Global Education Monitoring Report 2020 UNESCO.2020-07-07 This publication assesses progress towards Sustainable Development Goal 4 (SDG 4) on education and its ten targets, as well as other related education targets in the SDG agenda. It addresses inclusion in education, drawing attention to all those excluded from education, because of background or ability. The report is motivated by the explicit reference to inclusion in the 2015 Incheon Declaration, and the call to ensure an inclusive and equitable quality education in the formulation of SDG 4, the global goal for education. It reminds us that, no matter what argument may be built to the contrary, we have a moral imperative to ensure every child has a right to an appropriate education of high quality.

Ancient Greek I Philip S. Peek.2021-10-19 In this elementary textbook, Philip S. Peek draws on his twenty-five years of teaching experience to present the ancient Greek language in an imaginative and accessible way that promotes creativity, deep learning, and diversity. The course is built on three pillars: memory, analysis, and logic. Readers memorize the top 250 most frequently occurring ancient Greek words, the essential word endings, the eight parts of speech, and the grammatical concepts they will most frequently encounter when reading authentic ancient texts. Analysis and logic exercises enable the translation and parsing of genuine ancient Greek sentences, with compelling reading selections in English and in Greek offering starting points for contemplation, debate, and reflection. A series of embedded Learning Tips help teachers and students to think in practical and imaginative ways about how they learn. This combination of memory-based learning and concept- and skill-based learning gradually builds the confidence of the reader, teaching them how to learn by guiding them from a familiarity with the basics to proficiency in reading this beautiful language. Ancient Greek I: A 21st-Century Approach

is written for high-school and university students, but is an instructive and rewarding text for anyone who wishes to learn ancient Greek.

Time, Tense, and Causation Michael Tooley.1997 Michael Tooley presents a major new philosophical study of time and its relation to causation. The nature of time has always been one of the most fascinating and perplexing problems of philosophy; it has in recent years become the focus of vigorous debate between advocates of rival theories. The traditional, 'tensed' accounts of time which hold that time has a direction and that the flow of time is part of the nature of the universe have been challenged by 'tenseless' accounts of time, according to which past, present, and future are merely subjective features of experience, rather than objective features of events. *Time, Tense and Causation* offers a new approach, in many ways intermediate between these two rivals. Tooley shares with tensed approaches the views that the universe is dynamic, and that the past and present are real while the future is not; but he rejects the view that this points to the existence of irreducible tensed facts. Tooley's approach accounts for time in terms of its relation to causation; he argues that the direction of time is based upon the direction of causation, and that the key to understanding the dynamic nature of the universe is to understand the nature of causation. He analyses tensed concepts, and discusses semantic issues about truth and time. Finally, addressing the formidable difficulties posed for tensed accounts of time by the Special Theory of Relativity, he suggests that a modified version of the theory, compatible with the account of time in this book, is to be preferred to the standard version. *Time, Tense, and Causation* is rich in sophisticated and stimulating discussions of many of the deepest problems of metaphysics. It will be essential reading for anyone specialising in this area of philosophy.

A Framework for K-12 Science Education National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Committee on a Conceptual Framework for New K-12 Science Education Standards.2012-02-28 Science, engineering, and technology permeate nearly every facet of modern life and hold the key to solving many of humanity's most pressing current and future challenges. The United States' position in the global economy is declining, in part because U.S. workers lack fundamental knowledge in these fields. To address the critical issues of U.S. competitiveness and to better prepare the workforce, *A Framework for K-12 Science Education* proposes a new approach to K-12 science education that will capture students' interest and provide them with the necessary foundational knowledge in the field. *A Framework for K-12 Science Education* outlines a broad set of expectations for students in science and

engineering in grades K-12. These expectations will inform the development of new standards for K-12 science education and, subsequently, revisions to curriculum, instruction, assessment, and professional development for educators. This book identifies three dimensions that convey the core ideas and practices around which science and engineering education in these grades should be built. These three dimensions are: crosscutting concepts that unify the study of science through their common application across science and engineering; scientific and engineering practices; and disciplinary core ideas in the physical sciences, life sciences, and earth and space sciences and for engineering, technology, and the applications of science. The overarching goal is for all high school graduates to have sufficient knowledge of science and engineering to engage in public discussions on science-related issues, be careful consumers of scientific and technical information, and enter the careers of their choice. A Framework for K-12 Science Education is the first step in a process that can inform state-level decisions and achieve a research-grounded basis for improving science instruction and learning across the country. The book will guide standards developers, teachers, curriculum designers, assessment developers, state and district science administrators, and educators who teach science in informal environments.

The Veiled Suite Shahid Ali Agha. 2009 Beginning with the impassioned, never-before-published title poem, here is the life's work of a beloved Kashmiri-American poet. Agha Shahid Ali died in 2001, mourned by myriad lovers of poetry and devoted students. This volume, his shining legacy, moves from playful early poems to themes of mourning and loss, culminating in the ghazals of *Call Me Ishmael Tonight*. The title poem appears in print for the first time. from *The Veiled Suite* I wait for him to look straight into my eyes This is our only chance for magnificence. If he, carefully, upon this hour of ice, will let us almost completely crystallize, tell me, who but I could chill his dreaming night. Where he turns, what will not appear but my eyes? Wherever he looks, the sky is only eyes. Whatever news he has, it is of the sea.

Strangers to Neighbours Shauna Labman,Geoffrey Cameron.2020-09-23 As a leading country in global refugee resettlement, Canada operates a unique program that allows private groups and individuals to sponsor refugees. This innovative approach has received growing international attention, but there remains a need for a more expansive understanding of the sponsorship framework and its potential implications within Canada and across the world. *Strangers to Neighbours* explains the origins and development of refugee sponsorship, paying particular attention to the unintended consequences and ethical dilemmas it produces for refugee policy. The contributors to this collection draw upon law, social science, and philosophy to bring a more robust and objective perspective on Canada's historical experience with sponsorship into wider conversations about the refugee crisis and resettlement. Together, they present recent cases that exemplify how the model has been applied and how it functions, while also analyzing the challenges that emerge in host-sponsor relations. This volume further examines how sponsorship has been implemented differently in countries such as the United States and Australia. The first dedicated study of refugee sponsorship policy, *Strangers to Neighbours* assembles leading scholars from a range of disciplines to consider whether Canada's system is indeed a sustainable model for the world.
