*Lordships of Southern Italy* Sandro Carocci.2018 What was the real nature of medieval lordship in southern Italy? What can this region and its history bring to the great European debates on feudalism and aristocratic powers, their structures and evolution, and their social and economic impact? What contribution can the Kingdom of Sicily make to studies of the relationships between sovereigns, nobilities and peasant societies? And can the study of seigneurial powers and rural societies reshape the old arguments regarding the economic backwardness of the Mezzogiorno (the South of Italy) and the central role of its monarchy? This book offers the first systematic analysis of lordship in southern Italy in the twelfth and thirteenth centuries, under the Norman, Staufen and early Angevin kings. It offers new interpretations of the powers of the nobility, and of rural societies and royal policy. It reveals the complexity of interactions between the king, nobles and peasants, and how they occurred and were expressed through laws and violence, feudal relations and economic investments, debates on freedom and serfdom, and the exploitation of people and natural resources. In these interactions a leading role is played by peasant societies - with previously unsuspected levels of dynamism - to set against that of the kings, who were determined to curb aristocratic powers, and of the nobles who were obliged to adapt their lordship in response to powerful rural societies and crown policies. What emerges is a hitherto unseen Mezzogiorno, vital and complex, whose study allows a deeper understanding not only of the affairs of the South but of many other regions of Europe.

**The Impact and Legacy of Educational Sloyd** David J. Whittaker.2013-09-11 Originating in Finland in eighteen-sixty-five, Educational Sloyd used handicrafts practised in schools to promote educational completeness through the interdependence of the mind and body. These radical ideas spread throughout Europe and America and had a significant impact on the early development of manual training, manual arts, industrial education and technical education. Today it is generally acknowledged that Educational Sloyd laid the foundations of modern technological education. This book traces the development of Sloyd from its conception by Uno Cygnaeus and the first Sloyd school founded by Otto Salomon, to its enthusiastic take up in Scandinavia and beyond. It examines the debates and controversy which surround the Sloyd system, and considers the transition from 'hands-on' craft work to concepts of technology education. Finally, the investigation reveals

the lasting legacy of the ideas and practice of Sloyd education, and how it continues to influence technological education. Included in the book: - the foundations of Educational Sloyd - debates, controversy and rival factions - key case studies in Finland and Iceland - the lasting legacy of Sloyd education. This fascinating and comprehensive historical exploration will be of interest to scholars and researchers in the areas of technology education, comparative education and the history of education.

*The Architecture of European Codes and Contract Law* Stefan Grundmann, Martin Schauer. 2006-01-01 The nineteen outstanding contributors to this deeply insightful book concur in envisioning a fundamentally new systematic concept of contract law that, while preserving the essential and architecture of the existing European codes, would nonetheless find cogent ways to integrate such modern developments as mass transactions, chains and networks of contracts, regulation of markets and contracts to protect consumers, and service and long-term contracts into an optional European code. The

book is organised along three major avenues: and the systematic arrangement of a contract law code - how it deals with core questions of formation and performance or breach of contract, such as mistake and misrepresentation, standard contract terms, and remedies in the case of breach of contract; and the apparent necessity to merge consumer contract law (i.e. such issues as product safety and liability, warranties, and consumer debt and insolvency) with traditional core contract law concepts; and the importance to substantive contract law of the pre-contractual phase, in which information duties are becoming steadily more paramount. The authors perspectives cover a wide range of jurisdictions, including new EU Member States. The book and its commitment to an integration of comparative law, EC law, and the debate on European codification offers practitioners and academics fertile ground for the development of a new model of contract law that is more than a common denominator of what has been in force so far. This model may serve as a basis for Europe-wide and perhaps even worldwide discussion.

The State of the World's Biodiversity for Food and Agriculture Food and Agriculture Organization of the United Nations.2019-03-12 The State of the World's Biodiversity for Food and Agriculture presents the first global assessment of biodiversity for food and agriculture worldwide. Biodiversity for food and agriculture is the diversity of plants, animals and micro-organisms at genetic, species and ecosystem levels, present in and around crop, livestock, forest and aquatic production systems. It is essential to the structure, functions and processes of these systems, to livelihoods and food security, and to the supply of a wide range of ecosystem services. It has been managed or influenced by farmers, livestock keepers, forest dwellers, fish farmers and fisherfolk for hundreds of generations. Prepared through a participatory, country-driven process, the report draws on information from 91 country reports to provide a description of the roles and importance of biodiversity for food and agriculture, the drivers of change affecting it and its current status and trends. It describes the state of efforts to promote the sustainable use and conservation of biodiversity for food and agriculture, including through the development of supporting policies, legal frameworks, institutions and capacities. It concludes with a discussion of needs and challenges in the future management of biodiversity for food and agriculture. The report complements other global

assessments prepared under the auspices of the Commission on Genetic Resources for Food and Agriculture, which have focused on the state of genetic resources within particular sectors of food and agriculture.

**Exploring Textual Data** Ludovic Lebart,A. Salem,L. Berry.2013-04-17 Researchers in a number of disciplines deal with large text sets requiring both text management and text analysis. Faced with a large amount of textual data collected in marketing surveys, literary investigations, historical archives and documentary data bases, these researchers require assistance with organizing, describing and comparing texts. Exploring Textual Data demonstrates how exploratory multivariate statistical methods such as correspondence analysis and cluster analysis can be used to help investigate, assimilate and evaluate textual data. The main text does not contain any strictly mathematical demonstrations, making it accessible to a large audience. This book is very user-friendly with proofs abstracted in the appendices. Full definitions of concepts, implementations of procedures and rules for reading and interpreting results are fully explored. A succession of examples is intended to allow the reader to appreciate the variety of actual and potential applications and the complementary processing methods. A glossary of terms is provided.

**Migrancy, Culture, Identity** Iain Chambers.2008-02-20 In Migrancy, Culture, Identity, Iain Chambers unravels how our sense of place and identity is realised as we move through myriad languages, worlds and histories. The author explores the uncharted impact of cultural diversity on today's world, from the 'realistic' eye of the painter to the 'scientific' approach of the cultural anthropologist or the critical distance of the historian; from the computer screen to the Walkman and 'World Music'. Migrancy, Culture and Identity takes us on a journey into the disturbance and dislocation of culture and identity that faces all of us to explore how migration, marginality and homelessness have disrupted the West's faith in linear progress and rational thinking, undermining our knowledge, history and cultural identity.

*Questions of Taste* Barry C Smith.2013-02-05 Interest in and consumption of wine have grown exponentially in recent years and there has been a corresponding increase in consumers' knowledge of wine, which in turn has generated discussions about the meaning and value of wine in our lives and how renowned wine critics influence our subjective assessment of quality and shape public tastes. Wine first played a part in Western philosophy at the symposium of the early Greek philosophers where it enlivened and encouraged discussion. During the Enlightenment David Hume recommended drinking wine with friends as a cure for philosophical melancholy, while Immanuel Kant thought wine softened the harsher

sides of men's characters and made their company more convivial. In *Questions of Taste*, the first book in any language on the subject, philosophers such as Roger Scruton and wine professionals like Andrew Jefford, author of the award-winning book *The New France*, turn their attention to wine as an object of perception, assessment and appreciation. They and their fellow contributors examine the relationship between a wine's qualities and our knowledge of them; the links between the scientifically describable properties of wine and the conscious experience of the wine taster; what we base our judgements of quality on and whether they are subjective or objective; the distinction between the cognitive and sensory aspects of taste; whether wine appreciation is an aesthetic experience; the role language plays in describing and evaluating wines; the significance of their intoxicating effect on us; the meaning and value of drinking wine with others; whether disagreement leads to relativism about judgements of taste; and whether we can really share the pleasures of drinking. *Questions of Taste* will be of interest to all those fascinated by the production and consumption of wine and how it affects our minds in ways we might not hitherto have suspected.

Macroeconomics. Problems and Questions - Sixth Edition Giuseppe Ferraguto.2020-03-31T08:06:00+02:00 The manual includes about one hundred questions, most in multiple parts and drawn from several years of exams at Bocconi University, on the models (IS-LM, IS-LM-PC, etc.) and topics (the macroeconomic equilibrium of a closed economy, the labor market and unemployment, inflation, the open economy, government debt, economic growth) covered by most introductory courses on Macroeconomics. The main objective of the problems is to help readers grasp the economic reasoning and intuition underlying the main conclusions of the discipline - the aspect of Macroeconomics, and more in general of Economics, that students find the most difficult to master, but that will turn out to be the most useful in their future.

The Return of Curiosity Nicholas Thomas.2016-08-15 The Spy Museum, the Vacuum Cleaner Museum, the National Mustard Museum—not to mention the Art Institute, the Museum of Modern Art, and the Getty Center: museums have never been more robust, curating just about everything there is and assuming a new prominence in public life. The Return of Curiosity explores museums in the modern age, offering a fresh perspective on some of our most important cultural institutions and the vital function they serve as stewards of human and natural history. Reflecting on art galleries, science and history institutions, and collections all around the world, Nicholas Thomas argues that, in times marked by incredible insecurity and turbulence, museums help us sustain and enrich society. Moreover, they stimulate us to think in new ways about our world, compelling our curiosity and showing us the importance of understanding one another. Thomas looks at museums not simply as storehouses of old things but as the products of meaningful relationships between curators, the public, history, and culture. These relationships, he shows, don't always go smoothly, but they do always offer new insights into the many ways we value—and try to preserve—the world we live in. The result is a refreshing and hopeful look at museums as a cultural force, one that, by gathering together paintings, tropical birds, antiques, or even our own bodies, offers an illuminating reflection of who we are.

**Pasta** Silvano Serventi, Françoise Sabban.2002 Ranging from the imperial palaces of ancient China and the bakeries of fourteenth-century Genoa and Naples all the way to the restaurant kitchens of today, Pasta tells a story that will forever change the way you look at your next plate of vermicelli. Pasta has become a ubiquitous food, present in regional diets around the world and available in a host of shapes, sizes, textures, and tastes. Yet, although it has become a mass-produced commodity, it remains uniquely adaptable to innumerable recipes and individual creativity. Pasta: The Story of a Universal Food shows that this enormously popular food has resulted from of a lengthy process of cultural construction and widely diverse knowledge, skills, and techniques. Many myths are intertwined with the history of pasta, particularly the idea that

Marco Polo brought pasta back from China and introduced it to Europe. That story, concocted in the early twentieth century by the trade magazine Macaroni Journal, is just one of many fictions unmasked here. The true homelands of pasta have been China and Italy. Each gave rise to different but complementary culinary traditions that have spread throughout the world. From China has come pasta made with soft wheat flour, often served in broth with fresh vegetables, finely sliced meat, or chunks of fish or shellfish. Pastasciutta, the Italian style of pasta, is generally made with durum wheat semolina and presented in thick, tomato-based sauces. The history of these traditions, told here in fascinating detail, is interwoven with the legacies of expanding and contracting empires, the growth of mercantilist guilds and mass industrialization, and the rise of food as an art form. Whether you are interested in the origins of lasagna, the strange genesis of the Chinese pasta bing or the mystique of the most magnificent pasta of all, the timballo, this is the book for you. So dig in!

The Guiltless Hermann Broch.2000 Murder, lust, shame, hypocrisy, and suicide are at the center of *The Guiltless*, Hermann Broch's postwar novel about the disintegration of European society in the three decades preceding the Second World War. Broch's characters - an apathetic man who can barely remember his own name; a high-school teacher and his lover who return from the brink of a suicide pact to carry on a dishonest relationship; Zerline, a lady's maid who enslaves her mistresses, prostitutes the young country girl Melitta, and metes out her own justice against the empty wickedness of her betters - are trapped in their indifference, prisoners of a sort of wakeful somnolence. These men and women may mention the

imbecile Hitler, yet they prefer a nap or sexual encounter to any social action. Broch thought the kind of ethical perversity and political apathy exhibited by his characters paved the way for Nazism. He believed in the purifying power of writing and hoped that by revealing Germany's underlying guilt he could purge indifference from his own and future generations. In *The Guiltless*, Broch captures how apathy and ennui - very human failings - evolve into something dehumanizing and dangerous. -- Book Jacket.

*Tourism in Destination Communities* Shalini Singh, Dallen J. Timothy, Ross Kingston Dowling. 2003 Annotation. As a result of the ongoing growth in the tourism industry, many destinations around the world are undergoing transformations. New destinations are being 'discovered' in regions previously ignored, as people search for regions that are yet unspoiled by the ravages of mass tourism. At the same time, traditional destinations are experiencing rapid environmental, socio-cultural and economic modifications. These changes have the most effect on the destination community - the location where tourists spend their time and money, and influence development or degradation of the local environment. *Tourism in Destination Communities* describes both the positive and negative effects of tourism on the destination community. The chapters are divided into three sections which address the relationship between tourism and the destination community, the various impacts of tourism on the destination community and the challenges and opportunities for destination communities. Each chapter contains brief case studies and empirical examples.
