Effective Teaching of Science Wynne Harlen. 1999 This book reviews the literature on effective science teaching, examining research from the United Kingdom and other countries. The studies included were those that made comparisons between two or more groups differing in science education experiences; those that involved upper elementary or lower secondary students; those that made comparisons in terms of achievement in science or outcomes related to achievement; and those in which innovation was sustainable in normal classrooms. The book focuses on eight aspects of science education that might impact students' achievement but which have received less attention than other aspects (such as gender bias). The book features 10 chapters which include the eight topics: (1) Introduction; (2) The Role of Practical Work; (3) Using Computers; (4) Approaches to Constructivism; (5) Cognitive Acceleration; (6) Assessment; (7) Planning, Questioning, and Using Language; (8) The Curriculum; (9) Teachers' Understanding of Science; and (10) Discussion. Gender Differences in Performance of Chemistry Practical Skills Among Senior Six Students in Kampala District Fredrick Ssempala. 2009-01 The aim of this study was to determine if there were gender differences in the performance of Chemistry practical skills among senior six girls and boys in selected mixed secondary schools in Kampala District from February to March 2004. The study participants were drawn from five mixed secondary schools in the district. A total of fifty students participated, half of them girls and the other half boys. A cross sectional descriptive research design was used involving both quantitative and qualitative research strategies. The instruments of data collection were a Chemistry practical test (Quantitative analysis), student questionnaires and in-depth interviews. Questionnaires were filled out by all students and forty randomly selected students were interviewed by the researcher. The following were the findings: 1. There were no statistical significant differences between girls and boys in their ability to manipulate the apparatus/equipment, take observation, report/record results correctly, and compute/interpret/analyze results during the Chemistry practical. 2. Both female and male students perceived interpreting/analyzing results to be the most difficult skill to perform, whereas manipulation of apparatus/equipment was perceived to be the easy skill to perform during Chemistry practical by both

gender. 3. Girls had a poor self-confidence in their ability to perform Chemistry practical, as most of them (90%) believed that boys are better than them. Although girls performed slightly better than boys overall, the skills in which boys performed slightly better than girls in recording/reporting results correctly, and computing/interpreting/analyzing results, contributed a higher percentage in the assessment of Chemistry practical examinations by the UNEB examiners. Hence, it may be the reason why boys perform better than girls in UNEB Chemistry practical examinations, and in 'A' Level Chemistry examinations generally. The recommendations were that Chemistry teachers in 'O' Level should make sure that students are taught mole concept, volumetric analysis and Ionic Chemistry, and balancing equations early enough so that both girls and boys are able to compute/interpret/analyze results. Also, further research should be done on gender and Chemistry practical skill performance, considering qualitative analysis practical for both 'O' and 'A' Level, so that more knowledge is gained about the effect of gender on performance of Chemistry practical skills.

Curriculum Landscapes and Trends Jan van den Akker, Wilmad Kuiper, Uwe Hameyer. 2013-06-29 Curriculum problems are everywhere: alert observers with a practiced eye and educated mind will find it almost impossible to read a newspaper without discovering curricular issues. The media often report about educational reforms or even about curriculum wars with opposing parties fiercely debating the aims, content and organization of learning. Few people analyze these trends and discussions from a curricular conceptual framework. In addition, people sometimes think that their curriculum approaches and problems are unique and context-specific. However, international experience shows us that we can learn a lot from curriculum issues elsewhere. This book aims to sharpen the eyes and minds of a broader audience in identifying, understanding, addressing and reflecting upon curriculum problems. It also aims to contribute to the increased exchange, discussion and reflection on all the current curriculum problems that form such a crucial part of learning worldwide.

Education Bytes . 2004-04-01 This is a pithy quote book related to teaching, education, and schools. It is not your usual sweet, inspirational collection of quotes for the education world. Rather, the compilation is a mixture of sweet, sour, bitter and tangy pieces.

Yorùbá Yé Mi Fehintola Mosadomi. 2012 Yorùbá Yé Mi is a new multi-media program designed to enliven classroom activities. It promotes and enhances the learning of Yorùbá by incorporating the four language learning skills: listening, speaking, reading, and writing--Preface

An English-Hausa Dictionary Roxana Ma Newman. 1990 Hausa students and Hausaphiles now have an English-Hausa

dictionary that is readily available, attractively produced and quite attractively priced, and more comprehensive than any English-based dictionary for an African language...A magnificent accomplishment that promises to serve a wide variety of purposes. It establishes both precedent and an excellent model that one hopes will be followed for other less commonly taught languages. -William R. Leben, *Modern Language Journal* This is a modern comprehensive dictionary designed specifically for English-speaking users who wish to acquire communicative fluency in Hausa, West Africa's most important and most widely spoken language. The dictionary contains a broad selection of words that the average person is likely to need in speaking and writing Hausa for everyday use. Included are common technical terms drawn from a range of fields, as well as generally accepted borrowings from English and French. The entries are divided into meaning groups and grammatical categories, marked clearly by semantic and usage indicators to help the user distinguish between the various meanings. Numerous phrases, sentences, and common idiomatic expressions illustrate conversational usage and provide culturally informative contexts. The easy to read typography marks lexical and grammatical distinctions of tone and vowel length for every Hausa word in the dictionary. The introduction provides concise information on various points of Hausa grammar. Useful appendixes include pronoun paradigms, pronunciation guides to Hausa place names and personal names, an index of Nigerian and international organizations, and a description of the currencies of Nigeria and Niger. An English-Hausa Dictionary will be an invaluable guide for students, research scholars, translators, and people with educational business, or governmental ties in West Africa who are interested in learning the language and culture of one of that area's most dynamic societies. It will be equally useful to non-Hausa speaking Africans who want to learn Hausa. In general, the innovative design features of this book will set a new standard for pedagogically oriented reference works of African languages. A valuable resource for scholars and students of linguistic and African languages and literature...It is highly recommended for use in academic and research libraries. Newman and her editorial staff deserve to be congratulated. -Felix Eme Unaeze, *American Reference Books Annual*

The Quantity Surveyor's Bible Carroll Ian. 2019-07-19 The Quantity Surveyor's Bible is essential reading for anyone interested in a career in the construction industry. Democracy in Plural Societies Arend Lijphart.1977-01-01 While it may be difficult to achieve and maintain stable democratic governments in countries with deep religious, ideological, linguistic, cultural, or ethnic cleavages, Lijphart argues that it is not at all impossible. Through the analysis of political systems in six continents, he demonstrates that what he calls consociational democracy can be successful in severely divided or plural societies. Here, once again, Arend Lijphart is directing our attention to matters which will surely engage much of the attention of students of comparative politics in the next decade. G. Bingham Powell, Jr., American Political Science Review A study which can speak to such a wide audience in political science deserves a warm welcome from the profession. Government and Opposition A copybook example of the comparative method of political analysis, as well as indispensable reading for all who have an interest in the nature and prospects of representative democracy, whether in Europe or beyond.--The Times Higher Education Supplement This well-written work, containing a wealth of information on politics of many diverse nations, is highly recommended.--Library Journal

Classroom Testing and Assessment for ALL Students Spencer J. Salend.2009-11-10 A rare opportunity for the new

generation of educators to learn alongside a well-known and experienced educator to integrate all learning styles into assessments. Principals should consider this for faculty book studies. The presented techniques will, no doubt, raise standardized test scores while teachers continue to present real curriculum.-Janette Bowen, Sixth-Grade Teacher Junction City Middle School, KS Give all students an equal chance to perform well on your classroom tests and assessments! In today's diverse classrooms, students of different socioeconomic, linguistic, and cultural backgrounds and ability levels share a common learning environment. To meet each student's unique strengths and needs, educators need flexible testing and assessment strategies that fulfill the requirements for standardized assessment and accountability in ways that don't put students at a disadvantage because of their differences. Classroom Testing and Assessment for ALL Students helps both general and special education teachers meet and move beyond the challenges of NCLB and IDEA by using teacher-made tests, appropriate testing accommodations, technology-based testing, and classroom-based assessments that support the teaching and learning process so all students have the opportunity to succeed. The book offers ways for teachers to better differentiate their testing and assessment strategies through: Classroom and school-based examples in each chapter Bulleted information outlining hands-on, research-based strategies for teacher implementation Forms, reproducibles, stories, vignettes, reflection questions, and checklists that guide educators in applying and tailoring the strategies to their classrooms and students Tips on using technology to help all students perform better Teachers know their students best. This resource allows teachers to design tests and assessments to accommodate the various strengths and needs of all learners in their classroom.

High Pressure Chemistry and Biochemistry R. van Eldik, Jiri Jonas. 1987-03-31 It was the objective of the ASI on Advances in High Pressure Studies of Chemical and Biochemical Systems to present the current status of such studies and to emphasize the advances achieved during the nine years since the previous ASI on High Pressure Chemistry. These advances are partly due to the improved instrumentation enabling static and dynamic measurements at pressures several orders of magnitude higher than before, and partly due to the more general availability of high pressure equipment. This has led to a remarkable development in various areas of physics and chemistry, and especially in biochemistry. Throughout the presentation of this Advanced Study Institute the emphasis fell on the teaching character of such a summer school, and the contributions in this volume are of such a nature. Following a general introduction to modern high pressure research, a series of chapters on theoretical and experimental studies of gases, fluids and solids at high temperatures and pressures are presented with special emphasis on the physical aspects involved. Instrumentation used in such studies, viz. shock compression, NMR spectroscopy, laser scattering, x-ray and neutron scattering, and vibrational spectroscopy are treated in detail. The subsequent chapters are devoted to the application of high pressure techniques in the broad areas of organic, inorganic and biochemistry_ The formal lectures were supplemented by 29 contributed papers, for which a list of titles is

included.

Encyclopedia of Educational Psychology Neil J. Salkind,Kristin Rasmussen.2008-01-17 The field of educational psychology draws from a variety of diverse disciplines including human development across the life span, measurement and statistics, learning and motivation, and teaching. And within these different disciplines, many other fields are featured including psychology, anthropology, education, sociology, public health, school psychology, counseling, history, and philosophy. In fact, when taught at the college or university level, educational psychology is an ambitious course that undertakes the presentation of many different topics all tied together by the theme of how the individual can best function in an educational setting, loosely defined as anything from pre-school through adult education. Educational psychology can be defined as the application of what we know about learning and motivation, development, and measurement and statistics to educational settings (both school- and community-based).

World Population and Human Capital in the Twenty-First Century Wolfgang Lutz,William P. Butz,Samir KC.2017 Condensed into a detailed analysis and a selection of continent-wide datasets, this revised edition of *World Population & Human Capital in the Twenty-First Century* addresses the role of educational attainment in global population trends and models. Presenting the full chapter text of the original edition alongside a concise selection of data, it summarizes past trends in fertility, mortality, migration, and education, and examines relevant theories to identify key determining factors. Deriving from a global survey of hundreds of experts and five expert meetings on as many continents, *World Population & Human Capital in the Twenty-First Century: An Overview* emphasizes alternative trends in human capital, new ways of studying ageing and the quantification of alternative population, and education pathways in the context of global sustainable development. It is an ideal companion to the county specific online Wittgenstein Centre Data Explorer.

Measurement and Evaluation in Education and Psychology William A. Mehrens,Irvin J. Lehmann.1991 Provides examples of good and poor test items to help the reader prepare better tests. Discusses other teacher-made evaluation procedures such as performance assessments and rating scales. Reviews a variety of standardized tests.

Scientific Teaching Jo Handelsman,Sarah Miller,Christine Pfund.2007 Seasoned classroom veterans, pre-tenured faculty, and neophyte teaching assistants alike will find this book invaluable. HHMI Professor Jo Handelsman and her colleagues at the Wisconsin Program for Scientific Teaching (WPST) have distilled key findings from education, learning, and cognitive psychology and translated them into six chapters of digestible research points and practical classroom examples. The recommendations have been tried and tested in the National Academies Summer Institute on Undergraduate Education in Biology and through the WPST. *Scientific Teaching* is not a prescription for better teaching. Rather, it encourages the reader to approach teaching in a way that captures the spirit and rigor of scientific research and to contribute to transforming how

students learn science.

Financing Education in Sub-Saharan Africa UIS,UNESCO-IIEP,UNESCO Office Dakar and Regional Bureau for Education in Africa.2011-01-01 In the current economic climate, how can African governments provide every child with a decent education? This report provides the statistical evidence to evaluate the policy trade-offs in responding to the rising demand for primary and secondary education in sub-Saharan Africa. The report presents the most comprehensive and timely data available on the financing of education in 45 sub-Saharan African countries. In addition, historical data enable the authors to track trends since the World Education Forum in 2000 and examine the financial impact of the steadfast commitment of many African governments to provide universal primary education. Over the past ten years, real expenditure on education has risen by 6% annually across the region. It is often assumed that the resources were used to widen enrollment. Yet, recent data show that many countries also made significant investments to improve their educational services. The report also introduces new indicators on critical issues, such as the qualifications and salaries of teachers, the running costs of schools, and the provision of textbooks. The authors examine financing trends in private education, as well as official development assistance, which accounts for more than 50% of public education budgets in some countries. In short, this report provides the facts -- not assumptions -- to analyse policy options and optimise the use of limited financial resources.--P. [4] of cover.

Faceless Amma Darko.2003 Street life in the slums of Accra is realistically portrayed in this socially-committed, subtle novel about four educated women who are inspired by the plight of a 14-year old girl, Fofu. As the main characters convert their library center into a practical street initiative, the novel invokes the squalor, health risks, and vicious cycles of poverty and violence that drive children to the streets and women to prostitution; and, from which, ultimately, no one in the society is free.

Bantu Historical Linguistics Jean Marie Hombert,Larry M. Hyman.1999-01 This collection treats classificatory, historical, and comparative aspects of Bantu languages.

History of Education in Nigeria A. Babs Fafunwa.2018-10-03 Originally published in 1974, a comprehensive history of Nigerian Education, from early times right through to the time of publication, had long been needed by all concerned with Education in Nigeria, students, teachers and educational administrators. No one was better qualified than Professor Fafunwa to provide such a book, and in doing so he gave due emphasis to the beginnings of Education in its three main stages of indigenous, Muslim and Christian Education. Nigerian Education had been considered all too often as a comparatively recent phenomenon, but this book points out from the start that 'Education is as old as Man himself in Africa' and that both Islam

and Christianity were comparative newcomers in the field. A historical treatment of these three strands which have combined to make up the modern Educational system was vital to a clear understanding of what was needed for the future, and most of the first half of the book is concerned with these Educational beginnings. The imposing of a foreign colonial system on this framework did not always lead to a happy fusion of the systems, and the successes and the failures are examined in detail. There was no shortage of documentary evidence in the form of reports and statistics during the decades prior to publication, but this evidence was frequently scattered and inaccessible to the student, so that the author's careful selection of key evidence and reports, often drawn from his own personal experience, will be invaluable for those wishing to trace the development of Education in Nigeria up to the early 1970s. A knowledge of the history and development of the Nigerian Education system, of the numerous and intensely varied personalities and beliefs which have combined and often conflicted to shape it, is indispensable to all students in colleges and universities studying to become teachers. It is this knowledge that Professor Fafunwa set out to provide, drawing on his wide experience as teacher writer and educationalist.

Fine Boys Eghosa Imasuen. 2021-09-28 A coming-of-age tale told from the perspective of Nigeria's Generation X, caught amid the throes of a nascent pro-democracy movement, demoralizing corruption, and campus violence. Ewaen is a Nigerian teenager, bored at home in Warri and eager to flee from his parents' unhappy marriage and incessant quarreling. When Ewaen is admitted to the University of Benin, he makes new friends who, like him, are excited about their newfound independence. They hang out in parking lots, trading gibes in pidgin and English and discovering the pleasures that freedom affords them. But when university strikes begin and ruthlessly violent confraternities unleash mayhem on their campus, Ewaen and his new friends must learn to adapt—or risk becoming the confras' next unwilling recruits. In his trademark witty, colloquial style, critically acclaimed author Eghosa Imasuen presents everyday Nigerian life against the backdrop of the pro-democracy riots of the 1980s and 1990s, the lost hopes of June 12 (Nigeria's Democracy Day), and the terror of the Abacha years. *Fine Boys* is a chronicle of time, not just in Nigeria, but also for its budding post-Biafran generation.

Cognitive Styles and Learning Strategies Richard Riding, Stephen Rayner. 2013-10-23 First Published in 1998. This book deals with what may well turn out to be the missing element in the study of individual differences - cognitive style. Its intention is to distinguish between, and integrate, the research attempts, particularly over the past half century, to make sense of style differences. In several respects this book is unique in that it contains material that is not covered in any other and draws together the various aspects of psychology relevant to the study of individual differences. It is in this sense both a textbook and a source of reference for many professionals working in a range of contexts. The content of the book has

relevance for a wide audience.

Handbook of Student Engagement Interventions Jennifer A. Fredricks, Amy L. Reschly, Sandra L.

Christenson.2019-05-04 Handbook of Student Engagement Interventions: Working with Disengaged Students provides an understanding of the factors that contribute to student disengagement, methods for identifying students at risk, and intervention strategies to increase student engagement. With a focus on translating research into best practice, the book pulls together the current research on engagement in schools and empowers readers to craft and implement interventions. Users will find reviews on evidence-based academic, behavioral, social, mental health, and community-based interventions that will help increase all types of engagement. The book looks at ways of reducing suspensions through alternative disciplinary practices, the role resiliency can play in student engagement, strategies for community and school collaborations in addressing barriers to engagement, and what can be learned from students who struggled in school, but succeeded later in life. It is a hands-on resource for educators, school psychologists, researchers, and students looking to gain insight into the research on this topic and the strategies that can be deployed to promote student engagement. Presents practical strategies for engagement intervention and assessment Covers early warning signs of disengagement and how to use these signs to promote engagement Reviews contextual factors (families, peers, teachers) related to engagement Focuses on increasing engagement and school completion for all students Emphasizes multidimensional approaches to disengagement
