Sociology of Tourism Graham Dann, Giuli Liebman Parrinello, 2009-12-04 There is abundant evidence of the quasi-total domination of the sociology and anthropology of tourism by academics from the English-speaking world. This title familiarises readers in the US, UK, Australia and the English speaking regions of Africa and Asia with such evolutionary thinking.

The New European Industrial Policy Franco Mosconi, 2015-05-22 The years since the global financial crisis have seen something of a renaissance in the manufacturing industry. The United States has launched its Advanced Manufacturing Partnership, and China owes much of its spectacular economic boom in the last decades to its being the 'world's factory'. Is there room for the EU in this landscape? This timely new book explores Europe's role in this evolving environment. It argues that on the one hand, in terms of sheer numbers, the role of the manufacturing industry in the EU is on a par with other major global economies. However, the book also states that Europe falls short of its global competitors (the USA in particular) in terms of its involvement in the most innovative manufacturing sectors. The volume therefore argues that this creates the opportunity for a new European industrial policy. Exploring the development of current EU policy, the book puts forward suggestions as to how the EU can improve in terms of the competitiveness of its technology policy. Placing the EU's position in the context of the industrial structures of the USA, Japan and the BRICs, the book blends theoretical models and practical examples in order to offer a the state of the art look at the current and future direction of Europe's industrial policy. This book will be of relevance to all those with an interest in European economics, industrial economics, public policy, European politics and European studies.

Innovation Capabilities: Affirming an Oxymoron? Tor Helge Aas, Karl Joachim Breunig, 2017-01-01 The relationship between resources and capabilities and performance has been discussed since Edith Penrose addressed the mechanisms

behind the growth of the firm (Penrose, 1959). Early contributions to this area of research suggest that valuable and inimitable resources and capabilities are the primary sources of superior performance and sustained competitive advantage (Barney, 1991; Wernerfelt, 1984), while more recent contributions suggest that the ability to change and re-configure resources and capabilities (dynamic capabilities) are the most important for performance, especially when the market is unstable (Teece, 2014; Teece, Pisano & Shuen, 1997). It has also been argued that firms may utilize their resources and capabilities through the development of innovations in the form of new products, services or processes (Hill, Brandeau, Truelove & Lineback, 2015), and empirical research has confirmed that there is a positive relationship between the implementation of innovation activities and the future performance of firms (Bowen, Rostami & Steel, 2010; Rubera & Kirca, 2012). However, innovation as a phenomenon entails change, as opposed to resources and capabilities that represents a firm's ability to reproduce a certain performance - and as such involves stability. Viewed in this way the very term innovation capability can constitute an oxymoron. The study of innovation capabilities is therefore a complex field of study that is emerging. The topic has already attracted interest from a number of scholars (e.g. Forsman, 2011; Guan & Ma, 2003; Hertog, van der Aa & de Jong, 2010; Wang, Lu & Chen, 2008; Yam, Lo, Tang & Lau, 2011), but despite these important advances there is still a lack of consensus in the literature and a pressing need to clarify what type of resources and capabilities drive innovation in different contexts (Lidija & Robert, 2014), and how these capabilities are developed and utilized (Helfat & Peteraf, 2003).

Entrepreneurship Thierry Burger-Helmchen,2012-02-29 What are the differences between an entrepreneur and a manager? According to Schumpeter, the main difference lies in the entrepreneur's ideas, creativity, and vision of the world. These differences enable him to create new combinations, to change existing business models, and to innovate. Those innovations can take several forms: products, processes, and organizations to name a few. In this book, an array of international researchers take a look at the visions and actions of innovative entrepreneurs to be at the source of new ideas and to foster new relationships between different actors to change the existing business models.

Cultural Tourism bob Mckercher,hilary du cros,2012-10-02 Examine cultural tourism issues from both sides of the industry! Unique in concept and content, Cultural Tourism: The Partnership Between Tourism and Cultural Heritage Management examines the relationship between the sectors that represent opposite sides of the cultural tourism coin. While tourism professionals assess cultural assets for their profit potential, cultural heritage professionals judge the same assets for their intrinsic value. Sustainable cultural tourism can only occur when the two sides form a true partnership based on understanding and appreciation of each other's merits. The authors--one, a tourism specialist, the other, a cultural heritage

management expert--present a model for a working partnership with mutual benefits, integrating management theory and practice from both disciplines. Cultural Tourism is the first book to combine the different perspectives of tourism management and cultural heritage management. It examines the role of tangible (physical evidence of culture) and intangible (continuing cultural practices, knowledge, and living experiences) heritage, describes the differences between cultural tourism products and cultural heritage assets, and develops a number of conceptual models, including a classification system for cultural tourists, indicators of tourism potential at cultural and heritage assets, and assessment criteria for cultural and heritage assets with tourism potential. Cultural Tourism examines the five main constituent elements involved in cultural tourism: cultural and heritage assets in tourism sites such as the Royal Palace in Bangkok, the Cook Islands, and Alcatraz Prison in San Francisco. tourism--what it is, how it works, and what makes it a success five different types of cultural tourists consumption of products, value adding, and commodification integrating the first four elements to satisfy the tourist, meet the needs of the tourism industry, and conserve the intrinsic value of the asset Though tourism and cultural heritage management professionals have mutual interests in the management, conservation, and presentation of cultural and heritage assets, the two sectors operate on parallel planes, maintaining an uneasy partnership with surprisingly little dialogue. Cultural Tourism provides professionals and students in each field with a better understanding of their own roles in the partnership, bridging the gap via sound planning, management, and marketing to produce top-quality, long-lasting cultural tourism products. Now translated into simplified Chinese.

Walking Hand in Hand Mr. Carlo Cottarelli, Laura Jaramillo, 2012-05-01 Implementation of fiscal consolidation by advanced economies in coming years needs to take into account the short and long-run interactions between economic growth and fiscal policy. Many countries must reduce high public debt to GDP ratios that penalize longterm growth. However, fiscal adjustment is likely to hurt growth in the short run, delaying improvements in fiscal indicators, including deficits, debt, and financing costs. Revenue and expenditure policies are also critical in affecting productivity and employment growth. This paper discusses the complex relationships between fiscal policy and growth both in the short and in the long run.

Corporate Cultures 2000 Edition Terry Deal, Allan Kennedy, 2000-05-19 A reissue of the classic best-seller that coined the term 'corporate culture' In the early 1980s, Terry Deal and Allan Kennedy launched a new field of inquiry and practice with the publication of their landmark book, *Corporate Cultures*, in which they argued that distinct types of cultures evolve within companies, with a direct and measurable impact on strategy and performance. Despite the dramatic evolution of the business landscape over the last twenty years, the basic principles of the book remain as fresh and relevant as they did when it was first published; that organizations, by their very nature, are social enterprises, with tribal habits, well-defined cultural roles

for individuals, and various strategies for determining inclusion, reinforcing identity, and adapting to change. In the new introduction, the authors reflect on the enduring lessons of their investigation into the life of organizations. Allan A. Kennedy is a Boston-based writer and management consultant whose new book, *The End of Shareholder Value*, will be published by Perseus in April.

The Routledge Handbook of Tourism and Sustainability C. Michael Hall, Stefan Gössling, Daniel Scott, 2015-02-11
Routledge Handbook of Tourism and Sustainability from C. Michael Hall, Stefan Gössling, Daniel Scott is one of the winners of the ITB BookAwards 2016 in the category Specialist tourism literature! Sustainability remains one of the major issues in tourism today. Concerns over climate and environmental change, the fallout from the global economic and financial crisis, and the seeming failure to meeting UN Millennium development goals have only reinforced the need for more sustainable approaches to tourism, however they be defined. Given the centrality of sustainability in tourism curricula, policies, research and practice it is therefore appropriate to prepare a state of the art handbook on the relationship between tourism and sustainability. This timely Handbook of Tourism and Sustainability is developed from specifically commissioned original contributions from recognised authors in the field, providing a systematic guide to the current state of knowledge on this area. It is interdisciplinary in coverage and international in scope through its authorship and content. The volume commences with an assessment of tourism's global environmental, e.g. climate, emissions, energy use, biodiversity, water use, land use, and socio-economic effects, e.g. economic impacts, employment and livelihoods, culture. This then provides the context for sections outlining the main theoretical frameworks and constructs that inform tourism and sustainability, management tools and approaches, and the approaches used in different tourism and travel industry sectors. The book concludes by examining emerging and future concerns in tourism and sustainability such as peak-oil, post-carbon tourism, green economy and transition tourism. This is essential reading for students, researchers and academics interested in the possibilities of sustainable forms of tourism and tourism's contribution to sustainable development. Its assessment of tourism's global impact along with its overviews of sectoral and management approaches will provide a benchmark by which the sustainability of tourism will be measured for years to come.

Dynamics of Competence-based Competition Ron Sanchez, Aimé Heene, Howard Thomas, 1996 In order to integrate the various contributions to the book, the text has been carefully edited to ensure a consistent, carefully defined, and straightforward vocabulary. It will therefore appeal both to researchers and students for whom theoretical rigor is important, and to practising executives, managers and consultants who will welcome its clear applicability to their own experience.
