**Aerodynamics of Road Vehicles** Thomas Christian Schuetz,2015-12-30 The detailed presentation of fundamental aerodynamics principles that influence and improve vehicle design have made Aerodynamics of Road Vehicles the engineer's "source" for information. This fifth edition features updated and expanded information beyond that which was presented in previous releases. Completely new content covers lateral stability, safety and comfort, wind noise, high performance vehicles, helmets, engine cooling, and computational fluid dynamics. A proven, successful engineering design approach is presented that includes: • Fundamentals of fluid mechanics related to vehicle aerodynamics • Essential experimental results that are the ground rules of fluid mechanics • Design strategies for individual experimental results • General design solutions from combined experimental results The aerodynamics of passenger cars, commercial vehicles, motorcycles, sports cars, and race cars is dealt with in detail, inclusive of systems, testing techniques, measuring and numerical aerodynamics methods and simulations that significantly contribute to vehicle development. Aerodynamics of Road Vehicles is an excellent reference tool and an indispensable source for the industry's vehicle engineers, designers, and researchers, as well as for enthusiasts, students, and those working in academia or government regulatory agencies.

**TECHNICAL COMMITTEE GUIDEPOSTS** Executive Standards Committee,1979 A technical committee shall be responsible for a field of endeavor, as defined by its scope. In cases where projects overlap areas of interest of another council's committee, the originating committee shall submit the project(s) for review and approval to the other concerned committee and its council prior to issuance. A committee is established when a new major project area is to be undertaken and no existing committee is available. A committee is discharged when the assigned work is completed and there is no further need for its services. The councils retain responsibility for periodic review of technical reports developed by their disbanded committees.

**Acoustical Materials** Pranab Saha,2021-08-11 What is acoustics? What is noise? How is sound measured? How can the vehicle noise be reduced using sound package treatments? Pranab Saha answers these and more in Acoustical Materials. Acoustics is the science of sound, including its generation, propagation, and effect. Although the propulsion sources of internal combustion engine (ICE) vehicles and electric motor-powered vehicles (EV) are different and therefore their

propulsion noises are different, both types of vehicles have shared noise concerns: Tire and road noise Wind noise Vehicle noise and vibration issues have been there almost from the inception of vehicle manufacturing. The noise problem in a vehicle is very severe and is difficult to solve only by modifying the sources of noise and vibration. Sound package treatments address the noise and vibration issues along the path to reduce in-cabin noise. In Acoustical Materials, readers will grasp the science of reducing sound and vibration using sound absorbers, sound barriers, and vibration dampers. Sound provides information on the proper operation of the vehicle, but if unchecked, can detract from the consumer experience within the vehicle and create noise pollution outside the vehicle. Acoustical Materials provides essential information on the basics of sound, vehicle noise source, how these are measured, how vehicle owners perceive sound, and ultimately, how to solve noise problems in vehicles using sound package materials.

Unmanned Systems (UxS) Control Segment (UCS) Architecture: Architecture Technical Governance AS-4UCS Unmanned Systems Control Segment Architecture,2016 The UCS technical governance comprises a set of policies, processes, and standard definitions to establish consistency and quality in the development of architecture artifacts and documents. It provides guidance for the use of adopted industry standards and modeling conventions in the use of Unified Modeling Language (UML) and Service Oriented Architecture Modeling Language (SoaML), including where the UCS Architecture deviates from normal UML conventions. This document identifies the defining policies, guidelines, and standards of technical governance in the following subjects: Industry standards adopted by the AS-4UCS Technical Committee: These are the industry standards and specifications adopted by AS-4UCS in the generation and documentation of the architecture. UCS Architecture Development: UCS specific policies on the development of the UCS Architecture. The AS-4UCS Technical Committee governance policies are intentionally minimal. The object is to provide direction specific to the intent and scope of developing architecture artifacts that follow a consistent set of specifications and industry best practices. Standards are referenced within policies. Standards may place constraints on policies that are implemented by processes. Each process is intended to guide the development of architecture artifacts. For example, a standard may dictate that a UML diagram be modeled in a particular methodology using only approved stereotypes from the SoaML UML profile. UCS technical governance applies to the following technical work products that are generated within the AS-4UCS Technical Committee. It is not applicable to third party developers, programs, or any other consumer of the UCS Architecture. The technical governance applies to the following item: UxS Control Segment (UCS) Architecture: Model AS6518: Structure, diagrams, packages, and artifacts shall be defined in individual policies. NOTE: Examples in this document are correct per UxS Control

Segment (UCS) Architecture: Architecture Technical Governance AS6522 content but may not necessarily reflect the latest revision of the UCS Architectural Model. This document is the SAE publication of the Department of Defense UAS Control Segment (UCS) Architecture: Architecture Technical Governance Version 2.5 (PR) approved for Distribution A public release 15.S-1859.
