Consisting of two parts: "Representation and Analysis" and "Concept and Creation", this second volume gathers selected contributions on topics ranging from graphic representation to the graphic presentation of ideas, i.e. artistic creation, to bridge the gap between graphic heritage and the graphics of heritage. Given its scope, this volume will appeal to architectural and graphic designers, artists and engineers, providing them with extensive information on new methods and a source of inspiration for future research and interdisciplinary collaborations.

A Different Sea Claudio Magris, 2011-05-31 An illuminating portrait of a world in ferment after the First world War, and a man seeking an authentic life. Early this century Enrico, a young intellectual, leaves the city of Gorizia with its abundant population and culture, to spend several years living on the Patagonian pampas, alone with his ancient Greek texts, his flocks and, every now and then, a woman. He has been taught by his closest friend, Carlo, a philosopher/poet who commits suicide in his early twenties, to search for an authentic life, free of social falsehoods. But in his search for this unattainable goal, Enrico destroys every chance he has of a normal existence. This is portrait of a world in ferment, a decaying empire shaken by war and revolution, and a life-long search for meaning.

Missoni Luciano Caramel, Luca Missoni, Emma Zanella, Ali Kazma, 2016 Rosita and Ottavio Missoni launched their eponymous fashion house in the 1950s, combining art and fashion to create a unique style that is recognized all over the world. This book is both a celebration of the unmistakable Missoni style, whose innovative approach mixes color, pattern, and matter with an extraordinary sense of balance, and an exploration of works by artists who have influenced the designers over the course of their creative, cultural, and artistic journey.

Folklore by the Fireside Alessandro Falassi, 2014-07-03 For centuries, social life in rural Tuscany has centered around the veglia, an evening gathering of family and friends at the hearth. Folklore by the Fireside is a thorough and insightful study of this custom—from the tales, riddles, lullabies, and folk prayers performed as the small children are put to bed to the courtship songs and dances later in the evening to the anti-veglia male gossip, card games, and protest songs originating in the tavern. Alessandro Falassi skillfully correlates the veglia to the rites of passage and family values of an agrarian society. Although the impact of mass media and other factors has tended to weaken the tradition, even today Tuscan children are taught to behave and adolescents are guided along the conventional path to adulthood, courtship, and marriage through veglia folklore. This is the first work to deal systematically with Tuscan folklore from a semiotic and structural viewpoint and to examine the veglia as a means of handing down traditional values. It is important not only for its careful, detailed

description but also for its rigorous methodology and theoretical richness.

Homosexuality and Italian Cinema Mauro Giori, 2017-11-18 This book is the first to establish the relevance of same-sex desires, pleasures and anxieties in the cinema of post-war Italy. It explores cinematic representations of homosexuality and their significance in a wider cultural struggle in Italy involving society, cinema, and sexuality between the 1940s and 1970s. Besides tracing the evolution of representations through both art and popular films, this book also analyses connections with consumer culture, film criticism and politics. Giori uncovers how complicated negotiations between challenges to and valorization of dominant forms of knowledge of homosexuality shaped representations and argues that they were not always the outcome of hatred but also sought to convey unmentionable pleasures and complicities. Through archival research and a survey of more than 600 films, the author enriches our understanding of thirty years of Italian film and cultural history.

Architecture of the Well-Tempered Environment Reyner Banham, 2022-07-26 Reyner Banham was a pioneer in arguing that technology, human needs, and environmental concerns must be considered an integral part of architecture. No historian before him had so systematically explored the impact of environmental engineering on the design of buildings and on the minds of architects. In this revision of his classic work, Banham has added considerable new material on the use of energy, particularly solar energy, in human environments. Included in the new material are discussions of Indian pueblos and solar architecture, the Centre Pompidou and other high-tech buildings, and the environmental wisdom of many current architectural vernaculars.
