Novantiqua Paolo Valesio.1980-11-22 This is an important book: original, erudite, useful and ambitious. —Quarterly Journal of Speech A remarkable book . . . sure to be of lasting interest . . . to be reckoned with by all rhetorical theorists. —Choice This is the first contemporary attempt at a holistic theory of rhetoric, well grounded in the context of cultural and social history. Arguing that rhetoric has always been an independent, objective, essential factor in human interaction, Valesio views it as coextensive with human speech in use.

Rhetoric as Philosophy Ernesto Grassi.2000-12-31 By going back to the Italian humanist tradition and aspects of earlier Greek and Latin thought, Ernesto Grassi develops a conception of rhetoric as the basis of philosophy. Grassi explores the sense in which the first principles of rational thought come from the metaphorical power of the word. He finds the basis for his conception in the last great thinker of the Italian humanist tradition, Giambattista Vico (1668-1744). He concentrates on Vico's understanding of imagination and the sense of human ingenuity contained in metaphor. For Grassi, rhetorical activity is the essence and inner life of thought when connected to the metaphorical power of the word. Originally published in English in 1980, *Rhetoric as Philosophy* has been out of print for some time. In his foreword to this reprint edition, Burke scholar Timothy W. Crusius rues the lack of concentrated attention to Grassi because what he had to say about rhetoric is at least as significant as, for example, what Kenneth Burke taught us.

Graphical Heritage Luis Agustín-Hernández,Aurelio Vallespín Muniesa,Angélica Fernández-Morales.2020-05-11 This book presents the proceedings of the 18th International Conference on Graphic Design in Architecture, EGA 2020, focusing on heritage - including architectural and graphic heritage as well as the graphics of heritage. Consisting of two parts: “Representation and Analysis” and “Concept and Creation”, this second volume gathers selected contributions on topics

ranging from graphic representation to the graphic presentation of ideas, i.e. artistic creation, to bridge the gap between graphic heritage and the graphics of heritage. Given its scope, this volume will appeal to architectural and graphic designers, artists and engineers, providing them with extensive information on new methods and a source of inspiration for future research and interdisciplinary collaborations.

The Vienna Melody Ernst Lothar.2015-07-21 All Vienna knows that the inhabitant of number 10 Seilerstatte is none other than Christopher Alt, piano maker, the best in Vienna, probably in all of Austria, and possibly the world over. His piano keys have given life to melodies by Mozart, Haydn, Beethoven, and many more. On his deathbed, moved by the wish to keep his children united, he leaves a will specifying that his descendants, if they are to get their inheritance, must live together in the family home. Over successive generations of the Alt family, history itself passes through the doors, down the halls, and into the private rooms of the Alt's building. There is intrigue at the court of Franz-Josef: an heir to the throne has fallen in love with Henrietta Alt, who will have to carry the guilt for his eventual suicide. There are betrayals, beloved illegitimate children, and despised legitimate offspring. There are seething passions and icy relations, a world war and the rise of Nazism to contend with. There are duals, ambitions, hopes, affairs of the heart and affairs of state. Three generations of Alts live and die at number 10 Silerstatte and each member of the family, in his or her own way, is a privileged witness to the winds of change and a Europe at the height of both its splendor and decadence

Faces of Geometry. From Agnesi to Mirzakhani Paola Magnaghi-Delfino, Giampiero Mele, Tullia Norando.2019-10-08 The volume reports on interdisciplinary discussions and interactions between theoretical research and practical studies on geometric structures and their applications in architecture, the arts, design, education, engineering, and mathematics. These related fields of research can enrich each other and renew their mutual interest in these topics through networks of shared inspiration, and can ultimately enhance the quality of geometry and graphics education. Particular attention is dedicated to the contributions that women have made to the scientific community and especially mathematics. The book introduces engineers, architects and designers interested in computer applications, graphics and geometry to the latest advances in the field, with a particular focus on science, the arts and mathematics education.

Geometry of the Passions Remo Bodei. 2018-08-08 The passions have long been condemned as a creator of disturbance and purveyor of the temporary loss of reason, but as Remo Bodei argues in *Geometry of the Passions*, we must abandon the perception that order and disorder are in a constant state of collision. By means of a theoretical and historical analysis, Bodei interprets the relationship between passion and reason as a conflict between two complementary logics. *Geometry of the Passions* investigates the paradoxical conflict-collaboration between passions and reason, and between individual and political projects. Tracing the roles passion and reason have played throughout history, including in the political agendas of Descartes, Hobbes, and the French Jacobins, *Geometry of the Passions* reveals how passion and reason may be used as a vehicle for affirmation rather than self-enslavement.

The Swallows of Monte Cassino Frederika Randall.2013-10-14 The Strega Prize-winning author of *The Girl with a Leica* delivers a novel that hinges on one of the bloodiest World War II battles and those who fought it. In this highly original novel, Janeczek retells the four-month-long Battle of Monte Cassino from the point of view of the Maori, Gurkha, Polish, North African, small-town American and other Allied foot soldiers who fought and died under German fire near that 6th century Benedictine abbey. Twined through the battle is another story, a memory of the drowned and the saved in Janeczek's own family in wartime Eastern Europe, where Jews who did not go to Nazi death camps went to Soviet gulag camps, and sometimes survived, and even went on to fight at Monte Cassino. A powerful reflection on all the ways that rights can be taken from us. "Helena Janeczek's novel is this: a tattoo etched on the skin, and not painlessly. A vast design that brings together threads from all the various lives that converged in that legendary battle. The beauty of her tale lies in its structure, the way opposites converge: the chaos of battle and the silence of the defeated, ordinariness and the heroism of the powerless, carefully guarded memory and impetuous youth, the past perpetually intertwined with the present." —Roberto Saviano, author of *Gomorra*
