History of Education in Nigeria A. Babs Fafunwa.2018-10-03 Originally published in 1974, a comprehensive history of Nigerian Education, from early times right through to the time of publication, had long been needed by all concerned with Education in Nigeria, students, teachers and educational administrators. No one was better qualified than Professor Fafunwa to provide such a book, and in doing so he gave due emphasis to the beginnings of Education in its three main stages of indigenous, Muslim and Christian Education. Nigerian Education had been considered all too often as a comparatively recent phenomenon, but this book points out from the start that 'Education is as old as Man himself in Africa' and that both Islam and Christianity were comparative newcomers in the field. A historical treatment of these three strands which have combined to make up the modern Educational system was vital to a clear understanding of what was needed for the future, and most of the first half of the book is concerned with these Educational beginnings. The imposing of a foreign colonial system on this framework did not always lead to a happy fusion of the systems, and the successes and the failures are examined in detail. There was no shortage of documentary evidence in the form of reports and statistics during the decades prior to publication, but this evidence was frequently scattered and inaccessible to the student, so that the author's careful selection of key evidence and reports, often drawn from his own personal experience, will be invaluable for those wishing to trace the development of Education in Nigeria up to the early 1970s. A knowledge of the history and development of the Nigerian Education system, of the numerous and intensely varied personalities and beliefs which have combined and often conflicted to shape it, is indispensable to all students in colleges and universities studying to become teachers. It is this knowledge that Professor Fafunwa set out to provide, drawing on his wide experience as teacher writer and educationalist.

Interdisciplinary Learning Through Dance Lynnette Young Overby, Beth C. Post, Diane Newman. 2005 The lesson plans in Interdisciplinary Learning Through Dance: 101 MOVEntures are broad (covering six disciplines) and deep (101 plans in all). Each lesson is based on national standards and has been field tested with students in grades K-5 with positive results. In fact, both teachers and students enjoy the plans and the learning gained through Interdisciplinary Learning Through Dance: 101 MOVEntures. Teachers value the materials: a book, a music CD to be used with selected lessons, and a 60-minute DVD that demonstrates teaching methodologies and shows selected lesson plans in action. All are designed to be used in lessons that focus on science, social studies, language arts, math, physical education, and creative arts. Students respond with enthusiasm to the active learning of subjects through playful movement. The book's content inspires engaging and active learning with these features: - Basic language of dance - How-tos of lesson planning - Classroom-management techniques - Thinking tools for promoting conceptual understanding - Assessment choices and forms Each lesson plan addresses the national standards for dance and the core curriculum subject areas, as well as the grade level, length, student objectives, and materials needed. In addition, each plan contains these special features: - Introduction - Moving adventure - Assessment - Extensions The book explores the benefits of crossing curricular boundaries with dance and delves into the vocabulary of dance and the pedagogy for creating moving adventures, or MOVEntures. It lays out the 101 lesson plans in six disciplines, providing assessment tools, lesson schematics, and additional resources- including the national standards and thinking tools. Complete. Cross-disciplinary. Broad and deep. Instructive. And fun. Teachers can't go wrong with Interdisciplinary Learning Through Dance: 101 MOVEntures, because the students learn the subjects and come back wanting to learn more.

The Rebirth of Education Lant Pritchett.2013-10-14 Despite great progress around the world in getting more kids into schools, too many leave without even the most basic skills. In India's rural Andhra Pradesh, for instance, only about one in twenty children in fifth grade can perform basic arithmetic. The problem is that schooling is not the same as learning. In *The Rebirth of Education*, Lant Pritchett uses two metaphors from nature to explain why. The first draws on Ori Brafman and Rod Beckstrom's book about the difference between centralized and decentralized organizations, *The Starfish and the Spider*. Schools systems tend to be centralized and suffer from the limitations inherent in top-down designs. The second metaphor is the concept of isomorphic mimicry. Pritchett argues that many developing countries superficially imitate systems that were successful in other nations— much as a nonpoisonous snake mimics the look of a poisonous one. Pritchett argues that the solution is to allow functional systems to evolve locally out of an environment pressured for success. Such an ecosystem needs to be open to variety and experimentation, locally operated, and flexibly financed. The only main cost is ceding control; the reward would be the rebirth of education suited for today's world.

Education 101 a Teacher's Guide Charles O. King, Sr.. 2021-08-05 I am a Special Education Teacher with over 20 years of experience ranging from elementary school to adult education. I started as a substitute teacher and 2 years later became an ESE Teacher. After my first day as a substitute teacher I knew I was in the right place. I never sought a career or job in any other field. God is good. To this day everything I ever learned and still learning I use in the classroom to reach and teach my students. This is a book for all educators. I do not believe it takes 500 or more pages to say what needs to be said. Nor do I want to bore you by spelling out and defining everything. In these 20 plus years of my experience I cover what I have learned from the college classroom to elementary education, and engaging students in the classroom. What I want to do

is to share with you what I have learned from my experience as a teacher in a truthful to-the-point manner. I want this book to serve as a guide and help-manual to give insight into educating our children. As I state in this book it takes a combination of things and creativity to reach and teach our children. Prayerfully this book will help everyone who reads it to be more committed and inspired to go the extra mile and learn what lies beyond, and and never give up. I say this to everyone from Home Schooling Parents to Primary Teachers to College Professors, and everyone who plays a leadership role in the lives of our children. Remember it takes a village to raise a child and that village must raise its children to be as independent, self sufficient, and socially responsible in love. This is what Education 101 A Teacher's Guide is about.
