Dispelling The Darkness: Voyage In The Malay Archipelago And The Discovery Of Evolution By Wallace And Darwin John Van Wyhe, 2013-05-10 "The facts of variability, of the struggle for existence, of adaptation to conditions, were notorious enough; but none of us had suspected that the road to the heart of the species problem lay through them, until Darwin and Wallace dispelled the darkness." T H Huxley (1887) Darwin is one of the most famous scientists in history. But he was not alone. Comparatively forgotten, Wallace independently discovered evolution by natural selection in Southeast Asia. This book is based on the most thorough research ever conducted on Wallace's voyage. Closely connected, but worlds apart, Darwin and Wallace's stories hold many surprises. Did Darwin really keep his theory a secret for twenty years? Did he plagiarise Wallace? Were their theories really the same? How did Wallace hit on the solution, and on which island? This book reveals for the first time the true story of Darwin, Wallace and the discovery that would change our understanding of life on Earth forever.

While journeying around South America for the first time aboard a ninety-foot-long ship named the Beagle, Charles collected insets, dug up bones, galloped with gauchos, encountered volcanoes and earthquakes, and even ate armadillo for breakfast! The discoveries he made during this adventure would later inspire ideas that changed how we see the world. Complete with mesmerizing map work that charts Darwin's thrilling five-year voyage, as well as Fun Facts and more, *Charles Darwin's Around-the-World Adventure* captures the beauty and mystery of nature with wide-eyed wonder.

The Voyage of the Beagle Charles Darwin,2015-09-25 Enjoy the best-selling memoir of Charles Darwin's journey of discovery aboard the HMS Beagle--now fully illustrated for the first time. *The Voyage of the Beagle* is Darwin's fascinating account of his groundbreaking sea voyage that led to his writing *On the Origin of Species*. When the HMS Beagle sailed out of Devonport on December 27, 1831, Charles Darwin was only twenty-two and setting off on the voyage of a lifetime. His journal reveals him to be a naturalist making patient observations concerning geology and natural history as well as people, places, and events. He witnessed and visited volcanoes in the Galapagos, saw the Gossamer spider of Patagonia, sailed through the Australasian coral reefs, and recorded the brilliance of the firefly--these recollections are found in these extraordinary writings. The insights made on the five-year voyage set in motion the intellectual currents that led to the most controversial book of the Victorian age: *On the Origin of Species*. An introduction on the background to Darwin's work, as well as notes, maps, appendices, and an essay on scientific geology and the Bible by Robert FitzRoy, Darwin's friend and captain of the Beagle, provide context for this incredible story. This volume is the first fully illustrated edition of Darwin's journal and includes excerpts of *On the Origin of Species* so the reader can connect the author's journey with his discovery that made him famous.
