Globality, Unequal Development, and Ethics of Duty Mahmoud Masaeli, Rico Sneller, 2016-09-23 Do we have a duty to end poverty? Is this duty to alleviate poverty, or is it for healing of disempowerment? Based on what moral reasoning is this duty grounded? Must this reasoning be based on value consensus, or can it result in convergence on conclusions from plural moral premises? What results derive from this duty? To whom is this duty addressed? What are the dimensions of this duty? Is this a duty to help or a duty for justice? Is it a uniform duty or are there diverse lines of reasoning and justifications for it? Who must undertake this duty? How is the duty undertaken and fulfilled? Bringing together contributions investigating fundamental themes related to globality and ethics of duty, this volume offers a detailed analysis of these questions, while providing some policy solutions. Indeed, it provides a multifaceted and interdisciplinary dialogue about the ethics of duty in an age of globality and extreme poverty.

This misconception believes the major flaw of the contemporary pattern of development is simply its destruction of the environment. Handling “sustainability” only from an environmental standpoint is a superficial view that needs to be assessed carefully and underlined correctly. As A. D. Basiago suggests, “...[t]he protection of natural systems represents not an overarching panacea for achieving economic vitality and social justice, but a necessary component of an entire system for achieving economic, social and environmental ‘sustainability’, in which economic reforms and social reforms are as important.” The chapters included in this volume are composed of some selected significant contributions from the first International Sustainability Congress organized by International Center of Sustainability (ICS), 1-3 December 2016, in Istanbul, Turkey. All chapters are peer-reviewed by both the editors and at least two independent scholars from fields relevant to the manuscript's subject area. ICS is a research and academic center for sustainability founded in 2015 and dedicated to build resilience of communities and ecosystems to environmental and socio-economic risks. ICS has an integrated approach and specifies sustainability not only from an environmental point of view but also in terms of socio-economic process. Its mission is to produce information as well as enhance research and practice at Micro and Macro levels in Sustainable Development with a holistic and a cross-disciplinary approach.

The Routledge Companion to Business in Africa Sonny Nwankwo, Kevin Ibeh, 2014-07-25 Although the world's poorest inhabited continent, Africa has recently shown signs of being a source of economic growth in the coming decades, with increased foreign investment - notably from China - and huge growth in GDP from a number of African states. In contrast to the heaving weight of books focusing on business opportunities in Asia, Eastern Europe and Latin America, Africa has been poorly served by academic publishing. This compendium of scholarship offers cutting-edge knowledge relating to business in Africa. The objectives of this collection include: To shed new light on the socio-cultural and historical underpinnings of business practice in Africa and their implications for promoting entrepreneurship and business behaviour in the region To consider the important constraints on business activities in Africa, and the emerging 'best practice' for redressing their real and potential impacts To facilitate a better understanding of contemporary business practice in Africa through the application of relevant theories and models, including emergent ones. The Routledge Companion to Business in Africa is a comprehensive reference resource that provides the perfect platform for embarking on research and study into Africa from the business perspective.

Law and Creditor Protection in Nigeria Okafor Onamson, 2017-08-08 Examined here are the legal and practical reasons for the inefficiency of the legal framework of creditor protection in Nigeria. This is amply justified considering the critical role of credit in the promotion of economic growth and development and also bearing in mind the near calamitous consequences the 2009 financial crisis unleashed not only among Nigerian banks and financial institutions, and in the international financial system. The latter nearly led to socioeconomic catastrophe in Nigeria, as well as globally. It is hoped that book is found useful by government, policy makers, academics, corporate financial experts, investment bankers and other stakeholders to initiate and implement efficient policy actions to protect creditors in order to sustain the flow of credit, the engine of any economy.
