Losing Earth Nathaniel Rich.2020-03-05 By 1979, we knew all that we know now about the science of climate change - what was happening, why it was happening, and how to stop it. Over the next ten years, we had the very real opportunity to stop it. Obviously, we failed.Nathaniel Rich's groundbreaking account of that failure - and how tantalizingly close we came to signing binding treaties that would have saved us all before the fossil fuels industry and politicians committed to anti-scientific denialism - is already a journalistic blockbuster, a full issue of the New York Times Magazine that has earned favorable comparisons to Rachel Carson's *Silent Spring* and John Hersey's *Hiroshima*. Rich has become an instant, in-demand expert and speaker. A major movie deal is already in place. It is the story, perhaps, that can shift the conversation.In the book *Losing Earth*, Rich is able to provide more of the context for what did - and didn't - happen in the 1980s and, more important, is able to carry the story fully into the present day and wrestle with what those past failures mean for us in 2019. It is not just an agonizing revelation of historical missed opportunities, but a clear-eyed and eloquent assessment of how we got to now, and what we can and must do before it's truly too late.

Urban Public Health Gina S. Lovasi,Ana V. Diez Roux,Jennifer Kolker.2020 Any discussion about urban health will begin with the fact that most of humanity now lives in urban areas. About a decade into the 21st century, the urban portion of the global population surpassed 50 percent. This shift to majority urban will come last to Africa, where the rate of urban growth is the highest in the world. How has this centuries-long transformation in human settlement affected how we think about public health research and practice? The answer: not enough. Urban health has been a niche area, much as the climate crisis has been a niche area in environmental science. It is clear that this must change because urban is how people now live. **URBAN PUBLIC HEALTH: A Research Toolkit for Practice and Impact** is a valuable addition to the surprisingly slim number of books that investigate what urban health means and why its study is both distinct and important. Carefully crafted and thoughtful chapters grapple with the complexity of the urban setting as a physical and social space. The volume will appeal to

a varied audience, including researchers, students and practitioners alike--

Inside the Space Ships George Adamski.2018-03-12 What has happened to George Adamski since he wrote the famous incidents in *Flying Saucers Have Landed*? Since the memorable November 20, 1952, when he first made personal contact with a man from another world? Since December 13, 1952 when he was able to make photographs within 100 feet of the same saucer that had brought his original visitor? *Inside The Space Ships* is Adamski's own story of what has happened to him since then. It begins with his first meeting, a few months later, with a second man from another world—his first meeting with one who speaks to him. This second visitor brings him to a Venusian Scout (flying saucer) and this, in turn, brings him to a mother ship. Later he is conveyed in both a Saturnian Scout and a Saturnian mother ship. Adamski tells us what transpires in these space craft and what the men and women from other worlds have told him. Adamski's photographs of flying saucers, originally published in *Flying Saucers Have Landed*, have since become world-famous as other witnesses in other parts of the world have succeeded in taking photographs identical with his. Now, however, in *Inside The Space Ships*, Adamski gives us 16 photographs and illustrations, no longer of Scouts (flying saucers) mostly, but of the great space ships from which they are launched. The main group of these photographs was taken in April, 1955, and neither the photographs nor a description of them has ever been published before.

The Palgrave International Handbook of Peace Studies Wolfgang Dietrich,J. Echavarría Alvarez,G. Esteva,D. Ingruber,N. Koppensteiner,Josefina Echavarría Alvarez.2011-01-11 Thirty-four outstanding scholars write about the etymological meaning and the religious, legal and political connotations of the concept of 'peace'. They provide firm evidence to show how adopting a multi-faceted approach to 'peace' could ultimately contribute to the search for a more authentic understanding of 'peace' across the world stage.

Computational Movement Analysis Patrick Laube.2014-09-12 This SpringerBrief discusses the characteristics of spatiotemporal movement data, including uncertainty and scale. It investigates three core aspects of Computational Movement Analysis: Conceptual modeling of movement and movement spaces, spatiotemporal analysis methods aiming at a better understanding of movement processes (with a focus on data mining for movement patterns), and using decentralized

spatial computing methods in movement analysis. The author presents Computational Movement Analysis as an interdisciplinary umbrella for analyzing movement processes with methods from a range of fields including GIScience, spatiotemporal databases and data mining. Key challenges in Computational Movement Analysis include bridging the semantic gap, privacy issues when movement data involves people, incorporating big and open data, and opportunities for decentralized movement analysis arising from the internet of things. The interdisciplinary concepts of Computational Movement Analysis make this an important book for professionals and students in computer science, geographic information science and its application areas, especially movement ecology and transportation research.

Perspectives on a Dynamic Earth T. R. Paton,Jane Clarke.1986

All of a Sudden Jörg Heiser.2008 Since the mid-nineties, contemporary art has been booming like never before. There is more of everything--more artists, more collectors, more galleries, more art fairs, more museums, more biennials, more interest, more industry, more pop, more hype. Some art professionals feel prompted by all this to reach for the revolvers of cultural pessimism: Mass Stupidity Is Killing Great Art! Others--often the same people a short while later--defect with all the greater abandon to the alleged enemy. The entrenched battle between defenders of art's autonomy and champions of its merging with entertainment culture continues. There is more of everything, with one exception: criteria. Criteria with which the art of the moment can be understood, judged, praised and, if need be, damned--without getting bogged down in this eternal trench warfare. In *All of a Sudden: Things that Matter in Contemporary Art*, Jörg Heiser provides a sharp summary of contemporary art since Marcel Duchamp. Using many artworks as example, the author shows that art is more than just a randomly chosen cultural field of activity in which to acquire a little specialist knowledge to show off with. When it's good, he claims, art hits where it hurts, striking at the heart of an ossified status quo by which it itself was brought forth. Perhaps this is something art since Modernism has in common with slapstick. Instead of just aiming to shock and outrage, it shows authority losing its grip. Instead of inflating itself, it deflates the pompous in the name of art. The *Frankfurter Allgemeine Zeitung* finds the book astonishingly enlightening. The *Frankfurter Rundschau* praises Heiser for finally opening the eyes of his readers--something many of his colleagues have been unable to do. Jörg Heiser (*1968) lives in Berlin. He is co-editor of *frieze* magazine, writes for the national daily *Süddeutsche Zeitung*, and is a frequent contributor to art catalogues and publications. He curated the exhibitions *Romantic Conceptualism* (2007, Kunsthalle Nürnberg, BAWAG Foundation Vienna)

and Funky Lessons (2004/2005, BüroFriedrich Berlin, BAWAG Foundation Vienna).

The Familiar Enemy Ardis Butterfield.2009-12-10 The Familiar Enemy examines the linguistic, literary, and cultural identities of England and France during the Hundred Years War. It explores works by Deschamps, Charles d'Orléans, and Gower, as well as Chaucer who, the book argues, must be resituated within the context of the multilingual cultural geography of medieval Europe.

Biodiversity N. Biedinger,Wilhelm Barthlott,Matthias Winiger.2013-06-29 Biodiversity, sometimes simply understood as diversity of species, is a specific quality of life on our planet, the dimensions and importance of which have just lately been fully realized. Today we know that biological diversity is a global asset of incalculable value to present and future generations (Kofi Annan). Biodiversity is spread unequally over the world: in fact, the main share of biological resources worldwide is harboured predominantly by the so-called developing countries in the tropics and sub tropics. Therefore, Biodiversity - A Challenge for Development Research and Policy was chosen as the title for an international conference which was held in Bonn in 1997 as one of the first major events organized by the then newly established North-South Centre for Development Research (ZEF) at Rheinische Friedrich-Wilhelms-Universität Bonn (Germany). Since the ZEF, founded by the Senate of the University of Bonn in 1995, has played a central role in turning Bonn into a centre for international cooperation and North-South dialogue. The Centre is a product of the Bonn Berlin agreement of July 1994 which was adopted to offset the effects caused by the Parliament and much of the Government moving to Berlin. It fits in well with the double strategy to strengthen Bonn's position as an international science arena and as an eminent place for development policy and the national and supranational agencies dealing with this issue.

Volksgeist as Method and Ethic George W. Stocking.1996-07-01 Franz Boas, the major founding figure of anthropology as a discipline in the United States, came to America from Germany in 1886. This volume in the highly acclaimed History of Anthropology series is the first extensive scholarly exploration of Boas' roots in the German intellectual tradition and late nineteenth-century German anthropology, and offers a new perspective on the historical development of ethnography in the United States.

It offers innovative approaches to the understanding of such diverse clinical topics as child abuse, borderline personality disorder, dissociation, adolescent suicide, treatment responsiveness, false memory, narrative competence, and the intergenerational transmission of trauma.

The History of the Book in the East Peter F. Kornicki.2013-07-28 This series on the history of the book in the East focuses

attention on three areas of the world which for a long time have been undeservedly left on the margins of the global history of the book: the Middle East, South Asia and East Asia. The importance of these three regions of the world lies not only in the sheer antiquity of printing in East Asia, where both movable type and wood blocks were used centuries before Gutenberg's invention changed the face of book production in Europe, but also in the manuscript traditions and very different responses to printing technology in the Middle East and South Asia. This series forms an important counterbalance to the Eurocentrism of the history of the book as practised in the West. The three volumes are edited by renowned experts in the field and each includes an introduction which provides an overview of research in the field. This series offers a significant benefit to students, lecturers and libraries as it brings together leading articles in the field from disparate journals which are often difficult to locate and of limited access. Students are thus able to study leading articles side by side for comparison whilst lecturers are provided with an invaluable 'one-stop' teaching resource.

Soucouyant David Chariandy.2007-09-01 A “soucoyant” is an evil spirit in Caribbean lore, a reminder of past transgressions that refuse to diminish with age. In this beautifully told novel that crosses borders, cultures, and generations, a young man returns home to care for his aging mother, who suffers from dementia. In his efforts to help her and by turn make amends for their past estrangement from one another, he is compelled to re-imagine his mother’s stories for her before they slip completely into darkness. In delicate, heartbreaking tones, the names for everyday things fade while at the same time a beautiful, haunted life, stained by grief, is slowly revealed. This publication meets the EPUB Accessibility requirements and it also meets the Web Content Accessibility Guidelines (WCAG-AA). It is screen-reader friendly and is accessible to persons with disabilities. A Simple book with few images, which is defined with accessible structural markup. Transrational Resonances Josefina Echavarría Alvarez,Daniela Ingruber,Norbert Koppensteiner.2018-02-28 This book comprehensively gathers the current academic literature, field expertise and artistic developments on Wolfgang Dietrich's Many Peaces theory, in the ways it has been conceptualized and practiced by peace and conflict workers around the world. Both scholars and practitioners challenge and creatively explore the field of transrational peace philosophy, contributing their insights on elicitive methods and conflict mapping. The book is further enriched by artistic perspectives on integrative approaches to theatre for living and intercultural soundscapes. The articles collected here respond with innovative strength and vigor to the worldwide need for further research on peace and for practical approaches to conflict transformation. This book therefore equally appeals to scholars, peacebuilders and practitioners as well as artists engaged in conflict transformation.

Patterns of Attachment Mary D. Salter Ainsworth,Mary C. Blehar,Everett Waters,Sally N. Wall.2015-06-26 Ethological attachment theory is a landmark of 20th century social and behavioral sciences theory and research. This new paradigm for understanding primary relationships across the lifespan evolved from John Bowlby's critique of psychoanalytic drive theory and his own clinical observations, supplemented by his knowledge of fields as diverse as primate ethology, control systems theory, and cognitive psychology. By the time he had written the first volume of his classic Attachment and Loss trilogy, Mary D. Salter Ainsworth's naturalistic observations in Uganda and Baltimore, and her theoretical and descriptive insights about maternal care and the secure base phenomenon had become integral to attachment theory. Patterns of Attachment reports the methods and key results of Ainsworth's landmark Baltimore Longitudinal Study. Following upon her naturalistic home observations in Uganda, the Baltimore project yielded a wealth of enduring, benchmark results on the nature of the child's

tie to its primary caregiver and the importance of early experience. It also addressed a wide range of conceptual and methodological issues common to many developmental and longitudinal projects, especially issues of age appropriate assessment, quantifying behavior, and comprehending individual differences. In addition, Ainsworth and her students broke new ground, clarifying and defining new concepts, demonstrating the value of the ethological methods and insights about behavior. Today, as we enter the fourth generation of attachment study, we have a rich and growing catalogue of behavioral and narrative approaches to measuring attachment from infancy to adulthood. Each of them has roots in the Strange Situation and the secure base concept presented in *Patterns of Attachment*. Its inclusion in the Psychology Press Classic Editions series reflects *Patterns of Attachment's* continuing significance and insures its availability to new generations of students, researchers, and clinicians.

Being Modern Robert Bud, Paul Greenhalgh, Frank James, Morag Shiach. 2018-10-10 In the early decades of the twentieth century, engagement with science was commonly used as an emblem of modernity. This phenomenon is now attracting increasing attention in different historical specialties. Being Modern builds on this recent scholarly interest to explore engagement with science across culture from the end of the nineteenth century to approximately 1940. Addressing the breadth of cultural forms in Britain and the western world from the architecture of Le Corbusier to working class British science fiction, Being Modern paints a rich picture. Seventeen distinguished contributors from a range of fields including the cultural study of science and technology, art and architecture, English culture and literature examine the issues involved. The book will be a valuable resource for students, and a spur to scholars to further examination of culture as an

interconnected web of which science is a critical part, and to supersede such tired formulations as 'Science and culture'.

Printing and Book Culture in Late Imperial China Cynthia J. Brokaw, Kai-Wing Chow. 2005-03-07 Despite the importance of books and the written word in Chinese society, the history of the book in China is a topic that has been little explored. This pioneering volume of essays, written by historians, art historians, and literary scholars, introduces the major issues in the social and cultural history of the book in late imperial China. Informed by many insights from the rich literature on the history of the Western book, these essays investigate the relationship between the manuscript and print culture; the emergence of urban and rural publishing centers; the expanding audience for books; the development of niche markets and specialized publishing of fiction, drama, non-Han texts, and genealogies; and more.

With the help of their thorough instructions and simple illustrations, you'll be on your way to becoming a pro paper crafter in no time at all - Sew magazine A wonderful insight into the work of a truly skilled artist - PaperCrafter The renowned and influential book artist Hedi Kyle shows you step-by-step how to create her unique designs using folding techniques in The Art of the Fold. Bookbinding and paper craft projects include flag books, blizzard books, the fishbone fold, and nesting boxes. Written by the doyenne of artists' books, Hedi Kyle, The Art of the Fold is a wonderful insight into the work of a truly skilled artist. Hedi will show you how to bind a book and fold paper to create over 35 of her cut-fold book designs. The book is beautifully illustrated with Hedi's finished works of art. An excerpt from the book: 'I can still remember the thrill I experienced when my first folded book structure emerged from my fingers - how eager I was to explore its possibilities and to share it with whoever was interested. The Flag Book, as I now call it, is a simple accordion and has interlocking pages oriented in opposite directions. Little did I know that this simple structure would have legs and be the catalyst for the next forty-plus years of thinking about and making books. The common perception of the book today is fairly straightforward: a series of pages organized around a spine and protected on either side by two covers. This format allows for easy access, storage and retrieval of information. Yet what happens when the book is stripped away of centuries of preconceptions and is allowed to reveal something else: playfulness, utility, invention? Expanding the notion of the book is what the structures in the following chapters of The Art of the Fold attempt to do. Exploring its tactile, sculptural form, primarily through folding methods, the book as a structural object is celebrated while content is considered in a new and unconventional way. My range in this medium has always been broad. In part this is due to my introduction to the world of

bookbinding and some chance encounters. In the 1970s in New York City, the art and craft of hand bookbinding and papermaking were experiencing an unprecedented revival. I was fortunate to arrive in the city at just this moment. With an art-school background and an impulse to make things, I was naturally drawn to pursue this new opportunity. The Center for Book Arts, the famous forerunner of so many centers yet to come, was located in a small storefront just down the street from where I lived on the Lower East Side of Manhattan. Under the direction of founder Richard Minsky, it had a radical mission: to push concept, materials, printing and making of artist books in a new direction. When Richard dared me to teach at the Center one evening a week, I was hooked. My career as a book conservator and a book artist has now spanned over 45 years. As head conservator at the American Philosophical Society in Philadelphia, I've had the opportunity to handle some of the rarest volumes and manuscripts in the world. I have also dealt with decrepit books, torn maps and countless curiosities discovered in stacks and archives. All were endless sources for ideas and provided a springboard for a departure from tradition. Leading book-arts workshops around the world and a 25 year tenure teaching in the graduate program for Book Arts and Printmaking at the University of the Arts in Philadelphia have shown me, in retrospect, that the more I taught, t
