Antigua and Barbuda International Monetary Fund. Fiscal Affairs Dept..2015-02-04 The purpose of this Public Expenditure and Financial Accountability (PEFA) performance assessment is to provide an objective analysis of the present performance of the public financial management system in Antigua and Barbuda, and identify changes incurred since the last PEFA assessment undertaken in 2010. In the wake of a prolonged economic crisis, fiscal outcomes have not been consistent with the budget as approved. Central government public finances are comprehensively presented in budget documents, but some weaknesses persist. New policy initiatives and their budgetary implications are not sufficiently analyzed; a significant share of extra-budgetary expenditures remains unreported; and oversight and reporting requirements of statutory bodies are not yet fully enforced, impeding a comprehensive assessment of the associated fiscal risks. Although the revenue administration has been strengthened over the last years, the control over budget execution is still weak. There have been improvements in the quality of external audit, but lack of Parliamentary scrutiny undermines the accountability framework.

Public Expenditure Management Handbook .1998-01-01 Printed on Demand. Limited stock is held for this title. If you would like to order 30 copies or more please contact books@worldbank.org Contact books@worldbank.org, if currently unavailable. Public expenditure issues are encountered wherever there is a discussion of government, the public sector, and development. Over the years, the World Bank has invested considerable resources in analyzing public expenditures and the impacts of different interventions on sustainable development. This handbook provides a broad framework for thinking about public expenditure management and how it affects budgetary outcomes. It highlights the fact that good analysis and sound policy are not enough to ensure sound and sustainable development outcomes. Of particular interest is the concept of three levels of budgetary outcomes - aggregate fiscal discipline, strategic prioritization, and operational performance.

Hypertension in the Elderly: Pocketbook Norman Kaplan.2002-06-27 Though it seems illogical to offer treatment to reduce cardiovascular risk factors in those with a limited life expectancy and inappropriate to lower blood pressure in the elderly when it is known that hypertension rises as people get older, studies have shown beyond reasonable doubt that lowering the blood pressure in the elderly reduces morbidity and prolongs life.

Can Governments Learn? Frans L. Leeuw.2020-03-05 There is continual concern about the ability of governments to perform the duties and responsibilities that their citizens have come to expect from them. Many citizens view government as inept, arthritic, and dedicated to the preservation of the bureaucratic status quo. As we close the twentieth century, the challenge for democratic governments is to become adaptive, flexible, innovative, and creative. In short, they need to become learning organizations. This book explores what it will take for governments to break out of their traditional ways of approaching problems and learn new approaches to finding solutions. Can Governments Learn? examines organizational learning in the public sector. It seeks to understand the role policy and program evaluation information can play in helping governments learn. Among the democratic societies studied are Belgium, Canada, the Netherlands, Sweden, and the United States. Significantly, the studies documented here show that the concept of organizational learning has vitality and applicability cross-nationally. Can Governments Learn? evaluates preconditions for governmental learning as well as the institutional and human resource factors that contribute to the process. This volume in the Comparative Policy Analysis Series is essential for policymakers, government officials, and scholars interested in improving the performance of governments.

Financial Inclusion, Regulation, and Education Naoyuki Yoshino, Peter J. Morgan.2017 Financial inclusion is receiving increasing attention as having the potential to contribute to economic and financial development while at the same time fostering more inclusive growth and greater income equality. Although substantial progress has been made, there is still much to achieve. East Asia, the Pacific, and South Asia combined account for 55% of the world's unbanked adults, mainly in India and the People's Republic of China. This book surveys the experience of a number of advanced and Asian emerging economies to assess factors affecting the ability of low-income households and small firms to access financial services, including financial literacy, financial education programs, and financial regulatory frameworks, as well as identify policies that can improve their financial access while maintaining financial stability. It aims to identify successful experiences and important lessons that can be adopted by other emerging economies. The studies cover the experiences of Germany, the United Kingdom, Bangladesh, India, Indonesia, the Philippines, Sri Lanka, and Thailand. The book adopts a practical and holistic approach to issues related to financial inclusion. For example, innovative methods of promoting financial access, such as mobile phone banking and microfinance, require corresponding innovations in regulatory frameworks, perimeters, and capacity. Moreover, programs in the areas of financial education and consumer protection are needed to enable households and firms to take full advantage of improvements in financial access.
