Language Links combines grammar, vocabulary and phrases to give the range of language learners need to communicate effectively in English. To talk about clothes, for example, they not only need vocabulary (trousers, skirt), but also grammar (I'm wearing, she's wearing) and phrases such as get dressed. Evaluating Systems for Multilingual and Multimodal Information Access Thomas Deselaers, Nicola Ferro, Julio Gonzalo, Mikko Kurimo, Thomas Mandl, Vivien Petras. 2009-09-29 The ninth campaign of the Cross-Language Evaluation Forum (CLEF) for European languages was held from January to September 2008. There were seven main evaluation tracks in CLEF 2008 plus two pilot tasks. The aim, as usual, was to test the performance of a wide range of multilingual information access (MLIA) systems or system components. This year, 100 groups, mainly but not only from academia, participated in the campaign. Most of the groups were from Europe but there was also a good contingent from North America and Asia plus a few participants from South America and Africa. Full details regarding the design of the tracks, the methodologies used for evaluation, and the results obtained by the participants can be found in the different sections of these proceedings. The results of the CLEF 2008 campaign were presented at a two-and-a-half day workshop held in Aarhus, Denmark, September 17-19, and attended by 150 researchers and system developers. The annual workshop, held in conjunction with the European

Conference on Digital Libraries, plays an important role by providing the opportunity for all the groups that have participated in the evaluation campaign to get together comparing approaches and exchanging ideas. The schedule of the workshop was divided between plenary track overviews, and parallel, poster and breakout sessions presenting this year's experiments and discussing ideas for the future. There were several invited talks.

Problem Solving & Programming Concepts Maureen Sprankle, Jim Hubbard. 2014-09-18 A core or supplementary text for one-semester, freshman/sophomore-level introductory courses taken by programming majors in Problem Solving for Programmers, Problem Solving for Applications, any Computer Language Course, or Introduction to Programming. Revised to reflect the most current issues in the programming industry, this widely adopted text emphasizes that problem solving is the same in all computer languages, regardless of syntax. Sprankle and Hubbard use a generic, non-language-specific approach to present the tools and concepts required when using any programming language to develop computer applications. Designed for students with little or no computer experience — but useful to programmers at any level — the text provides step-by-step progression and consistent in-depth coverage of topics, with detailed explanations and many illustrations.
