From Song to Book Sylvia Huot.2019-05-15 As the visual representation of an essentially oral text, Sylvia Huot points out, the medieval illuminated manuscript has a theatrical, performative quality. She perceives the tension between implied oral performance and real visual artifact as a fundamental aspect of thirteenth- and fourteenth-century poetics. In this generously illustrated volume, Huot examines manuscript texts both from the performance-oriented lyric tradition of *chanson courtoise*, or courtly love lyric, and from the self-consciously literary tradition of Old French narrative poetry. She demonstrates that the evolution of the lyrical romance and *dit*, narrative poems which incorporate thematic and rhetorical elements of the lyric, was responsible for a progressive redefinition of lyric poetry as a written medium and the emergence of an explicitly written literary tradition uniting lyric and narrative poetics. Huot first investigates the nature of the vernacular book in the thirteenth and fourteenth centuries, analyzing organization, page layout, rubrication, and illumination in a series of manuscripts. She then describes the relationship between poetics and manuscript format in specific texts, including works by widely read medieval authors such as Guillaume de Lorris, Jean de Meun, and Guillaume de Machaut, as well as by lesser-known writers including Nicole de Margival and Watriquet de Couvin. Huot focuses on the writers' characteristic modifications of lyric poetics; their use of writing and performance as theme; their treatment of the poet as singer or writer; and of the lady as implied reader or listener; and the ways in which these features of the text were elaborated by scribes and illuminators. Her readings reveal how medieval poets and book-makers conceived their common project, and how they distinguished their respective roles.

Approaches to the Medieval Self Stefka G. Eriksen,Karen Langsholt Holmqvist,Bjørn Bandlien.2020-09-21 The main aim of this book is to discuss various modes of studying and defining the medieval self, based on a wide span of sources from

medieval Western Scandinavia, c. 800-1500, such as archeological evidence, architecture and art, documents, literature, and runic inscriptions. The book engages with major theoretical discussions within the humanities and social sciences, such as cultural theory, practice theory, and cognitive theory. The authors investigate how the various approaches to the self influence our own scholarly mindsets and horizons, and how they condition what aspects of the medieval self are 'visible' to us. Utilizing this insight, we aim to propose a more syncretic approach towards the medieval self, not in order to substitute excellent models already in existence, but in order to foreground the flexibility and the complementarity of the current theories, when these are seen in relationship to each other. The self and how it relates to its surrounding world and history is a main concern of humanities and social sciences. Focusing on the theoretical and methodological flexibility when approaching the medieval self has the potential to raise our awareness of our own position and agency in various social spaces today.

Checking for Understanding Douglas Fisher, Nancy Frey. 2015-12-18 A teacher presents a lesson, and at the end asks students if they understand the material. The students nod and say they get it. Later, the teacher is dismayed when many of the students fail a test on the material. Why aren't students getting it? And, just as important, why didn't the teacher recognize the problem? In *Checking for Understanding*, Douglas Fisher and Nancy Frey show how to increase students' understanding with the help of creative formative assessments. When used regularly, formative assessments enable every teacher to determine what students know and what they still need to learn. Fisher and Frey explore a variety of engaging activities that check for and increase understanding, including interactive writing, portfolios, multimedia presentations, audience response systems, and much more. This new 2nd edition of *Checking for Understanding* has been updated to reflect the latest thinking in formative assessment and to show how the concepts apply in the context of Fisher and Frey's work on gradual release of responsibility, guided instruction, formative assessment systems, data analysis, and quality instruction. Douglas Fisher and Nancy Frey are the creators of the Framework for Intentional and Targeted (FIT) Teaching™. They are also the authors of numerous ASCD books, including *The Formative Assessment Action Plan: Practical Steps to More Successful Teaching and Learning* and the best-selling *Enhancing RTI: How to Ensure Success with Effective Classroom Instruction and Intervention*.

Drawing Futures Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen. 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Life in a Medieval Castle Jane Shuter. 2005 Throughout history people have fought each other. So people used to make their towns and villages safer by building fences or ditches around them. Starting in about 850, during the medieval period, people in Europe built castles, or defended homes just for a lord and his household. The lord, his family, and his servants and soldiers all lived there. All the land and castles belonged to the king, but the lord could live in the castle as long as he was loyal to the king.

The Ballad of the Lone Medievalist Kisha G. Tracy, John P. Sexton. 2018 Working medievalists are often the only scholar of

the Middle Ages in a department, a university, or a hundred-mile radius. While working to build a body of focused scholarly work, the lone medievalist is expected to be a generalist in the classroom and a contributing member of a campus community that rarely offers disciplinary community in return. As a result, overtasked and single medievalists often find it challenging to advocate for their work and field. As other responsibilities and expectations crowd in, we come to feel disconnected from the projects and subjects that sustain our intellectual passion. An insidious isolation even from one another creeps in, and soon, even attending a conference of fellow medievalists can become a lonely experience. Surrounded by scholars with greater institutional support, lower teaching loads, or more robust research agendas, we may feel alienated from our work - the work to which we've dedicated our careers. *The Lone Medievalist* (the collaborative community and the book) is intended as an antidote to the problem of professional isolation. It is offered in the spirit of common weal that marks the ideals (if not always the realities) of so many of the communities we study - agricultural, professional, national, notional, and of course, monastic. *The Ballad of the Lone Medievalist* isn't only about scholarship, or teaching, or institutional life, or the pursuit of new learning - it's about all of them. The essays in this volume address all aspects of the professional and intellectual life of medievalists. Though many of us acknowledge and address the challenges in being Lone Medievalists, these essays are not intended as voces clamantium; they are offered to provide strategies, camaraderie, and an occasional bit of inspiration. They are a call to action, a sharing of hard-won wisdom, and a helping hand - and, above all, a reminder that we are not alone.

Life in a Medieval Castle Joseph Gies, Frances Gies. 2010-08-03 From acclaimed historians Frances and Joseph Gies comes the reissue of this definitive classic on medieval castles, which was a source for George R.R. Martin's *Game of Thrones* series. "Castles are crumbly and romantic. They still hint at an age more colorful and gallant than our own, but are often debunked by boring people who like to run on about drafts and grumble that the latrines did not work. Joseph and Frances Gies offer a book that helps set the record straight—and keeps the romance too."—*Time* A widely respected academic work and a source for George R.R. Martin's *Game of Thrones*, Joseph and Frances Gies's bestselling *Life in a Medieval Castle* remains a timeless work of popular medieval scholarship. Focusing on Chepstow, an English castle that survived the turbulent Middle Ages with a relative lack of violence, the book offers an exquisite portrait of what day-to-day life was actually like during the era, and of the key role the castle played. The Gieses take us through the full cycle of a medieval year, dictated by the rhythms of the harvest. We learn what lords and serfs alike would have worn, eaten, and done for leisure, and of the outside threats the castle always hoped to keep at bay. For medieval buffs and anyone who wants to learn more about this fascinating era, *Life in a Medieval Castle* is as timely today as when it was first published.

The Cambridge History of Medieval Music Mark Everist,Thomas Forrest Kelly.2018-08-09 Spanning a millennium of musical history, this monumental volume brings together nearly forty leading authorities to survey the music of Western Europe in the Middle Ages. All of the major aspects of medieval music are considered, making use of the latest research and thinking to discuss everything from the earliest genres of chant, through the music of the liturgy, to the riches of the vernacular song of the *trouvères* and *troubadours*. Alongside this account of the core repertory of monophony, *The Cambridge History of Medieval Music* tells the story of the birth of polyphonic music, and studies the genres of organum, conductus, motet and polyphonic song. Key composers of the period are introduced, such as Leoninus, Perotinus, Adam de la Halle, Philippe de Vitry and Guillaume de Machaut, and other chapters examine topics ranging from musical theory and performance to institutions, culture and collections.

Chivalry and Violence in Medieval Europe Richard W. Kaeuper.2001 Medieval Europe was a rapidly developing society with a problem of violent disorder. Professor Kaeuper's original and authoritative study reveals that chivalry was just as much a part of this problem as it was its solution. Chivalry praised heroic violence by knights, and fused such display of prowess with honour, piety, high-status, and attractiveness to women. Though the vast body of chivalric literature praised chivalry as necessary to civilization, most texts also worried over knightly violence, criticized the ideals and practices of chivalry, and often proposed reforms. The knights themselves joined the debate, absorbing some reforms, ignoring others, sometimes proposing their own. The interaction of chivalry with major governing institutions (church and state) emerging at

that time was similarly complex: kings and clerics both needed and feared the force of the knighthood. This fascinating book lays bare these conflicts and paradoxes which surrounded the concept of chivalry in medieval Europe.

The Idea of the Castle in Medieval England Abigail Wheatley. 2004 Medieval castles have traditionally been explained as feats of military engineering and tools of feudal control, but Abigail Wheatley takes a different approach, looking at a range of sources usually neglected in castle studies. Evidence from contemporary literature and art reveals the castle's place at the heart of medieval culture, as an architecture of ideas every bit as sophisticated as the church architecture of the period. This study offers a genuinely fresh perspective. Most castle scholars confine themselves to historical documents, but Wheatley examines literary and artistic evidence for its influence on and response to contemporary castle architecture. Sermons, seals and ivory caskets, local legends and Roman ruins all have their part to play. What emerges is a fascinating web of cultural resonances: the castle is implicated in every aspect of medieval consciousness, from private religious contemplation to the creation of national mythologies. This book makes a compelling case for a new, interdisciplinary approach to castle studies. ABIGAIL WHEATLEY studied for her PhD at York University's Centre for Medieval Studies.

The Individual and Society in the Middle Ages Walter Ullmann. 2019-12-01 Originally published in 1966. *The Individual and Society in the Middle Ages*, based on three guest lectures given at Johns Hopkins University in 1965, explores the place of the individual in medieval European society. Looking at legal sources and political ideology of the era, Ullmann concludes that, for most of the Middle Ages, the individual was defined as a subject rather than a citizen, but the modern concept of citizenship gradually supplanted the subject model from the late Middle Ages onward. Ullmann lays out the theological basis of the political theory that cast the medieval individual as an inferior, abstract subject. The individual citizen who emerged during the late Middle Ages and the Renaissance, by contrast, was an autonomous participant in affairs of state. Several intellectual trends made this humanistic conception of the individual possible, among them the rehabilitation of vernacular writing during the thirteenth century and the growing interest in nature, natural philosophy, and natural law. However, Ullmann points to feudalism as the single most important medieval institution that laid the groundwork for the emergence of the modern citizen.
