Knowledge, Science, and Literature in Early Modern Germany Gerhild Scholz Williams,Stephan K. Schindler.2020-10

Early modern Germany saw the dissemination of vast quantities of information at unprecedented speed. Popular knowledge, scientific inquiry, and scholarship influenced the political order, poetic expression, public opinion, and mechanisms of social control. This collection presents twelve essays by distinguished scholars regarding the transcendent nature of the Divine, the natural world, the body, sexuality, intellectual property, aesthetics, demons, and witches. The contributors are Thomas Cramer, Walter Haug, C. Stephen Jaeger, Thomas DaCosta Kaufmann, Jan-Dirk Maller, James A. Parente, Jr., Stephan K. Schindler, Gerhard F. Strasser, Lynne Tatlock, Elaine Tennant, Horst Wenzel, and Gerhild Scholz Williams.

Redescription Mining Esther Galbrun,Pauli Miettinen.2018-01-10 This book provides a gentle introduction to redescription mining, a versatile data mining tool that is useful to find distinct common characterizations of the same objects and, vice versa, to identify sets of objects that admit multiple shared descriptions. It is intended for readers who are familiar with basic data analysis techniques such as clustering, frequent itemset mining, and classification. Redescription mining is defined in a general way, making it applicable to different types of data. The general framework is made more concrete through many practical examples that show the versatility of redescription mining. The book also introduces the main algorithmic ideas for mining redescriptions, together with applications from various domains. The final part of the book contains variations and extensions of the basic redescription mining problem, and discusses some future directions and open questions.

Literarische Perspektiven auf den Kapitalismus Annika Gonnermann,Sina Schuhmaier,Lisa Schwander.2021-03-08

Über die Epochen hinweg haben sich literarische Werke und Genres explizit oder implizit mit dem Kapitalismus auseinandergesetzt. Doch gerade die vergangenen Jahrzehnte, in welchen der Kapitalismus nach Mark Fisher zum

ausweglosen Vorstellungshorizont avanciert ist, zeugen von einer vermehrten Infragestellung des Kapitalismus in der literarischen Produktion sowie der Literaturwissenschaft. Vor diesem Hintergrund vereint der interdisziplinäre Sammelband Beiträge aus der Germanistik, Romanistik, Amerikanistik und Anglistik, die den Blick auf verschiedene zeitgenössische Manifestationen des globalen Kapitalismus und deren literarische oder filmische Repräsentationen richten.

Calcidius on Plato's Timaeus Gretchen Reydam-Schils. 2020-09-24 This is the first study to assess in its entirety the fourth-century Latin commentary on Plato's *Timaeus* by the otherwise unknown Calcidius, also addressing features of his Latin translation. The first part examines the authorial voice of the commentator and the overall purpose of the work; the second part provides an overview of the key themes; and the third part reassesses the commentary's relation to Stoicism, Aristotle, potential sources, and the Christian tradition. This commentary was one of the main channels through which the legacy of Plato and Greek philosophy was passed on to the Christian Latin West. The text, which also establishes a connection between Plato's cosmology and Genesis, thus represents a distinctive cultural encounter between the Greek and the Roman philosophical traditions, and between non-Christian and Christian currents of thought.

Chaos Bound N. Katherine Hayles. 2018-03-15 N. Katherine Hayles here investigates parallels between contemporary literature and critical theory and the science of chaos. She finds in both scientific and literary discourse new interpretations of chaos, which is seen no longer as disorder but as a locus of maximum information and complexity. She examines structures and themes of disorder in *The Education of Henry Adams*, Doris Lessing's *Golden Notebook*, and works by Stanislaw Lem. Hayles shows how the writings of poststructuralist theorists including Barthes, Lyotard, Derrida, Serres, and de Man incorporate central features of chaos theory.

TransArea Ottmar Ette. 2016-07-11 Ottmar Ette's *TransArea* proceeds from the thesis that globalization is not a recent phenomenon, but rather, a process of long duration that may be divided into four main phases of accelerated globalization. These phases connect our present, across the world's widely divergent modern eras, to the period of early modern history. Ette demonstrates how the literatures of the world make possible a tangible perception of that which constitutes Life, both of our planet and on our planet, which may only be understood through the application of multiple logics. There is no substitute for the knowledge of literature: it is the knowledge of life, from life. This English translation will be of great interest to English-speaking scholars in the fields of Global and Area Studies, Literary Studies, Cultural Studies, History, Political Science, and many more. About the author Ottmar Ette has been Chair of Romance Literature at the University of Potsdam,

Germany, since 1995. He is Honorary Member of the Modern Language Association of America (MLA) (elected in 2014), member of the Berlin-Brandenburg Academy of Sciences and Humanities (elected in 2013), and regular member of the Academia Europaea (since 2010).

German-Jewish History in Modern Times Mordechai Breuer.1996 This four-volume collective project by a team of leading scholars offers a vivid portrait of Jewish history in German-speaking countries over nearly four centuries. This series is sponsored by the Leo Baeck Institute, established in 1955 in Jerusalem, London, and New York for the purpose of advancing scholarship on the Jews in German-speaking lands.

Farewell to Matters of Principle Odo Marquard.1989-12-28 This book is the latest addition to the Odéon series, a multidisciplinary series devoted to original works and translations by European writers in the areas of literature, criticism, philosophy, history and politics. An English translation of the German best-seller Abschied vom Prinzipiellen, the book offers a series of essays that present a philosophy of human morality critical of philosophical utopianism. Marquard, widely considered the heir of Gadamer, Habermas, and Blumenberg, describes his role as skeptical philosopher and discusses the 18th-century formation of such themes and disciplines as aesthetics, philosophical anthropology, philosophy of history, the nature of myth and attempts to account for it, and hermeneutics.

Somatoform Dissociation Ellert R. S. Nijenhuis.2004 The first comprehensive theory of somatoform dissociation. Expanding the definition of dissociation in psychiatry, Nijenhuis presents a summary of the somatoform components of dissociation-how sensory and motor functions are affected by dissociative disorders. Founded in the current view of mind-body integration, this book is essential reading for all mental health professionals engaged in the diagnosis, treatment, and study of dissociative disorders, PTSD, and other trauma-related psychiatric disorders.

Quantum Manjit Kumar.2008-10-02 'This is about gob-smacking science at the far end of reason ... Take it nice and easy and savour the experience of your mind being blown without recourse to hallucinogens' Nicholas Lezard, Guardian For most people, quantum theory is a byword for mysterious, impenetrable science. And yet for many years it was equally baffling for scientists themselves. In this magisterial book, Manjit Kumar gives a dramatic and superbly-written history of this fundamental scientific revolution, and the divisive debate at its core. Quantum theory looks at the very building blocks of our world, the particles and processes without which it could not exist. Yet for 60 years most physicists believed that quantum theory denied the very existence of reality itself. In this tour de force of science history, Manjit Kumar shows how the golden age of physics ignited the greatest intellectual debate of the twentieth century. Quantum theory is weird. In 1905, Albert Einstein suggested that light was a particle, not a wave, defying a century of experiments. Werner Heisenberg's uncertainty principle and Erwin Schrodinger's famous dead-and-alive cat are similarly strange. As Niels Bohr said, if you weren't shocked

by quantum theory, you didn't really understand it. While Quantum sets the science in the context of the great upheavals of the modern age, Kumar's centrepiece is the conflict between Einstein and Bohr over the nature of reality and the soul of science. 'Bohr brainwashed a whole generation of physicists into believing that the problem had been solved', lamented the Nobel Prize-winning physicist Murray Gell-Mann. But in Quantum, Kumar brings Einstein back to the centre of the quantum debate. Quantum is the essential read for anyone fascinated by this complex and thrilling story and by the band of brilliant men at its heart.

In the Course of Performance Bruno Nettl, Melinda Russell. 1998-12-15 In the Course of Performance is the first book in decades to illustrate and explain the practices and processes of musical improvisation. Improvisation, by its very nature, seems to resist interpretation or elucidation. This difficulty may account for the very few attempts scholars have made to provide a general guide to this elusive subject. With contributions by seventeen scholars and improvisers, In the Course of Performance offers a history of research on improvisation and an overview of the different approaches to the topic that can be used, ranging from cognitive study to detailed musical analysis. Such diverse genres as Italian lyrical singing, modal jazz, Indian classical music, Javanese gamelan, and African-American girls' singing games are examined. The most comprehensive guide to the understanding of musical improvisation available, In the Course of Performance will be indispensable to anyone attracted to this fascinating art. Contributors are Stephen Blum, Sau Y. Chan, Jody Cormack, Valerie Woodring Goertzen, Lawrence Gushee, Eve Harwood, Tullia Magrini, Peter Manuel, Ingrid Monson, Bruno Nettl, Jeff Pressing, Ali Jihad Racy, Ronald Riddle, Stephen Slawek, Chris Smith, R. Anderson Sutton, and T. Viswanathan.

Visual Culture and the Holocaust Barbie Zelizer. 2001 A book that looks at both the traditional and the unconventional ways in which the holocaust has been visually represented. The purpose of this volume is to enhance our understanding of the visual representation of the Holocaust - in films, television, photographs, art and museum installations and cultural artifacts - and to examine the ways in which these have shaped our consciousness. The areas covered include the Eichman Trial as covered on American television, the impact of Schindler's List, the Jewish Museum in Berlin, the Israeli Heritage Museums, Women and Holocaust Photography, Internets.

Adhesives and Adhesive Tapes Gerhard Gierenz, Werner Karmann. 2008-09-26 Adhesion is among the oldest technologies known to mankind, but the technology of adhesives began to boom with the developments in chemistry in the early 1900s.

The last few years have seen tremendous progress in the performance of adhesives, allowing two pieces to be connected inseparably. Modern adhesives perform so well that more sophisticated joining methods, e.g. welding, can often be replaced by adhesion, meaning that adhesives have found new areas of application. This book allows readers to quickly gain an overview of the adhesives available and to select the best adhesive for each purpose.

The Radio Family Ingeborg Bachmann.2021 Ingeborg Bachmann (1926-1973) is recognized as one of post-war German literature's most important novelists, poets, and playwrights. Influenced by Hans Weigel and the legendary literary circle Gruppe 47, Bachmann gained international renown for her poems, short stories, and novels, and won numerous awards for her work. Sadly, her life ended abruptly in October of 1973 when a lit cigarette burned down her apartment causing Bachmann to suffer severe burns that would eventually prove fatal. The author was only forty-seven, and her tragic death left what could have been a long and lustrous writing career regrettably stunted. Nearly twenty years after her death, during an estate sale in Vienna, fifteen episodes of the popular Viennese radio drama The Radio Family were discovered. Remarkably, they happened to be written by Ingeborg Bachmann herself, who had been a writer on the show just after she graduated university. The Radio Family was a popular radio soap opera broadcast in the American sector of occupied Vienna in the 1950s. The program focused on a middle-class Viennese family and their everyday life. Topics ranged from birthday parties and holiday plans to profiteering and currency fraud in the commercial sector, and Austrians' involvement in the Nazi past. All fifteen scripts have now been compiled and masterfully translated, revealing an early and significant piece of Bachmann's body of work, while simultaneously offering a rare glimpse into Vienna's quotidian history.

The Marshmallow Test Walter Mischel.2014-09-23 Renowned psychologist Walter Mischel, designer of the famous Marshmallow Test, explains what self-control is and how to master it. A child is presented with a marshmallow and given a choice: Eat this one now, or wait and enjoy two later. What will she do? And what are the implications for her behavior later in life? The world's leading expert on self-control, Walter Mischel has proven that the ability to delay gratification is critical for a successful life, predicting higher SAT scores, better social and cognitive functioning, a healthier lifestyle and a greater sense of self-worth. But is willpower prewired, or can it be taught? In The Marshmallow Test, Mischel explains how self-control can be mastered and applied to challenges in everyday life--from weight control to quitting smoking, overcoming heartbreak, making major decisions, and planning for retirement. With profound implications for the choices we make in parenting, education, public policy and self-care, The Marshmallow Test will change the way you think about who we are and what we can be.

Plato's forms, mathematics and astronomy Theokritos Kouremenos.2018-05-22 Plato's view that mathematics paves the way for his philosophy of forms is well known. This book attempts to flesh out the relationship between mathematics and

philosophy as Plato conceived them by proposing that in his view, although it is philosophy that came up with the concept of beings, which he calls forms, and highlighted their importance, first to natural philosophy and then to ethics, the things that do qualify as beings are inchoately revealed by mathematics as the raw materials that must be further processed by philosophy (mathematicians, to use Plato's simile in the Euthedemus, do not invent the theorems they prove but discover beings and, like hunters who must hand over what they catch to chefs if it is going to turn into something useful, they must hand over their discoveries to philosophers). Even those forms that do not bear names of mathematical objects, such as the famous forms of beauty and goodness, are in fact forms of mathematical objects. The first chapter is an attempt to defend this thesis. The second argues that for Plato philosophy's crucial task of investigating the exfoliation of the forms into the sensible world, including the sphere of human private and public life, is already foreshadowed in one of its branches, astronomy.

Discard Studies Max Liboiron, Josh Lepawsky. 2022-05-24 An argument that social, political, and economic systems maintain power by discarding certain people, places, and things. Discard studies is an emerging field that looks at waste and wasting broadly construed. Rather than focusing on waste and trash as the primary objects of study, discard studies looks at wider systems of waste and wasting to explore how some materials, practices, regions, and people are valued or devalued, becoming dominant or disposable. In this book, Max Liboiron and Josh Lepawsky argue that social, political, and economic systems maintain power by discarding certain people, places, and things. They show how the theories and methods of discard studies can be applied in a variety of cases, many of which do not involve waste, trash, or pollution. Liboiron and Lepawsky consider the partiality of knowledge and offer a theory of scale, exploring the myth that most waste is municipal solid waste produced by consumers; discuss peripheries, centers, and power, using content moderation as an example of how dominant systems find ways to discard; and use theories of difference to show that universalism, stereotypes, and inclusion all have politics of discard and even purification—as exemplified in “inclusive” efforts to broaden the Black Lives Matter movement. Finally, they develop a theory of change by considering “wasting well,” outlining techniques, methods, and propositions for a justice-oriented discard studies that keeps power in view.

The Lives of a Cell Lewis Thomas. 1978-02-23 Elegant, suggestive, and clarifying, Lewis Thomas's profoundly humane vision explores the world around us and examines the complex interdependence of all things. Extending beyond the usual limitations of biological science and into a vast and wondrous world of hidden relationships, this provocative book explores in personal, poetic essays to topics such as computers, germs, language, music, death, insects, and medicine. Lewis Thomas writes, Once you have become permanently startled, as I am, by the realization that we are a social species, you tend to keep an eye out for the pieces of evidence that this is, by and large, good for us.

Names in the Economy Terhi Ainiola, Ulla Hakala, Paula Sjöblom. 2014-07-18 The economy has an increasingly powerful

role in the contemporary global world. Academic scholars who study names have recognised this, and, as such, onomastic research has expanded from personal and place names towards names that reflect the new commercial culture. Companies are aware of the significance of naming. Brand, product and company names play an important role in business. Culture produces names and names produce culture. Commercial names shape cultures, on the one hand, and changes in cultures may affect commercial names on the other. The world of the economy and business has created its own culture of names, but this naming culture may also affect other names; even place names and personal names are influenced by it. Names in the Economy: Cultural Prospects is composed of 20 articles that were produced from a collection of papers presented in 2012 at the fourth Names in the Economy symposium in Turku, Finland. These articles will equally be of interest to both academics and professionals. The goal of this book is multidisciplinary and theoretically diverse: it contemplates commercial-bound names from the viewpoints of linguistics and onomastics, as well as marketing and branding research. In addition to traditional onomastic standpoints, there are newer linguistic theories, sociological and communicational views, multimodality theory, and branding theories. The authors are scholars from three continents and from ten different countries.

Writing Across Cultures Angel Rama.2012-05-29 Ángel Rama was one of twentieth-century Latin America's most distinguished men of letters. Writing across Cultures is his comprehensive analysis of the varied sources of Latin American literature. Originally published in 1982, the book links Rama's work on Spanish American modernism with his arguments about the innovative nature of regionalist literature, and it foregrounds his thinking about the close relationship between literary movements, such as modernism or regionalism, and global trends in social and economic development. In Writing across Cultures, Rama extends the Cuban anthropologist Fernando Ortiz's theory of transculturation far beyond Cuba, bringing it to bear on regional cultures across Latin America, where new cultural arrangements have been forming among indigenous, African, and European societies for the better part of five centuries. Rama applies this concept to the work of the Peruvian novelist, poet, and anthropologist José María Arguedas, whose writing drew on both Spanish and Quechua, Peru's two major languages and, by extension, cultures. Rama considered Arguedas's novel *Los ríos profundos* (Deep Rivers) to be the most accomplished example of narrative transculturation in Latin America. Writing across Cultures is the second of Rama's books to be translated into English.

Autonomous Driving Markus Maurer,J. Christian Gerdes,Barbara Lenz,Hermann Winner.2016-05-21 This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How

will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of "autonomous driving."

Thales Georg Wöhrle, Richard McKirahan. 2014-10-29 In accordance with the purpose of the series *Traditio Praesocratica*, the present volume, the first in the series, contains the most complete collection ever assembled of the documentary evidence on Thales of Miletus. Approximately 600 texts, dating from the sixth century BCE to the fourteenth century CE, are presented in chronological order, both in the original language (Greek, Latin, Arabic and Persian) and in a facing English translation. The original-language texts are reprinted (with corrections) from Georg Wöhrle's edition (2009). Several texts discovered since the publication of the 2009 edition are included. The English translations were made by Richard McKirahan from the original texts. Differences between the German and the English translations are noted. An index of names and extensive glossaries and word indexes of the texts and translations are provided.

The Biological Mind Alan Jasanoff. 2018-03-13 A pioneering neuroscientist argues that we are more than our brains. To many, the brain is the seat of personal identity and autonomy. But the way we talk about the brain is often rooted more in mystical conceptions of the soul than in scientific fact. This blinds us to the physical realities of mental function. We ignore bodily influences on our psychology, from chemicals in the blood to bacteria in the gut, and overlook the ways that the environment affects our behavior, via factors varying from subconscious sights and sounds to the weather. As a result, we alternately overestimate our capacity for free will or equate brains to inorganic machines like computers. But a brain is neither a soul nor an electrical network: it is a bodily organ, and it cannot be separated from its surroundings. Our selves aren't just inside our heads--they're spread throughout our bodies and beyond. Only once we come to terms with this can we grasp the true nature of our humanity.

Toby Alone Timothée de Fombelle. 2010-08-10 Translated into twenty-two languages.
