With a clear presentation, *Ethics: Theory and Practice* educates readers about ethical theory and has them apply what they learn to specific classic and contemporary moral problems (lying, cheating, establishing ethical business practices, honoring ethical obligations in medicine, etc.). Jacques P. Thiroux first wrote this text 1977 in order to educate readers about ethical theory and its applications in a way that beginning students could understand. The result was an accessible text that isn't too technical and doesn't plunge into complex readings without sufficient background. The text is fully updated with global issues and non-Western ethical views. Keith W. Krasemann now continues Thiroux's efforts of making Ethical Ideas accessible to students. Besides updating the foundations of the text, Krasemann incorporates new and relevant material, most of which is often unique only to this text.

**Ethics: Theory and Practice** Y. V. Satyanarayana, 2009 Ethics is a part of philosophy that is concerned with living well and choosing the right course of action. The choice of the course of action is based on moral reasoning and there is no single moral theory on which we can base the choices that we make. The application of moral standards in life is also the concern of Ethics: Theory and Practice, which deals with moral theories in Indian and Western philosophical traditions as well as the debates that centre around their application. The book has ten chapters—the first chapter presents what morality and moral reasoning is; the second chapter is a critical survey of some popular concepts of Indian ethics; the third chapter surveys Western moral theories and the remaining seven chapters cover a variety of contemporary moral issues that are

controversial as well as inescapable. They deal with issues like capital punishment, civil disobedience, euthanasia, and women's rights.

**Christian Ethics** Norman L. Geisler, 2010 This update of a classic text evaluates contemporary ethical options and pressing issues of the day from a biblical perspective.

*Ethics* William H. Bruening, 1995

*The Practice of Ethics* Hugh LaFollette, 2006-11-22 The Practice of Ethics is an outstanding guide to the burgeoning field of applied ethics, and offers a coherent narrative that is both theoretically and pragmatically grounded for framing practical issues. Discusses a broad range of contemporary issues such as racism, euthanasia, animal rights, and gun control. Argues that ethics must be put into practice in order to be effective. Draws upon relevant insights from history, psychology, sociology, law and biology, as well as philosophy. An excellent companion to LaFollette's authoritative anthology, *Ethics in Practice: An Anthology*, Third Edition (Blackwell, 2006).

**Nursing Care of Children and Young People with Long-Term Conditions** Mandy Brimble, Peter McNee, 2020-12-29 The second edition of *Nursing Care of Children and Young People with Long Term Conditions* remains the only nursing-specific text on the care of paediatric patients with chronic illness. Written to meet the needs of nursing students and professionals alike, this comprehensive volume provides authoritative and up-to-date information on the context, theory, and practice of delivering holistic care to children and families in a range of health and social care settings. Contributions from a team of experienced academics, educators, and practitioners offer valuable insight into the impact of chronic illness on children and parents, the practical implications of meeting their physical, psychological, and social needs, empowering them to be 'experts' in their care, and many more vital aspects of long-term paediatric care. This edition features new and revised content reflecting contemporary guidelines and evidence-based practice, including updated clinical case studies and a new chapter examining the impact of having a sibling with a long-term condition. Emphasising a multi-disciplinary approach to managing chronic illness, this important resource: Provides numerous case studies and activities illustrating the application of theoretical principles and current evidence in nursing practice Investigates the genetic basis of chronic illness and the differing onsets of long-term conditions Discusses current political, economic, and social policies that are influencing healthcare for children and bringing challenges to managers and practitioners Examines both classic and contemporary theories of grief, loss, coping, and adaptation Explores ethical, legal, and professional aspects of nursing children and young people with chronic illness Addresses evolving nursing roles, the importance of acute emergency care, and the planning and delivery of effective transition from child to adult services *Nursing Care of Children and Young People with Long Term Conditions* is required reading for student and registered children's nurses, as well as for practitioners in related health and social care disciplines.

**Case Studies in Pharmacy Ethics** Robert Veatch, Amy Haddad, 2010-04-10 Pharmacists face ethical choices constantly - sometimes dramatic life-and-death decisions, but more often subtle, less conspicuous choices that are nonetheless important. Among the topics confronted are assisted suicide, conscientious refusal, pain management, equitable distribution of drug resources within institutions and managed care plans, confidentiality, and alternative and non-traditional therapies. Veatch and Haddad's book, first published in 1999, was the first collection of case studies based on the real experiences of practicing pharmacists, for use as a teaching tool for pharmacy students. The second edition accounts for the many changes in pharmacy since 1999, including assisted suicide in Oregon, the purchasing of less expensive drugs from Canada, and the influence of managed care on prescriptions. The presentation of some cases is shortened, most are revised and updated, and two new chapters have been added. The first new chapter presents a new model for analyzing cases, while the second focuses on the ethics of new drug distribution systems, for example hospitals where pharmacists are forced to choose drugs based on cost-effectiveness, and internet based pharmacies.
