FUNDAMENTALS OF REINFORCED CONCRETE DESIGN M. L. GAMBHIR.2006-10-07 Designed primarily as a text for undergraduate students of Civil Engineering for their first course on Limit State Design of Reinforced Concrete, this compact and well-organized text covers all the fundamental concepts in a highly readable style. The text conforms to the provision of the latest revision of Indian Code of Practice for Plain and Reinforced Concrete, IS : 456 (2000). First six chapters deal with fundamentals of limit states design of reinforced concrete. The objective of last two chapters (including design aids in appendix) is to initiate the readers in practical design of concrete structures. The text gives detailed discussion of basic concepts, behaviour of the various structural components under loads, and development of fundamental expressions for analysis and design. It also presents efficient and systematic procedures for solving design problems. In addition to the discussion of basis for design calculations, a large number of worked-out practical design examples based on the current design practices have been included to illustrate the basic principles of reinforced concrete design. Besides students, practising engineers would find this text extremely useful.

Indiamodern - Mini Edition Herbert J.M. Ypma.2000-04-18 This mini paperback presents a photographic compilation of modern Indian craft, design and architecture, placed in the context of Indian history and traditions. It looks at the roots and themes of Indian craft and design from village society to Moghul palaces, and shows how these traditional forms are repeated in all the contemporary arts. Herbert Ypma, together with a team of photographers, travelled across India to bring together an array of images of buildings, textiles and ceramics. Together with text, these images provide an insight into the emergence of an aesthetic that truly combines the old with the new.

Design in the Era of Industry 4.0, Volume 1 Amaresh Chakrabarti, Vishal Singh. 2023-07-25 This book showcases cutting-edge research papers from the 9th International Conference on Research into Design (ICoRD 2023) – the largest in India in this area – written by eminent researchers from across the world on design processes, technologies, methods and tools, and their impact on innovation, for supporting design for a connected world. The theme of ICoRD’23 has been ‘Design in the Era of Industry 4.0’. Industry 4.0 signifies the fourth industrial revolution. The first industrial revolution was driven by the introduction of mechanical power such as steam and water engines to replace human and animal labour. The second industrial revolution involved introduction of electrical power and organised labour. The third industrial revolution was powered by introduction of industrial automation. The fourth industrial revolution involves introduction of a combination of

technologies to enable connected intelligence and industrial autonomy. The introduction of Industry 4.0 dramatically changes the landscape of innovation, and the way design, the engine of innovation, is carried out. The theme of ICoRD'23 - 'Design in the Era of Industry 4.0' -explores how Industry 4.0 concepts and technologies influence the way design is conducted, and how methods, tools, and approaches for supporting design can take advantage of this transformational change that is sweeping across the world. The book is of interest to researchers, professionals, and entrepreneurs working in the areas on industrial design, manufacturing, consumer goods, and industrial management who are interested in the new and emerging methods and tools for design of new products, systems, and services.

Beyond Regimes Duara Prasenjit, Elizabeth J. Perry. 2020-10-26 For many years, China and India have been powerfully shaped by both transnational and subnational circulatory forces. This edited volume explores these local and global influences as they play out in the contemporary era. The analysis focuses on four intersecting topics: labor relations; legal reform and rights protest; public goods provision; and transnational migration and investment. The eight substantive chapters and introduction share a common perspective in arguing that distinctions in regime type (“democracy” versus “dictatorship”) alone offer little insight into critical differences and similarities between these Asian giants in terms of either policies or performance. A wide variety of subnational and transnational actors, from municipal governments to international organizations, and from local NGO activists to a far-flung diaspora, have been—and will continue to be—decisive. The authors approach China and India through a strategy of “convergent comparison,” in which they investigate temporal and spatial parallels at various critical junctures, at various levels of the political system, and both inside and outside the territorial

confines of the nation-state. The intensified globalization of recent decades only heightens the need to view state initiatives against such a wider canvas.

Bombay Brokers Lisa Björkman.2021-04-05 A political party worker who produces crowds for electoral rallies. A “prison specialist” who serves other people’s prison sentences in exchange for a large fee. An engineer who is able to secure otherwise impossible building permits. These and other dealmakers—whose behind-the-scenes expertise and labor are often invisible—have an intrinsic role in the city's functioning and can be indispensable for navigating everyday life in Bombay, one of the world’s most complex, dynamic, and populous cities. *Bombay Brokers* collects profiles of thirty-six such “brokers.” Written by anthropologists, artists, city planners, and activists, these character sketches bring into relief the paradox that

these brokers' knowledge and labor are simultaneously invisible yet essential for Bombay's functioning. Their centrality reveals the global-scale paradoxes and gaps that these brokers mediate and bridge. In this way, Bombay Brokers prompts a reconsideration of what counts as legitimate and valuable knowledge and labor while offering insight into changing structures of power in Bombay and around the globe. Sir Herbert Baker John Stewart.2021-11-04 This is the first full biography from childhood of the eminent British Architect Sir Herbert Baker. Written with the full cooperation of his family and with access to his archive and private papers, it gives an account of his remarkable life as the leading architect to the British Empire. From London, through the commemoration of the empire's war dead in France, via South Africa and Australia to India, he celebrated the might of an empire that once ruled a quarter of the world. He was an intimate friend of many of most fascinating men of his age, including Cecil Rhodes, Lawrence of Arabia, John Buchan, Jan Smuts and, of course, his fellow architect Sir Edwin Lutyens. After a Victorian architectural apprenticeship in London and on to becoming the most prolific architect of his age in South Africa, he built the new imperial capital of New Delhi in India with Lutyens, before returning to London. These built or rebuilt such landmark buildings as the Bank of England, South Africa House, India House, Rhodes House, and the stands for Lords Cricket Ground, as well as numerous churches and private houses.
