**A Frequency Dictionary of French** Deryle Lonsdale, Yvon Le Bras.2009-03-25 A Frequency Dictionary of French is an invaluable tool for all learners of French, providing a list of the 5000 most frequently used words in the language. Based on a 23-million-word corpus of French which includes written and spoken material both from France and overseas, this dictionary provides the user with detailed information for each of the 5000 entries, including English equivalents, a sample sentence, its English translation, usage statistics, and an indication of register variation. Users can access the top 5000 words either through the main frequency listing or through an alphabetical index. Throughout the frequency listing there are thematically-organized lists of the top words from a variety of key topics such as sports, weather, clothing, and family terms. An engaging and highly useful resource, the Frequency Dictionary of French will enable students of all levels to get the most out of their study of French vocabulary. Deryle Lonsdale is Associate Professor in the Linguistics and English Language Department at Brigham Young University (Provo, Utah). Yvon Le Bras is Associate Professor of French and Department Chair of the French and Italian Department at Brigham Young University (Provo, Utah).

**Urban Evolutionary Biology** Marta Szulkin, Jason Munshi-South, Anne Charmantier.2020-03-05 Urban Evolutionary Biology fills an important knowledge gap on wild organismal evolution in the urban environment, whilst offering a novel exploration of the fast-growing new field of evolutionary research. The growing rate of urbanization and the maturation of urban study systems worldwide means interest in the urban environment as an agent of evolutionary change is rapidly increasing. We are presently witnessing the emergence of a new field of research in evolutionary biology. Despite its rapid global expansion, the urban environment has until now been a largely neglected study site among evolutionary biologists.

With its conspicuously altered ecological dynamics, it stands in stark contrast to the natural environments traditionally used as cornerstones for evolutionary ecology research. Urbanization can offer a great range of new opportunities to test for rapid evolutionary processes as a consequence of human activity, both because of replicate contexts for hypothesis testing, but also because cities are characterized by an array of easily quantifiable environmental axes of variation and thus testable agents of selection. Thanks to a wide possible breadth of inference (in terms of taxa) that may be studied, and a great variety of analytical methods, urban evolution has the potential to stand at a fascinating multi-disciplinary crossroad, enriching the field of evolutionary biology with emergent yet incredibly potent new research themes where the urban habitat is key. *Urban Evolutionary Biology* is an advanced textbook suitable for graduate level students as well as professional researchers studying the genetics, evolutionary biology, and ecology of urban environments. It is also highly relevant to urban ecologists and urban wildlife practitioners.

*Demography* Graziella Caselli, Jacques Vallin, Guillaume J. Wunsch. 2006 Presents an examination of demographic tools. Explains the analytical tools themselves, and also the relationships between general population dynamics and their natural, economic, social, political, and cultural environments. Covers subjects that range from the core building blocks of population change to the consequences of demographic changes in the biological and health fields, population theories and doctrines, observation systems, and the teaching of demography.

Trajectories and Origins: Survey on the Diversity of the French Population Cris Beauchemin, Christelle Hamel, Patrick Simon. 2018-11-08 This book provides the main findings of a ground-breaking survey on immigrants and the second generation in France. The data, collected from more than 20, 000 persons representative of the population living in France, offer invaluable insights into the trajectories and experience of ethnic minorities. The book explains how France has been an immigrant-receiving country for over a century and how it is now a multicultural society with an unprecedented level of origin diversity. While immigrants and their descendants are targets of clichés and stereotyping, this book provides unique quantitative findings on their situation in all areas of personal and working life. Is origin in itself a factor of inequality? With its detailed reconstitutions of educational, occupational and conjugal trajectories and its exploration of access to housing and health, this book provides multiple approaches to answering this question. One of the work's major contributions is to combine objective and subjective measures of discrimination: this is the first study in France to focus on racism as experienced by those subjected to it, while opening up new methodological perspectives on the experience of prejudice by origin, religion, and skin colour.

*The Handbook of Economic Sociology* Neil J. Smelser, Richard Swedberg. 2010-07-28 The Handbook of Economic Sociology, Second Edition is the most comprehensive and up-to-date treatment of economic sociology available. The first edition, copublished in 1994 by Princeton University Press and the Russell Sage Foundation as a synthesis of the burgeoning field of economic sociology, soon established itself as the definitive presentation of the field, and has been widely read, reviewed, and adopted. Since then, the field of economic sociology has continued to grow by leaps and bounds and to move into new theoretical and empirical territory. The second edition, while being as all-embracing in its coverage as the first edition, represents a wholesale revamping. Neil Smelser and Richard Swedberg have kept the main overall framework intact, but nearly two-thirds of the chapters are new or have new authors. As in the first edition, they bring together leading sociologists as well as representatives of other social sciences. But the thirty chapters of this volume incorporate many substantial thematic changes and new lines of research--for example, more focus on international and global concerns, chapters on institutional analysis, the transition from socialist economies, organization and networks, and the economic sociology of the ancient world. The Handbook of Economic Sociology, Second Edition is the definitive resource on what continues to be one of the leading edges of sociology and one of its most important interdisciplinary adventures. It is a must read for all faculty, graduate students, and undergraduates doing work in the field. A thoroughly revised and updated version of the most comprehensive treatment of economic sociology available Almost two-thirds of the chapters are new or have new authors Authors include leading sociologists as well as representatives of other social sciences Substantial thematic changes and new lines of research, including more focus on international and global concerns, institutional analysis, the transition from socialist economies, and organization and networks The definitive resource on what continues to be one of the leading edges of sociology and one of its most important interdisciplinary adventures A must read for faculty, graduate students, and undergraduates doing work in the field

**Handbook of Second and Foreign Language Writing** Rosa M. Manchón, Paul Kei Matsuda. 2016-09-12 The Handbook of Second and Foreign Language Writing is an authoritative reference compendium of the theory and research on second and foreign language writing that can be of value to researchers, professionals, and graduate students. It is intended both as a retrospective critical reflection that can situate research on L2 writing in its historical context and provide a state of the art view of past achievements, and as a prospective critical analysis of what lies ahead in terms of theory, research, and applications. Accordingly, the Handbook aims to provide (i) foundational information on the emergence and subsequent evolution of the field, (ii) state-of-the-art surveys of available theoretical and research (basic and applied) insights, (iii) overviews of research methods in L2 writing research, (iv) critical reflections on future developments, and (iv) explorations of existing and emerging disciplinary interfaces with other fields of inquiry.

*Multisystemic Resilience* Michael Ungar.2021 Across diverse disciplines, the term resilience is appearing more and more often. However, while each discipline has developed theory and models to explain the resilience of the systems they study (e.g., a natural environment, a community post-disaster, the human mind, a computer network, or the economy), there is a lack of over-arching theory that describes: 1) whether the principles that underpin the resilience of one system are similar or different from the principles that govern resilience of other systems; 2) whether the resilience of one system affects the resilience of other co-occurring systems; and 3) whether a better understanding of resilience can inform the design of interventions, programs and policies that address wicked problems that are too complex to solve by changing one system at a time? In other words (and as only one example among many) are there similarities between how a person builds and sustains psychological resilience and how a forest, community or the business where he or she works remains successful and sustainable during periods of extreme adversity? Does psychological resilience in a human being influence the resilience of the forests (through a change in attitude towards conservation), community (through a healthy tolerance for differences) and businesses (by helping a workforce perform better) with which a person interacts? And finally, does this understanding of resilience help build better social and physical ecologies that support individual mental health, a sustainable environment and a successful economy at the same time?--

*Music in the Early Twentieth Century* Richard Taruskin.2006-08-14 The universally acclaimed and award-winning Oxford History of Western Music is the eminent musicologist Richard Taruskin's provocative, erudite telling of the story of Western music from its earliest days to the present. Each book in this superlative five-volume set illuminates-through a representative sampling of masterworks-the themes, styles, and currents that give shape and direction to a significant period in the history of Western music. *Music in the Early Twentieth Century*, the fourth volume in Richard Taruskin's history, looks at the first half of the twentieth century, from the beginnings of Modernism in the last decade of the nineteenth century right up to the end of World War II. Taruskin discusses modernism in Germany and France as reflected in the work of Mahler, Strauss, Satie, and Debussy, the modern ballets of Stravinsky, the use of twelve-tone technique in the years following World War I, the music of Charles Ives, the influence of peasant songs on Bela Bartok, Stravinsky's neo-classical phase and the real beginnings of 20th-century music, the vision of America as seen in the works of such composers as W.C. Handy, George Gershwin, and Virgil Thomson, and the impact of totalitarianism on the works of a range of musicians from Toscanini to Shostakovich

*A Rare Breeds Album of American Livestock* Carolyn Christman,Dan Phillip Sponenberg,Donald E. Bixby.1997 Seventy

breeds of livestock in America are rare. What would happen if these breeds of asses, cattle, goats, horses, pigs, and sheep were to become extinct? Agriculture will have lost the genetic resources necessary to adapt to changes in the environment and human needs. A link in the Earth's biodiversity will have been broken. And people in the future will be deprived of the flash of a Spanish Mustang in the misty morning, the rich palette of colors in a flock of Navajo-Churro sheep, and the gentle lowing of a Cracker cow to her newborn calf. If rare breeds are lost, the animal kingdom and the human experience will be diminished forever. This book shows what is at stake -- the breed diversity that is our natural heritage and cultural inheritance. Learn how rare breeds are being protected and how you can become a part of this unique conservation effort.

Recent Advances in Natural Language Processing Ruslan Mitkov,Nicolas Nicolov.1997-01-01 This volume is based on contributions from the First International Conference on [Recent Advances in Natural Language Processing] (RANLP'95) held in Tzigov Chark, Bulgaria, 14-16 September 1995. This conference was one of the most important and competitively reviewed conferences in Natural Language Processing (NLP) for 1995 with submissions from more than 30 countries. Of the 48 papers presented at RANLP'95, the best (revised) papers have been selected for this book, in the hope that they reflect the most significant and promising trends (and latest successful results) in NLP. The book is organised thematically and the contributions are grouped according to the traditional topics found in NLP: morphology, syntax, grammars, parsing, semantics, discourse, grammars, generation, machine translation, corpus processing and multimedia. To help the reader find his/her way, the authors have prepared an extensive index which contains major terms used in NLP; an index of authors which lists the names of the authors and the page numbers of their paper(s); a list of figures; and a list of tables. This book will be of interest to researchers, lecturers and graduate students interested in Natural Language Processing and more specifically to those who work in Computational Linguistics, Corpus Linguistics and Machine Translation.

Lake Pavin Téséphore Sime-Ngando, Pierre Boivin, Emmanuel Chapron, Didier Jezequel, Michel Meybeck. 2016-10-31 This book represents the first multidisciplinary scientific work on a deep volcanic maar lake in comparison with other similar temperate lakes. The syntheses of the main characteristics of Lake Pavin are, for the first time, set in a firmer footing comparative approach, encompassing regional, national, European and international aquatic science contexts. It is a unique lake because of its permanently anoxic monimolimnion, and furthermore, because of its small surface area, its substantially low human influence, and by the fact that it does not have a river inflow. The book reflects the scientific research done on the general limnology, history, origin, volcanology and geological environment as well as on the geochemistry and biogeochemical cycles. Other chapters focus on the biology and microbial ecology whereas the sedimentology and paleolimnology are also given attention. This volume will be of special interest to researchers and advanced students, primarily in the fields of limnology, biogeochemistry, and aquatic ecology.

*Babylonian Topographical Texts* A. R. George. 1992 *Babylonian Topographical Texts* collects for the first time all Babylonian and Assyrian texts of the first millennium B.C. that belong to what is designated the topographical genre. Much of the material is not previously published. The book is largely concerned with Babylon. Seventeen texts on this city now allow its topography to be properly understood for the first time. Another seventeen texts concern the cities of Nippur, Assur, Kish and Uruk. Also included are thirty miscellaneous texts, mostly new, which bear upon topographical matters. The text editions and translations are supplemented by a philological and topical commentary. The work is concluded with full indices, and 57 plates of cuneiform copies.

*Writing and Rewriting the Story of Solomon in Ancient Israel* Isaac Kalimi.2018-11-29 Solomon's image as a wise king and the founder of Jerusalem Temple has become a fixture of Jewish, Christian, and Islamic literature. Yet, there are essential differences between the portraits of Solomon that are presented in the Hebrew Bible. In this volume, Isaac Kalimi explores these differences, which reflect divergent historical contexts, theological and didactic concepts, stylistic and literary techniques, and compositional methods among the biblical historians. He highlights the uniqueness of each portrayal of Solomon - his character, birth, early life, ascension, and temple-building - through a close comparison of the early and late biblical historiographies. Whereas the authors of Samuel-Kings stay closely to their sources and offer an apology for Solomon's kingship, including its more questionable aspects, the Chronicler freely rewrites his sources in order to present the life of Solomon as he wished it to be. The volume will serve scholars and students seeking to understand biblical texts within their ancient Near Eastern contexts.

**Enhancing Qualitative and Mixed Methods Research with Technology** Hai-Jew, Shalin.2014-09-30 In light of the expensive nature of quantitative research, such as experiments, researchers must seek other methods of understanding the world around them. As such, new qualitative methods are gaining ground in the modern research community. *Enhancing Qualitative and Mixed Methods Research with Technology* explores the integration of new digital tools into the research process. Including current information on data visualization, research design, information capture, as well as social media analysis, this publication serves as an ideal reference source for academicians, scientists, information specialists, business managers, and upper-level students involved in interdisciplinary research.

**Colonial Migrants and Racism** N. MacMaster.1997-04-23 The first comprehensive study in English of the earliest and

largest 'Third-World' migration into pre-war Europe. Full attention is given to the relationship between the society of emigration, undermined by colonialism, and processes of ethnic organisation in the metropolitan context. Contemporary anti-Algerian racism is shown to have deep roots in moves by colonial elites to control and police the migrants and to segregate them from contact with Communism, nationalist movements and the French working class.
