Simon Bacon.2023-08-10 Examining fictional purgatorial worlds in contemporary literature, film and video games, this book examines the way in which the female characters trapped within them construct identity positions of resistance and change. With the rise of populism, the Alt. Right, and isolationism in world politics in the second decade of the 21st Century, parallel, purgatorial worlds seem to currently proliferate within popular culture across all media, including television shows and films such as *The Handmaid's Tale*, *Us*, *Watchmen*, and Margaret Atwood's *The Testaments* among many others. These texts depict alternate worlds that express the darkness and violence of our own, arguably none more so than for women. Featuring essays from a broad range of international contributors on topics as wide-ranging as mental health in the *Silent Hill* franchise and liminal spaces in the work of David Mitchell, this book is an original, timely and hope-filled analysis about overcoming the confines of a patriarchal, fundamentalist world where the female imaginative might just be the last, best hope.

Reinventing Eastern Europe: Imaginaries, Identities and Transformations Evinç Doğan.2019-01-22 This edited collection brings together a wide range of topics that shed light on the social, cultural, economic, political and spatio-temporal changes influencing post-socialist cities of Eastern Europe. Different case studies are presented through papers that were presented at the Euroacademia International Conference series. Imaginaries, identities and transformations represent three blocks for understanding the ways in which visual narratives, memory and identity, and processes of alterity shape the symbolic meanings articulated and inscribed upon post-socialist cities. As such, this book stimulates a debate in order to provide alternative views on the dynamics, persistence and change broadly shaping mental mappings of Eastern Europe. The volume offers an opportunity for scholars, activists and practitioners to identify, discuss, and debate the multiple dimensions in which specific narratives of alterity making towards Eastern Europe preserve their salience today in re-furbished and re-fashioned manners.

Mafalda Isabella Cosse.2019-12-23 Since its creation in 1964, readers from all over the world have loved the comic

Mafalda, primarily because of the sharp wit and rebellious nature of its title character—a four-year-old girl who is wise beyond her years. Through Mafalda, Argentine cartoonist Joaquín Salvador Lavado explores complex questions about class identity, modernization, and state violence. In *Mafalda: A Social and Political History of Latin America's Global Comic*—first published in Argentina in 2014 and appearing here in English for the first time—Isabella Cosse analyzes the comic's vast appeal across multiple generations. From Mafalda breaking the fourth wall to speak directly to readers to express her opposition to the 1966 Argentine coup, to Spanish students' protest signs bearing her face, to the comic's cult status in Korea, Cosse provides insights into the cartoon's production, circulation, and incorporation into social and political conversations. Analyzing how Mafalda reflects generational conflicts, gender, modernization, the Cold War, authoritarianism, neoliberalism, and much more, Cosse demonstrates the unexpected power of humor to shape revolution and resistance.

Our Social World Jeanne H. Ballantine, Keith A. Roberts, Kathleen Odell Korgen. 2019-01-02 The authors are proud sponsors of the 2020 SAGE Keith Roberts Teaching Innovations Award—enabling graduate students and early career faculty to attend the annual ASA pre-conference teaching and learning workshop. *Our Social World: Introduction to Sociology* inspires students to develop their sociological imaginations, to see the world and personal events from a new perspective, and to confront sociological issues on a day-to-day basis. Organized around the Social World model, a conceptual framework that demonstrates the relationships among individuals (the micro level); organizations, institutions, and subcultures (the meso level); and societies and global structures (the macro level), the authors use this framework to help students develop the practice of using three levels of analysis, and to view sociology as an integrated whole, rather than a set of discrete subjects. The Seventh Edition includes new coverage of climate change, the influence of robots and artificial intelligence on workers, race relations in the Trump era, transgender identity and gender fluidity, sexual harassment in the workplace and the #MeToo movement, declining marriage rates, the impact of tracking for students at all academic achievement levels, smoking as an example of health and inequality in the U.S., gun violence and the student movement to control access to guns, social media, and Russian interference in the 2016 election. The Church in the Face of Crises and Challenges over the Centuries Marcin Nabożny, Marcin Wysocki. 2023-06-12 Challenges, crises and difficult experiences are an integral part of our lives and an inherent element of every human being's existence, in addition to being ingrained in the functioning of organisations, institutions and nations. On many occasions humankind has failed to confront them, resulting in the real dramas that we witness on the pages of history. Fortunately, challenges, crises and difficult situations have often been lessons, from which appropriate conclusions have been drawn, thanks to which it was possible to create a better future. In the history of the Church from its very beginning, challenges have been an integral part of working towards a better tomorrow, a better version of oneself and the reality around us and the Church herself. Paradoxically, what was intended to weaken or even destroy the faith became an impulse for its spread. Crisis became the cause of consolidation and development. And so, over the centuries, the Church has faced crises caused by schisms, divisions, unsuitable people in ecclesiastical offices, as well as challenges posed by the surrounding world, political systems and conflicts of human origin. Owing to this publication, the reader will be able to learn about various types of crises and challenges in order to draw conclusions from them, to appreciate the history of the Church through a better knowledge thereof, and all this in order to create a better future. The subject of the book concerns crises and challenges during various periods in the history of the Church up until modern times, including the crisis caused by the Second World War or communism in Central and Eastern Europe.

Theological Ethics Through a Multispecies Lens Celia E. Deane-Drummond. 2019-10-17 There are two driving questions informing this book. The first is where does our moral life come from? It presupposes that considering morality broadly is inadequate. Instead, different aspects need to be teased apart. It is not sufficient to assume that different virtues are bolted onto a vicious animality, red in tooth and claw. Nature and culture have interlaced histories. By weaving in evolutionary theories and debates on the evolution of compassion, justice and wisdom, it shows a richer account of who we are as moral agents. The second driving question concerns our relationships with animals. Deane-Drummond argues for a complex

community-based multispecies approach. Hence, rather than extending rights, a more radical approach is a holistic multispecies framework for moral action. This need not weaken individual responsibility. She intends not to develop a manual of practice, but rather to build towards an alternative philosophically informed approach to theological ethics, including animal ethics. The theological thread weaving through this account is wisdom. Wisdom has many different levels, and in the broadest sense is connected with the flow of life understood in its interconnectedness and sociality. It is profoundly theological and practical. In naming the project the evolution of wisdom Deane-Drummond makes a statement about where wisdom may have come from and its future orientation. But justice, compassion and conscience are not far behind, especially in so far as they are relevant to both individual decision-making and institutions.

The World Turned Upside Down? Gregory Albo,Leo Panitch.2018

The Urban Condition: Literary Trajectories through Canada's Postmetropolis Eva Darias-Beautell.2019-06-04 Examining the centrality of the city in Canadian literary production post-1960, this collection of critical essays presents an interdisciplinary representation of the urban from a variety of backgrounds and perspectives. By analysing contemporary Canadian literature (in English), the contributors intend to produce not only an alternative picture of the national literary traditions but also fresh articulations of the relationship between (Canadian) identity, citizenship, and nation. Since the 1960s, metropolitan regions across the world have experienced radical transformation. For critical urban studies scholars, this phenomenon has been described as a 'restructuring'. This study argues that in Canada this 'restructuring' has been accompanied by a literary rearrangement of its canon, consisting of a gradual shift of focus from the wild or rural to the urban. Alluding to the changes within contemporary Canadian cities, the term 'postmetropolis' locates the contributors' shared theoretical framework within a critical postmodern paradigm. Centered on a particular selection of poetic or fictional texts, each essay pushes the theoretical framework further, suggesting the need for new tools of interpretation and analysis. This book presents an urban literary portrait of Canada that is both thematically and conceptually coherent. Using a range of interdisciplinary methodologies, it adeptly navigates a range of urban issues such as surveillance, asylum, diaspora, mobility, the queer, and the post-political. This book will be of interest to those studying or working on Canadian literature, both in Canada and internationally, as well as to those scholars engaged in investigations that intersect literature and urban studies.

Tamil Nationalism in Sri Lanka A.R. Sriskanda Rajah.2022-10-31 This book examines Tamil nationalism in Sri Lanka and provides insights on how Tamil nationalism has survived the destruction of the Tamil Tigers after May 2009 and continues to thrive, despite the absence of a charismatic leadership to lead it or a centralised organisation to mobilise the Tamils along ethnic nationalistic lines. The ethnic nationalist ideology shaped up by the Tamil Tigers continues to remain the driving force of the Tamil polity in Sri Lanka and the Diaspora. Using a Foucauldian counter-historical theoretical framework, the author

analyses and offers answers to these questions: What is keeping Tamil nationalism alive despite the demise of the Tamil Tigers over a decade ago? Why do many Tamils in Sri Lanka and abroad refuse to accept a Sri Lankan political identity? How are Tamils able to continue on a nationalist path despite the absence of a unified political leadership? The book argues that Tamil nationalism has survived the latter's destruction because it has become counter-historical. It is this that has allowed, despite the internecine rivalries between Tamil political parties and Diaspora groups, the Tamil nationalist spirit to remain alive. The author also suggests that counter-history has, for many Tamil political parties and Diaspora groups, become the means of waging war, other than through an armed struggle, against the Sri Lankan state. Based on field research, interviews and documentary analysis, the book provides empirical and unique insights on Foucault's thesis that power is multifaceted and can function in the absence of centralised mechanisms. This book will be of interest to researchers in the fields of Politics and International Relations, in particular those working on ethnic nationalism, post-armed conflict peacebuilding/conflict resolution, the politics in Sri Lanka, diaspora politics and Foucault.

The Mythical Mediterranean Sea Nick Ceramella, Umberto Gori. 2019-04-25 This volume brings together papers presented at the 7th Annual International Conference co-organised by Florence University of the Arts, Italy, and Stony Brook University (SUNY), USA. The contributors explored the many connections that define the Mediterranean Sea as a symbol of tradition and modernity, and examined it as a region capable of congregating, synergizing and transforming cultures. Their writings focus on the relationship between the cultural, social, and historical environment of Mare Nostrum to pinpoint the elements defining its identity. Hence, particular emphasis is placed on the role and relevance of the Mediterranean as the first beacon of multi-ethnicity which may be seen as a symbol of diversity and unity, as well as a model that holds clues to understanding the global merging of cultures. As such, it is a real shame to see that the general interest in this unique and fascinating area has arisen not thanks to such highly positive features, but because, as Pope Francis says, it has become an open-air cemetery where thousands of people keep drowning. The multifaceted approach to this topic has resulted in the book being divided into four sections, covering the following thematic areas: Literature, History, Culture, and Identity.
