**Basic Federal Income Taxation of Individuals** Richard A. Westin,Beverly Moran,Herwig Schlunk,2013-12 The subject of this book is the Federal Income Taxation of individuals, meaning human beings. It briefly touches on the taxation of partnerships, trusts and corporations, largely for the purpose of enhancing your understanding of how individuals are taxed when they own interests in such entities. The Federal Income Tax on individuals provides the great preponderance of the federal government's revenues. The other primary sources of government revenue, aside from borrowing money and Social Security taxes, are corporate income taxes, transfer taxes imposed on gifts and the estates of decedents, and so-called excise taxes. The latter are usually in the nature of sales taxes on particular items, such as gasoline and diesel fuel, and some are just penalties under a gentler name. This book is limited to taxation of U.S. citizens who reside in the United States, subject to some sideways glances at the implications of departing the United States or coming to it as an alien. This book is traditional in nature, and has many of the usual landmark cases on the subject. It contains numerous study problems and requires selected readings of the Internal Revenue Code and the Treasury Regulations.

Taxes in America Leonard E. Burman,Joel Slemrod,2020-02-15 Arguments about taxation are among the most heated- no other topic is as influential to the role of government and the distribution of costs and benefits in America. But while understanding of our tax system is of vital importance, the complexity can create confusion. Two of America's leading authorities on taxes, Leonard E. Burman and Joel Slemrod, bring clarity in this concise explanation of how our tax system works, how it affects people and businesses, and how it might be improved. The book explores what makes a tax system fair, simple, and efficient, why our system falls short, and whether the new tax law promises much, if any, improvement. Accessibly written and organized in a clear, question-and-answer format, the book describes the intricacies of the modern tax system in an easy-to-grasp manner. It has been revised and updated to both explain the Tax Cuts and Jobs Act (TCJA) in 2017, the most comprehensive reform of its income tax system since 1986, and to examine its likely effects on individuals, businesses, and society. Among the questions discussed are: How much more tax could the IRS collect with better enforcement? How do tax burdens vary around the world? Why do corporations pay so little tax, even though they earn

trillions of dollars every year? What kind of tax system is most conducive to economic growth? And, can taxes be fair?

September 8, 1916 - the general Income Tax Law, is taken as the basis of computation, not only of the combined Income Taxes, but also of the Excess Profits Tax, it has been deemed advisable to go very thoroughly into the requirements of that Act. The Act of September 8, 1916, as amended, has become, by a wide margin, the most important of Federal tax laws. It is the fundamental statute. With respect to it the War Income Tax law is supplementary, and the Excess Profits Tax law occupies a position of relationship due to the fact that net income, as ascertained for Income Tax purposes, is one of the controlling factors of the computation of the Excess Profits Tax. The instructions given in this book are based upon an experience of four years in administering Federal Tax laws, as Collector of Internal Revenue at San Francisco, Cal. That experience included the inauguration of taxation of income under the old law of 1913 and continued through the handling of thousands of individual and corporation assessments under both the law of 1913 and the Act of September 8, 1916. *Get Me to Zero* Mark J. Orr Cfp, 2018-07-24 Fully UPDATED for 2018 and the NEW TAX LAW. Mark J. Orr has been a practicing Certified Financial Planner(tm) (CFP(r)) since July 2000 for clients across the country and has also earned the RICP(r) designation (Retirement Income Certified Professional). His financial planning practice is centered on the firm beliefs that 1) people should not pay a dime more in taxes that the law requires... 2) nor should they take an ounce more risk than they need to in order to reach their financial goals. *Get Me to ZERO(tm)* describes seven synergistic tax strategies to help Americans legally get their future assets and cash-flow off the IRS's radar screen and pay as little as ZERO income taxes during retirement - while simultaneously slashing their investment risks. This book fully explains how implementing these proven tax strategies can offer up to 20%-40% more spendable retirement income than traditional 401Ks, TSPs, 403Bs and IRAs. Judge Learned Hand said, Anyone may arrange his affairs so that his taxes shall be as low as possible; he is not bound to choose that pattern which best pays the treasury. There is not even a patriotic duty to increase one's taxes. Over and over again the Courts have said that there is nothing sinister in so arranging affairs as to keep taxes as low as possible. Everyone does it, rich and poor alike and all do right, for nobody owes any public duty to pay more than the law demands. That, in a nutshell is the legal basis for the *Get Me to ZERO(tm)* strategy - proactively and systematically arranging our financial affairs so that our future income taxes will be as low as possible. The whole aim of the *Get Me to ZERO(tm)* strategy is to make as much of your retirement cash-flow legally invisible to the IRS using the full tax code. And the more sources of invisible retirement cash-flow - the better. This book is not about tax loopholes! Author Tom Wheelwright, CPA says, After all, the tax law is really a map - a treasure map. As you follow this map, your taxes go down. If we can't eliminate future income taxes in retirement, we at least want to minimize them by becoming fully informed and proactively using the tax code as it is written and intended. Using the letter and the spirit of our current and longstanding tax laws for future legal tax avoidance... NOT

tax evasion is simply being tax savvy. Whose retirement are you planning for, YOURS... OR Uncle Sams? Wall Street doesn't like the TRIPLE ZERO(tm) plan at all, nor they have embraced ROTH conversions (or even ROTH contributions). Why doesn't Wall Street like ROTH conversions? Because when you convert a traditional IRA to a ROTH, income taxes get paid to the IRS and perhaps your state. That reduces the amount left that Wall Street (your broker or advisor) can make money on (fees and commissions). ROTH conversions give them a 20%-45% pay cut! Showing people how to implement a holistic and comprehensive planning approach that employs several diverse strategies to help people become more financially confident and secure today, while preparing for an extraordinary retirement is the primary goal of this book. Does your current retirement planning include future income tax planning? Do you have a tax-savvy exit strategy for your traditional retirement investments, so you can spend and enjoy more of your hard-earned savings... and pay the IRS less? A quick look at the Table of Contents and reading the first few pages ought to give you a good idea if this book should be on your reading list. It certainly should be if you would like to reduce your taxes in retirement to the lowest amount allowed by law, avoid taxation of your Social Security and enhance you're your overall financial position both today and tomorrow. Pay the IRS less. Keep more and have a better life!
