German Northern Theater of Operations 1940-1945 [Illustrated Edition] Earl Ziemke.2015-11-06 [Includes 23 maps and 31 illustrations] This volume describes two campaigns that the Germans conducted in their Northern Theater of Operations. The first they launched, on 9 April 1940, against Denmark and Norway. The second they conducted out of Finland in partnership with the Finns against the Soviet Union. The latter campaign began on 22 June 1941 and ended in the winter of 1944-45 after the Finnish Government had sued for peace. The scene of these campaigns by the end of 1941 stretched from the North Sea to the Arctic Ocean and from Bergen on the west coast of Norway, to Petrozavodsk, the former capital of the Karelo-Finnish Soviet Socialist Republic. It faced east into the Soviet Union on a 700-mile-long front, and west on a 1,300-mile sea frontier. Hitler regarded this theater as the keystone of his empire, and, after 1941, maintained in it two armies totaling over a half million men. In spite of its vast area and the effort and worry which Hitler lavished on it, the Northern Theater throughout most of the war constituted something of a military backwater. The major operations which took place in the theater were overshadowed by events on other fronts, and public attention focused on the theaters in which the strategically decisive operations were expected to take place. Remoteness, German security measures, and the Russians' well-known penchant for secrecy combined to keep information concerning the Northern Theater down to a mere trickle, much of that inaccurate. Since the war, through official and private publications, a great deal more has become known. The present volume is based in the main on the greatest remaining source of unexploited information, the captured German military and naval records. In addition a number of the participants on the German side have very generously contributed from their personal knowledge and experience.

Latin American Entrepreneurs Daniel Lederman, Julian Messina, Samuel Pienknagura, Jamele Rigolini. 2013-12-13 Entrepreneurship is a fundamental driver of growth, development, and job creation. While Latin America and the Caribbean has a wealth of entrepreneurs, firms in the region, compared to those in other regions, are small in size and less likely to grow or innovate. Productivity growth has remained lackluster for decades, including during the recent commodity boom. Enhancing the creation of good jobs and accelerating productivity growth in the region will require dynamic entrepreneurs. Latin American Entrepreneurs: Many Firms but Little Innovation studies the landscape of entrepreneurship in Latin America and the Caribbean. Utilizing new datasets that cover issues such as firm creation, firm dynamics, export decisions, and the behavior of multinational corporations, the book synthesizes the results of a comprehensive analysis of the status, prospects, and challenges of entrepreneurship in the region. Useful tools and information are provided to help policy makers and practitioners identify policy areas governments can explore to enhance innovation and encourage high-growth, transformational entrepreneurship.

The World Until Yesterday Jared Diamond. 2012-12-31 The bestselling author of *Collapse* and *Guns, Germs and Steel* surveys the history of human societies to answer the question: What can we learn from traditional societies that can make the world a better place for all of us? "As he did in his Pulitzer Prize-winning *Guns, Germs, and Steel*, Jared Diamond

continues to make us think with his mesmerizing and absorbing new book. Bookpage Most of us take for granted the features of our modern society, from air travel and telecommunications to literacy and obesity. Yet for nearly all of its six million years of existence, human society had none of these things. While the gulf that divides us from our primitive ancestors may seem unbridgeably wide, we can glimpse much of our former lifestyle in those largely traditional societies still or recently in existence. Societies like those of the New Guinea Highlanders remind us that it was only yesterday—in evolutionary time—when everything changed and that we moderns still possess bodies and social practices often better adapted to traditional than to modern conditions. The World Until Yesterday provides a mesmerizing firsthand picture of the human past as it had been for millions of years—a past that has mostly vanished—and considers what the differences between that past and our present mean for our lives today. This is Jared Diamond's most personal book to date, as he draws extensively from his decades of field work in the Pacific islands, as well as evidence from Inuit, Amazonian Indians, Kalahari San people, and others. Diamond doesn't romanticize traditional societies—after all, we are shocked by some of their practices—but he finds that their solutions to universal human problems such as child rearing, elder care, dispute resolution, risk, and physical fitness have much to teach us. Provocative, enlightening, and entertaining, The World Until Yesterday is an essential and fascinating read.

Farm Management In Peasant Agriculture Michael Collinson.2019-03-04 First published in 1972, *Farm Management in Peasant Agriculture* remains the only detailed discussion of on-site research techniques for economists working on the development of small-holder agriculture in Africa. Part 1 describes the conditions of the agricultural sector within which the African peasant farmer must operate, and then outlines an approach to farm management tailored to those conditions. Part 2 sets out the research planning and investigation tasks implied by the approach. Survey techniques, as well as the value of a pre-survey for understanding general attributes of a farm system, are reviewed, and alternative data-collection methods are elaborated. Part 3 shows how research data can be used in planning content for extension programs. Dr. Collinson concludes with the details of a planning method that interpolates changes in farm practice into a model of the existing farm system and that projects a sequence of changes, representing a sequence of extension content, on the basis of farmer acceptability.
