Davisville and the Seabees Walter K. Schroder, Gloria A. Emma, 1999 The U.S. Naval Construction Battalion Center at Davisville, Rhode Island, is first remembered as the original Home of the Atlantic Seabees. During World War II, 100 battalions as well as dozens of other U.S. Navy Builder-Fighter units were formed, outfitted, trained, and prepared for overseas deployment. Here, in the first photographic history of the base, is the story of the men and women who came to Davisville and their legacy of superb accomplishments in the service of their country. Established on February 27, 1942, the base was designated to manufacture and ship overseas materials and equipment and to outfit and embark construction battalions and other naval units. Between 1942 and 1994, when the base was closed, the Seabees participated in every war involving the United States. The Quonset Hut and the Davisville Pontoons were both developed at the Davisville Seabee

Center. The base has schooled and trained thousands of officers and tens of thousands of Seabees.

A Sailor's History of the U.S. Navy Thomas J Cutler,2005-01-15 Today's sailors have too little appreciation of their heritage. To counter this problem, Thomas J. Cutler has compiled a history of our naval heritage in the form of A Sailor's History of the U.S. Navy. The work is unique in two important ways. First, it is written thematically rather than chronologically. This allows recent history to be blended with more distant (but important) events in ways that will reinforce the timelessness as well as the timeliness of the U.S. Navy, thereby having a greater appeal to today's sailor. There are a number of themes being used—the most obvious are manifested in chapters with the themes of honor, courage, and commitment, but others serve as useful vehicles as well; for example, there is a chapter called What's in a Name? that briefly discusses how ships have been/are named and then uses the many ships that have carried the name Enterprise as the theme for presenting significant portions of the Navy's history. The other unique characteristic of this history is that it focuses wherever possible on the roles of ALL sailors rather than just the officers. That is not to say that Jones and Decatur are not there, but that the emphasis is along the lines of the crew of the Bon Homme Richard fought on into the night... rather than Jones fought... Also, there are plenty of individual sailor heroes who can stand alongside the Perrys and the Farraguts (Boatswain's Mate First Class Williams who won the Medal of Honor in Vietnam, Dorie Miller of Pearl Harbor fame, Gunner's Mate Third Class Paul Henry Carr at the battle off Samar, etc.). Some emphasis upon what it was like to be a sailor (working and living conditions) at different times is included as well.

The Seabees at Port Hueneme Gina Nichols,2006 In 1942, the navy sought a location for an advance base on the West Coast to ship construction materiel, equipment, and men into World War II's Pacific theater. Port Hueneme's deepwater harbor, rail system, and rural setting made it the ideal site from which to send 20 million measurement tons of war materiel and a quarter of a million men onto island specks that later became headlines: Guadalcanal, Tarawa, Iwo Jima, Okinawa, and the Philippines. Seabees later deployed from Port Hueneme to serve in the Korean, Vietnam, Desert Shield/Desert Storm, and Iraqi conflicts, as well as in peacetime, for more than 60 years. Charged with building air bases, ports, combat camps, hospitals, and other support facilities as part of military and humanitarian efforts around the world, the Seabees remain at home in Port Hueneme.

Blueprint Reading and Sketching - Navedtra 14040a U. S. Navy,2018-07-22 Blueprints (prints) are copies of mechanical or other types of technical drawings. The term blueprint reading means interpreting ideas expressed by others on drawings, whether or not the drawings are actually blueprints. Drawing or sketching is the universal language used by engineers, technicians, and skilled craftsmen. Drawings need to convey all the necessary information to the person who will make or assemble the object in the drawing. Blueprints show the construction details of parts, machines, ships, aircraft, buildings, bridges, roads, and so forth.
