Minds Made for Stories Thomas Newkirk, 2014 In this highly readable and provocative book, Thomas Newkirk explodes the long standing habit of opposing abstract argument with telling stories. Newkirk convincingly shows that effective argument is already a kind of narrative and is deeply entwined with narrative. --Gerald Graff, former MLA President and author of *Clueless in Academe* Narrative is regularly considered a type of writing-often an easy one, appropriate for early grades but giving way to argument and analysis in later grades. This groundbreaking book challenges all that. It invites readers to imagine narrative as something more-as the primary way we understand our world and ourselves. To deny the centrality of narrative is to deny our own nature, Newkirk explains. We seek companionship of a narrator who maintains our attention, and perhaps affection. We are not made for objectivity and pure abstraction-for timelessness. We have 'literary minds that respond to plot, character, and details in all kind of writing. As humans, we must tell stories. When we are engaged readers, we are following a story constructed by the author, regardless of the type of writing. To sustain a reading- in a novel, an opinion essay, or a research article- we need a plot that helps us comprehend specific information, or experience the significance of an argument. As Robert Frost reminds us, all good memorable writing is dramatic. *Minds Made for Stories* is a needed corrective to the narrow and compartmentalized approaches often imposed on schools- approaches which are at odds with the way writing really works outside school walls.

Catching Fire Richard Wrangham,2010-08-06 In this stunningly original book, Richard Wrangham argues that it was cooking that caused the extraordinary transformation of our ancestors from apelike beings to Homo erectus. At the heart of Catching Fire lies an explosive new idea: the habit of eating cooked rather than raw food permitted the digestive tract to shrink and the human brain to grow, helped structure human society, and created the male-female division of labour. As our ancestors adapted to using fire, humans emerged as the cooking apes. Covering everything from food-labelling and overweight pets to raw-food faddists, Catching Fire offers a startlingly original argument about how we came to be the social, intelligent, and sexual species we are today. This notion is surprising, fresh and, in the hands of Richard Wrangham, utterly persuasive ... Big, new ideas do not come along often in evolution these days, but this is one. -Matt Ridley, author of Genome

The Story Grid Shawn Coyne,2015-05-02 WHAT IS THE STORY GRID? The Story Grid is a tool developed by editor Shawn Coyne to analyze stories and provide helpful editorial comments. It's like a CT Scan that takes a photo of the global story and tells the editor or writer what is working, what is not, and what must be done to make what works better and fix what's not. The Story Grid breaks down the component parts of stories to identify the problems. And finding the problems in a story is almost as difficult as the writing of the story itself (maybe even more difficult). The Story Grid is a tool with many applications: 1. It will tell a writer if a Story ?works? or ?doesn't work. 2. It pinpoints story problems but does not emotionally

abuse the writer, revealing exactly where a Story (not the person creating the Story/the Story) has failed. 3. It will tell the writer the specific work necessary to fix that Story's problems. 4. It is a tool to re-envision and resuscitate a seemingly irredeemable pile of paper stuck in an attic drawer. 5. It is a tool that can inspire an original creation.

The New Digital Storytelling Bryan Alexander,2017-07-20 Newly revised and updated, this is the essential guide to state-of-the-art digital storytelling for audiences, creators, and teachers. Written for everyone interested in the communication potential of digital media, including educators, marketers, communication professionals, and community activists, this is the ultimate guide to harnessing technology for storytelling. No other book covers the digital storytelling movement as thoroughly as this updated second edition of a popular work, nor does any incorporate as many technologies, from video to augmented reality, mobile devices to virtual reality. The book combines history, analysis, and practical guidance about digital storytelling. It begins with a history that encompasses an exploration of storytelling itself, as well as a description of narratives using digital tools from the 1980s through 2000. From there, the author dives into modern digital storytelling, offering analysis and guidance regarding the use of digital video, podcasting, social media, gaming, mobile devices, and virtual and augmented reality. The work concludes with practical advice about how to create and share digital stories using the most current tools so even the new would-be storyteller can create their first digital narrative. Of course, the second edition is updated to take into account the many ways the field has advanced since the original book appeared. With many new examples of digital stories, this edition's evidence base is current and fresh. New or transformed technologies are also addressed, including virtual reality; mobile devices that have become mainstream tools for creating, sharing, and experiencing digital stories; and the wide variety of new storytelling apps and services.

Resistance and Persuasion Eric S. Knowles,Jay A. Linn,2004-02-26 Resistance and Persuasion is the first book to analyze the nature of resistance and demonstrate how it can be reduced, overcome, or used to promote persuasion. By examining resistance, and providing strategies for overcoming it, this new book generates insight into new facets of influence and persuasion. With contributions from the leaders in the field, this book presents original ideas and research that demonstrate how understanding resistance can improve persuasion, compliance, and social influence. Many of the authors present their research for the first time. Four faces of resistance are identified: reactance, distrust, scrutiny, and inertia. The concluding chapter summarizes the book's theoretical contributions and establishes a resistance-based research agenda for persuasion and attitude change. This new book helps to establish resistance as a legitimate sub-field of persuasion that is equal in force

to influence. Resistance and Persuasion offers many new revelations about persuasion: *Acknowledging resistance helps to reduce it. *Raising reactance makes a strong message more persuasive. *Putting arguments into a narrative increases their influence. *Identifying illegitimate sources of information strengthens the influence of legitimate sources. *Looking ahead reduces resistance to persuasive attempts. This volume will appeal to researchers and students from a variety of disciplines including social, cognitive, and health psychology, communication, marketing, political science, journalism, and education.

[by] the biggest talents on the essay and blog beat.” —Publishers Weekly (on Vol. 2) Anyone still asking, “What is creative nonfiction?” will find the answer in this collection of artfully crafted, true stories. Selected by Lee Gutkind, the “godfather behind creative nonfiction,” and the staff of Creative Nonfiction, these stories—ranging from immersion journalism to intensely personal essays—illustrate the genre’s power and potential. Edwidge Danticat recalls her Uncle Moise’s love of a certain four-letter word and finds in his abandonment of the word near the end of his life the true meaning of exile. And Sean Rowe explains why, if you must get arrested, Selma, Alabama, is the place to do it. This exciting and expansive array of works and voices is sure to impress and delight.
