Beyond Exceptionalism Rebekka Mallinckrodt, Josef Köstlbauer, Sarah Lentz, 2021-08-23 While the economic involvement of early modern Germany in slavery and the slave trade is increasingly receiving attention, the direct participation of Germans in human trafficking remains a blind spot in historiography. This edited volume focuses on practices of enslavement taking place within German territories in the early modern period as well as on the people of African, Asian, and Native American descent caught up in them.

The Marketplace of Print Alexandra Halasz, 1997-09-11 Early modern pamphlets serve as an important vehicle for examining print culture, particularly the historical entanglement between the technology of print and a developing capitalism. Attention to the controversies surrounding their circulation reveals that pamphlets became a focus for anxieties about print culture in general. Alexandra Halasz combines close readings of pamphlets by Robert Greene, Thomas Nashe, Gabriel Harvey, Thomas Deloney and John Taylor, among others, with a discussion of the history and deployment of print technology and its specifically English organization as a monopoly. Taking account of the theoretical and historical issues surrounding textual property, authorship and publicity, *The Marketplace of Print*, first published in 1997, is both a work of historical recovery and a reflection on the ongoing problems of the relationship between the marketplace and the public sphere.

Stakeholder Capitalism Klaus Schwab, 2021-01-27 Reimagining our global economy so it becomes more sustainable and prosperous for all Our global economic system is broken. But we can replace the current picture of global upheaval, unsustainability, and uncertainty with one of an economy that works for all people, and the planet. First, we must eliminate rising income inequality within societies where productivity and wage growth has slowed. Second, we must reduce the

dampening effect of monopoly market power wielded by large corporations on innovation and productivity gains. And finally, the short-sighted exploitation of natural resources that is corroding the environment and affecting the lives of many for the worse must end. The debate over the causes of the broken economy—laissez-faire government, poorly managed globalization, the rise of technology in favor of the few, or yet another reason—is wide open. Stakeholder Capitalism: A Global Economy that Works for Progress, People and Planet argues convincingly that if we don't start with recognizing the true shape of our problems, our current system will continue to fail us. To help us see our challenges more clearly, Schwab—the Founder and Executive Chairman of the World Economic Forum—looks for the real causes of our system's shortcomings, and for solutions in best practices from around the world in places as diverse as China, Denmark, Ethiopia, Germany, Indonesia, New Zealand, and Singapore. And in doing so, Schwab finds emerging examples of new ways of doing things that provide grounds for hope, including: Individual agency: how countries and policies can make a difference against large external forces A clearly defined social contract: agreement on shared values and goals allows government, business, and individuals to produce the most optimal outcomes Planning for future generations: short-sighted presentism harms our shared future, and that of those yet to be born Better measures of economic success: move beyond a myopic focus on GDP to more complete, human-scaled measures of societal flourishing By accurately describing our real situation, Stakeholder Capitalism is able to pinpoint achievable ways to deal with our problems. Chapter by chapter, Professor Schwab shows us that there are ways for everyone at all levels of society to reshape the broken pieces of the global economy and—country by country, company by company, and citizen by citizen—glue them back together in a way that benefits us all.

Long Shadows Marie Luise Kaschnitz, 1995 This collection of short stories, some semi-autobiographical, by Marie Luise Kaschnitz (1901-74), the eminent German novelist and poet, reflects many of the themes to be found throughout her fiction, such as the dread of moral anarchy which leaves nothing in its wake, and the shaping of individual destinies by loneliness, insecurity and fear. Usually told from a woman's viewpoint, her works feature strong female characters whose inner strength enable them to overcome their fears and accept their fates with stoic determination. Kaschnitz's chief concern is the human condition, giving her work a continuing relevance; she confronts such universal issues as growing old, growing up and the loss of religious faith as well as those which have a more contemporary resonance, including the social problems of working parents and adoption.

Seamless Learning in the Age of Mobile Connectivity Lung-Hsiang Wong, Marcelo Milrad, Marcus Specht, 2014-11-02 The book departs from the approach of related titles by focusing on describing and reflecting upon the notion of seamless learning with regard to salient characteristics of learner mobility and bridging of learning experiences across learning spaces. It is the first such work that is solely dedicated to research on and the practice of seamless learning, uniquely

combining interpretations, visions, and past research on and practices in seamless learning from diversified perspectives. The book also strikes a good balance between theoretical and practical perspectives, going beyond a collection of reports on specific research projects. Instead of thick descriptions of research processes and findings, readers will find significant insights and food for thought intended to inspire further advances in the research on and practice of seamless learning.

The Unknown in Art Willi Baumeister, 2014-12-09 An important theory about abstract art, published 1947 in postwar Germany, now translated.

Seamless Learning Chee-Kit Looi, Lung-Hsiang Wong, Christian Glahn, Su Cai, 2019-01-30 This book introduces readers to the latest state of research and development in seamless learning. It consolidates various approaches to and practices in seamless learning from a range of techno-pedagogical, socio-situated and socio-cultural perspectives. Further, it details our current understanding of learning in both formal and informal settings, crossover learning, incidental learning, and context-based learning approaches, together with these aspects' linkages to the notion of seamlessness. The book is divided into sections addressing the theorization of seamless learning, understanding informal learning, research methodological issues, technology-enabled seamless learning and real-world applications of seamless learning.

Slavery Hinterland Felix Brahm, Eve Rosenhaft, 2016 Contributors from the US, Britain and Europe explore a neglected aspect of transatlantic slavery: the implication of a continental European hinterland.

The Glance of Countess Hahn-Hahn (down the Danube) Peter Esterhazy, 1999-11 In The Glance of Countess Hahn-Hahn (down the Danube), Peter Esterhazy blends magic realism and travel narrative to dazzling effect. Esterhazy's hero is a professional Traveller, commissioned -- like Marco Polo by Kubla Khan -- to undertake a voyage of discovery and to prepare a travelogue about the Danube. Communicating his experiences through terse -- and at times surreal -- telegrams to his employer, the Traveller weaves a rich tapestry of narratives, evoking the dreamlike past and the precarious present of a disappearing world. Moving from the Black Forest to the Black Sea, Esterhazy takes the reader on a fascinating European journey of the imagination, down the Danube River, through Vienna, Budapest, and beyond the delta where the mighty river empties into the sea. Filled with allusion, fable, fantasy, history, and autobiography, The Glance of Countess Hahn-Hahn (down the Danube) is Peter Esterhazy at his scintillating, adventurous best.

International Investment, Political Risk, and Growth Philipp Harms, 2012-12-06 Following substantial policy reforms in many countries, the past decade has been characterized by a remarkable increase of long-term private capital flows to the developing world. However, the bulk of these investments has concentrated on a few economies at the intermediate level of the international income distribution, while the large number of low-income countries has been mostly neglected by international investors. Starting from these observations, *International Investment, Political Risk, and Growth* analyzes the potential growth effects of liberalizing investment regimes in developing economies and offers an explanation for the

apparent bias of private capital flows towards middle-income countries. It demonstrates that the removal of investment barriers may liberate an economy from a vicious circle of poverty, unproductive saving, and low growth, and presents a novel approach to analyzing the role of political risk as a major impediment to greater private capital inflows. Offering a combination of theoretical models and empirical analysis, and discussing both the historical evidence and the recent literature, this book contributes to a better understanding of the determinants and consequences of international investment in developing countries.

The future of dialects Marie-Hélène Côté, Remco Knooihuizen, John Nerbonne, 2016-02-05 Traditional dialects have been encroached upon by the increasing mobility of their speakers and by the onslaught of national languages in education and mass media. Typically, older dialects are “leveling” to become more like national languages. This is regrettable when the last articulate traces of a culture are lost, but it also promotes a complex dynamics of interaction as speakers shift from dialect to standard and to intermediate compromises between the two in their forms of speech. Varieties of speech thus live on in modern communities, where they still function to mark provenance, but increasingly cultural and social provenance as opposed to pure geography. They arise at times from the need to function throughout the different groups in society, but they also may have roots in immigrants’ speech, and just as certainly from the ineluctable dynamics of groups wishing to express their identity to themselves and to the world. The future of dialects is a selection of the papers presented at Methods in Dialectology XV, held in Groningen, the Netherlands, 11-15 August 2014. While the focus is on methodology, the volume also includes specialized studies on varieties of Catalan, Breton, Croatian, (Belgian) Dutch, English (in the US, the UK and in Japan), German (including Swiss German), Italian (including Tyrolean Italian), Japanese, and Spanish as well as on heritage languages in Canada.

Power and Pauperism Felix Driver, 2004-08-26 A new perspective on the place of the workhouse in the history and geography of nineteenth-century society and social policy.

Discourses on Nations and Identities Daniel Syrový, 2021-01-18 The third volume of the collected papers of the ICLA congress The Many Languages of Comparative Literature includes contributions that focus on the interplay between concepts of nation, national languages, and individual as well as collective identities. Because all literary communication happens within different kinds of power structures - linguistic, economic, political -, it often results in fascinating forms of hybridity. In the first of four thematic chapters, the papers investigate some of the ways in which discourses can establish modes of thinking, or how discourses are in turn controlled by active linguistic interventions, whether in the context of the patriarchy, war, colonialism, or political factions. The second thematic block is predominantly concerned with hybridity as an aspect of modern cultural identity, and the cultural and linguistic dimensions of domestic life and in society at large. Closely related, a third series of papers focuses on writers and texts analysed from the vantage points of exile and exophony, as well

as theoretical contributions to issues of terminology and what it means to talk about transcultural phenomena. Finally, a group of papers sheds light on more overtly violent power structures, mechanisms of exclusion, Totalitarianism, torture, and censorship, but also resistance to these forms of oppression. In addition to these chapters, the volume also collects a number of thematically related group sections from the ICLA congress, preserving their original context.

A Reader in Planning Theory Andreas Faludi, 2013-10-22 Urban and Regional Planning Series, Volume 5: A Reader in Planning Theory focuses on the approaches, methodologies, applications, and mechanics involved in planning theory. The selection first elaborates on a choice theory of planning, sociological considerations in the evaluation of planning, and British town planning. Discussions focus on social scientific research and town planning ideology, town planning as part of broader social policy, critics of traditional planning, value formulation, means identification, and effectuation. The text then examines comprehensive planning and social responsibility and building the middle-range bridge for comprehensive planning. The publication takes a look at the science of muddling through, beyond the middle-range planning bridge, and goals of comprehensive planning. Topics include comprehensiveness and public interest, community development programming, non-comprehensive analysis, relations between means and ends, and successive comparisons as a system. The book also ponders on community decision behavior, a conceptual model for the analysis of planning behavior, and advocacy and pluralism in planning. The selection is a dependable reference for researchers interested in planning theory.
