Hindiyya, Mystic and Criminal, 1720-1798 Bernard Heyberger.2013-03-28 In this compelling narrative, Bernard Heyberger relates the fascinating history of Hindiyya 'Ujaymi, a highly charismatic eighteenth-century mystic of sinister repute. Heyberger makes a careful study of Hindiyya's life from earliest childhood, with a detailed picture of her formative years in the eighteenth century Christian community of Aleppo, the domestic reality of which is little known, exploring the influences she would have experienced. He leads us through her spiritual development under the direction of the Jesuits, her determination to found a new religious order, and the tragic history of its collapse in a welter of paranoia and persecution. Heyberger also reveals the tensions and complex rivalries at play around Hindiyya between Rome, the Jesuits, and Eastern tribes, which were also beset by feuds and alliances. He makes extensive use of a wide variety of sources, from Hindiyya's own writings to reports from her confessors and Roman inquisitors, to shed light upon the Hindiyya affair. 'Hindiyya, Mystic and Criminal' relates the history of a woman of inflexible power of will and great charisma, who managed to move beyond the circumscribed world of her girlhood and realise what she believed to be her destiny. It will be of great interest to anyone seeking a deeper understanding of an affair which has been long obscured by contradictory reports, or to those interested in eighteenth-century Maronite Christianity and its complex interactions with the authority of Rome.

**Notions de Géographie physique** Raoul Étongué Mayer.2014-09-02 Notions de Géographie physique est un ouvrage bien documenté et abondamment illustré qui permet de comprendre la Géographie physique et son utilité sociale en douze chapitres. Écrits dans une langue simple, ces douze chapitres couvrent les grands thèmes abordés en Géographie physique contemporaine : la Terre dans le système solaire et sa représentation ; la lithosphère ; l'atmosphère et l'énergie solaire ; la pression atmosphérique et les vents ; l'humidité atmosphérique, la condensation et les précipitations, les masses d'air et les perturbations atmosphériques. Viennent ensuite les climats, les écosystèmes et les géosystèmes ; les sols ; l'hydrosphère, les surfaces marines et océaniques, les surfaces marécageuses et les eaux souterraines. Les chapitres 10, 11 et 12 traitent de la biosphère, de biodiversité, d'écologie et de biogéographie ; de la cryosphère, de la glaciologie continentale et marine ; et

enfin des notions de risques naturels, de catastrophes naturelles, de leur évaluation et gestion. En parcourant les textes du début à la fin, le lecteur saisit le lien entre les savoirs géographiques et leur utilité sociale, car on ne peut pas nier que les êtres humains ne vivent pas toujours en harmonie avec les différentes composantes physiques de la Terre. Il découvre alors pourquoi les géographes-physiciens présentent la Terre comme un système. Ce livre prépare les apprentis géographes à mieux appréhender les relations entre les cinq composantes de la Terre et ainsi assumer en toute connaissance de cause leurs responsabilités citoyennes et écologiques.

Les fondamentaux de la géographie - 4e éd. .2024-01-03 Cet ouvrage didactique, présente les thèmes fondamentaux de la géographie d'aujourd'hui. L'ensemble est complété par la méthodologie des grands outils (carte, SIG, Internet) nécessaires à tout apprenti géographe. Un manuel indispensable pour acquérir les bases théoriques et méthodologiques de la discipline ou actualiser ses connaissances.

**The Early Hellenistic Peloponnese** D. Graham J. Shipley.2018-06-14 Using all available evidence - literary, epigraphic, numismatic, and archaeological - this study offers a new analysis of the early Hellenistic Peloponnese. The conventional picture of the Macedonian kings as oppressors, and of the Peloponnese as ruined by warfare and tyranny, must be revised. The kings did not suppress freedom or exploit the peninsula economically, but generally presented themselves as patrons of Greek identity. Most of the regimes characterised as 'tyrannies' were probably, in reality, civic governorships, and the Macedonians did not seek to overturn tradition or build a new imperial order. Contrary to previous analyses, the evidence of field survey and architectural remains points to an active, even thriving civic culture and a healthy trading economy under elite patronage. Despite the rise of federalism, particularly in the form of the Achaean league, regional identity was never as strong as loyalty to one's city-state (polis).

Femme, gnose et manichéisme Maddalena Scopello.2005 The present volume offers twelve studies dealing with feminine figures in Gnosticism and Manichaeism. In Part One ( Images et symboles ), the Author unveils the hidden meaning of some feminine figures having played a role on the mythical scene of those trends. Some of these figures, borrowed from other traditions, have been deeply reworked by Gnostics or Manichees assuming thereby a new significance. An intermezzo ( Passages ) investigates the presence of women names in titles preserved in the Nag Hammadi Library and the relationship between a female protagonist and a specific literary genre. Part Two ( Histoire et réalité ) reconstructs the portraits of some women, especially Manichaean, to whom the historical inquiry gives life again, thanks to a fresh reading of first hand sources, as well of heresiological or archeological testimonies. Some of these studies have been previously published and

have now been significantly updated and expanded. Some others are lectures on Feminine in Gnosticism and Manichaeism given by the Author in Sorbonne, Paris, since 1994.\*\*\*Les douze études que rassemble ce volume abordent sous différentes facettes le personnage de la femme dans la gnose et dans le manichéisme. Dans la première partie (« Images et symboles »), l'Auteur dévoile la signification cachée de quelques figures féminines qui ont joué un rôle sur la scène du mythe. Si les auteurs gnostiques et manichéens ont emprunté certaines d'entre elles à d'autres traditions, ils ont toutefois remodelé ces figures en profondeur en les chargeant d'une nouvelle signification. La deuxième partie (« Passages ») s'interroge sur la présence de noms féminins dans les titres conservés de la bibliothèque de Nag Hammadi et sur la relation éventuelle entre une protagoniste féminine et le choix d'un genre littéraire. La troisième partie (« Histoire et réalité ») reconstruit les portraits de quelques femmes, surtout manichéennes, dont les traits effacés se précisent grâce à une lecture originale de la documentation directe et des sources hérésiologiques, grâce aussi à l'apport de l'archéologie. Une partie de ces études, publiée auparavant, paraît ici sous une forme largement amplifiée. D'autres reprennent les thèmes de conférences sur la femme dans le manichéisme, données par l'Auteur à la Sorbonne entre 1997 et 2002.

**Géographie humaine - 4e éd.** .2020-06-03 Les effets de la mondialisation se font sentir dans des domaines et sur des espaces toujours plus nombreux, à toutes les échelles géographiques. Toutefois, sous l'effet d'un poids démographique croissant, de la progression des inégalités économiques, sociales et territoriales, et de la nécessaire prise en compte des

enjeux climatiques, ce phénomène mondial d'une ampleur inégalée semble atteindre ses limites. La surconsommation de terres agricoles par les étalements urbains de métropoles aux populations multimillionnaires ou encore l'accès aux ressources n'en sont que quelques exemples. La nouvelle édition de cet ouvrage thématique présente et analyse les principaux défis auxquels la planète est aujourd'hui confrontée : inégalités dans les domaines de la croissance démographique et de la santé, nouveaux développements des réseaux urbains et de transports, localisations et délocalisations d'activités, avenir de l'agriculture et des espaces ruraux en relation avec les évolutions de la demande alimentaire... Elle vient ainsi mettre en évidence la fécondité de la géographie humaine, qui étudie les modalités d'organisation de l'espace par les sociétés, pour éclairer l'ensemble de ces transformations.

**Religious Practices and Christianization of the Late Antique City (4th - 7th cent.)** .2015-06-24 Religious Practices and Christianization of the Late Antique City studies the phenomenon of the Christianization of the Roman Empire within the context of the transformations and eventual decline of the Greco-Roman city.

Claims to Memory Catherine A. Reinhardt.2006 By comparing a diversity of documents including letters by slaves, free people of colour and planters, as well as literary works, royal decrees and court cases, Catherine Reinhardt untangles the complex forces of the slave regime that shaped the collective memory of slaves and free coloureds.

History of Humanity UNESCO.2005-12-31 Volume V of the History of Humanity is concerned with the 'early modern' period: the sixteenth, seventeenth and eighteenth centuries. It gives an extensive overview of this crucial stage in the rise of the West as well as examining the development of cultures and societies elsewhere. Structure The volume is divided into two main parts. The first is thematic, discussing the geography, chronology and sociology of cultural change in this period. The second is regional, less theoretical and more empirical; it stresses cultural diversity, the links between different activities in a given region, and the importance of social contexts and local circumstances. Each chapter has a bibliography which directs the reader to sources of further information. The volume is extensively illustrated with line drawings and plates, and is comprehensively indexed

La maison européenne Falk Pingel.2000 La maison européenne : représentations de l'Europe du 20e siècle dans les manuels d'histoire décrit l'évolution générale qu'a connue au cours de la dernière décennie la présentation de l'histoire européenne du 20e siècle et propose un panorama des interprétations générées par certains aspects de l'histoire, tels l'Occupation, l'Holocauste et le génocide, pour n'en citer que quelques-uns. L'auteur analyse également la façon dont est traitée la dimension européenne dans les livres d'histoire, notion que les Etats membres du Conseil de l'Europe souhaitaient voir prise en compte dans les manuels d'histoire dès 1953. Cette étude s'appuie sur l'analyse transversale de manuels d'histoire de l'enseignement secondaire de quatorze pays, petits ou grands, de l'Europe entière, aux traditions très différentes en matière de littérature éducative : la République tchèque, l'Angleterre et le pays de Galles, la Finlande, la

France, la Lituanie, l'Allemagne, la Hongrie, l'Italie, les Pays-Bas, la Norvège, la Fédération de Russie et l'Espagne. L'auteur prend aussi l'exemple d'autres pays, en particulier dans les Balkans, où la construction de l'identité nationale s'effectue parallèlement à l'émergence d'une identité européenne.

*Pasado, presente y futuro de la planificación urbana regional, tomo 2* Olga Ravella.2021-09-03 La complejidad de los procesos de producción del espacio urbano-regional requiere del conocimiento de diversidad de aproximaciones teóricas y de prácticas urbanas y, asimismo, de diversas metodologías de la planificación, aún hoy en permanente construcción. En ese sentido, se busca en autores del pasado y presente indicios para mejorar la comprensión de la organización social, espacial y ambiental del territorio y sus aglomerados urbanizados. En este trabajo, se presenta una revisión sintética de diversas concepciones y prácticas, pensada como una guía sistematizada de los distintos temas involucrados en el estudio de las ciudades, y que remite a los distintos autores que desarrollan en profundidad cada temática. Es seguramente incompleta y, por obvias razones, revisa someramente u omite el desarrollo de algunos aspectos y autores, aunque es posible de ser ampliada acudiendo a la bibliografía seleccionada para cada uno de los temas tratados. En este trabajo, se presenta una revisión sintética de diversas concepciones y prácticas, pensada como una guía sistematizada de los distintos temas involucrados en el estudio de las ciudades, y que remite a los distintos autores que desarrollan en profundidad cada temática.

**Les Montagnes** Yvette Veyret.2001-12-14 Le traitement du thème des montagnes requiert une synthèse originale faisant appel à de nombreuses branches de la géographie. Cet ouvrage s'articule autour de quatre grands thèmes : - Le statut de la montagne dans les différents discours géographiques ; - Montagnes, pleins et vides (montagnes tropicales principalement) ; - Montagnes, aménagement et développement durable (montagnes de moyennes altitudes notamment) ; - L'environnement en montagne, entre gestion et protection (ressources, contraintes et risques).

**Explaining Human Origins** Wiktor Stoczkowski.2002-06-20 Wiktor Stoczkowski, a palaeo-anthropologist, argues that the theories of human origins developed by archaeologists and physical anthropologists from the early nineteenth century to the present day are structurally similar to Western folk theories, and to the speculations of earlier philosophers. Reviewing a remarkable range of thinkers writing in a variety of European languages, he makes a convincing argument for this case. Even though the book criticises the lack of development in theories of human origins, its conclusion is optimistic about the power of the scientific approach to deliver more reliable theories - but only if the influences of popular discourse on its thinking are properly identified.

douzaine de thèmes, aisés à relier entre eux : Les modèles sociauxLa protection socialeL'intégration des immigrésHandicap et sociétéL'incivilitéGratuité et service publicLe phénomène religieuxLes sectes religieusesLes musées nationauxAudiovisuel et diversité culturelleSport et politiqueLe tourisme internationalL'action humanitaire Cet ouvrage s'adresse aux étudiants en Droit, Science politique, AES, Sociologie, Histoire, Économie et Gestion. **Droit international de l'environnement - 4e édition** Lavieille Jean-Marc, Delzangles Hubert, Le Bris Catherine.2018-01-30 La dégradation mondiale de l'environnement est rapide, profonde, multiforme. Le droit international de l'environnement ne peut pas, à lui seul, protéger l'environnement mais, aujourd'hui, sans lui on ne peut pas protéger l'environnement. Comme étudiant, enseignant, chercheur, membre d'association ou comme citoyen n'est-il pas important de comprendre les forces et les faiblesses de ce droit ? Dans une première partie sont analysés les caractères du droit international de l'environnement à travers sept chapitres : nature et objet, histoire et acteurs, enjeux et contexte, sources formelles et techniques juridiques, institutions et juridictions, application et sanctions, forces et faiblesses de ce droit. Dans une seconde partie est analysé le contenu du droit international de l'environnement à travers neuf chapitres : concepts et principes, responsabilité internationale et réparation des dommages environnementaux, air et climats, eaux douces et milieu marin, sols et forêts, conservation mondiale et régionale de la nature, produits chimiques, circulation des déchets dangereux et radioactivité, santé travail et habitat, commerce international et conflits armés. Les défis du droit international de l'environnement sont clairs : renforcer son application, rendre opérationnels ses principes, combler ses lacunes, dégager des moyens institutionnels, juridiques, financiers. Les auteurs, adoptant une approche globale et critique, en appellent à un droit international de l'environnement plus complet et effectif afin de participer, par des moyens démocratiques, justes, écologiques et pacifiques, à la construction d'une société écologiquement viable au nom de l'intérêt commun de l'humanité.

**Farming Communities in the Western Alps, 1500-1914** Robert Dodgshon.2019-05-24 This monograph explores traditional farming communities in French-speaking areas of the western Alps for the period 1500-1914 and how they endured in such an environment despite the many problems and risks which it posed for their subsistence and welfare. Using an extensive amount of archival material drawn from the relevant regional archives, the book presents a great deal of fresh data. Its central theme is how such communities responded to the opportunities and challenges presented by the highly variegated environment of their setting. The view taken is that their strategies of exploitation stressed diversity and flexibility, mapping the highly varied ecologies and resource opportunities of their setting into these strategies by spreading livelihood and risk as widely as possible. This interpretative framework is developed across all the book's themes: landholding, arable and livestock sectors, use of the commons and, finally, how communities coped with climate-based risks.

The book appeals to geographers, historians, environmental scientists and everyone interested in traditional farming communities and their long-term challenges.

Géographie de la mondialisation - 4e éd. Laurent Carroué.2019-11-06 La mondialisation est l'objet d'une véritable mythification, suscitant les plus grands espoirs ou les pires craintes. Omniprésente dans l'actualité, jamais une notion n'a été autant utilisée dans les discours et les débats. Et pourtant, sa définition reste méconnue. Cet ouvrage a pour objectif de présenter la nature, les structures, les acteurs, les processus et les grandes dynamiques de la mondialisation. Si l'on a souvent tendance à la réduire à sa seule dimension économique, la mondialisation désigne avant tout un système de mise en relation des différents territoires, sociétés et ensembles géographiques pavant l'espace planétaire. Elle constitue ainsi une clé d'analyse géopolitique, géostratégique et géoéconomique indispensable pour rendre intelligible le monde contemporain : nouvelle architecture mondiale, grands défis d'avenir (démographiques, sociaux, environnementaux et de développement), nouvelles rivalités de puissance exacerbées, rôle des firmes transnationales, emballement des marchés et des échanges. Car loin d'homogénéiser l'espace mondial, la mondialisation se caractérise au contraire par des dynamiques hypersélectives, faisant exploser les inégalités, et dans lesquelles les États et les citoyens ont un rôle essentiel à jouer pour construire un nouvel ordre mondial plus juste et solidaire.

**Critique of Pure Nature** Simona Stano.2023-12-29 This book challenges the Western contemporary “praise for Nature”. From food to body practices, from ecological discourses to the Covid-19 pandemic, contemporary imaginaries abound with representations of an ideal “pure Nature”, essentially defined according to a logic of denial of any artificial, modified, manipulated — in short, cultural — aspect. How should we contextualise and understand such an opposition, especially in light of the rich semantic scope of the term “nature” and its variability over time? And how can we — if we actually can — envisage alternative models and approaches capable of better accounting for such richness and variability? The author addresses these fundamental issues, combining an initial theoretical problematisation of the concept of nature and its evolution — from classical philosophy to the crucial changes occurred through the Middle Ages, the Renaissance, Romanticism and the modern era, finally considering recent insights in philosophy, sociology, cultural anthropology and semiotics — with the analysis of its discursivisation — from the iconography of Mother Nature between the past and the present to the representation of catastrophic events in fictional and non-fictional texts, from clean eating and other popular food trends to the ambivalence of the naked body between its supposed natural ascription and its multiple cultural characterisations. Thus she introduces a critique of pure Nature, providing a systematic study of the way nature is attributed meaning and value in some of today’s most relevant discourses and practices, and finally tracing a possible path towards an “internatural turn”.

**Euro-orientalism** Ezequiel Adamovsky.2006 Drawing from a range of critical perspectives, in particular postcolonial, this book examines the relationship between perceptions of Russia and of Eastern Europe and the making of a 'Western' identity. It explores the ways in which the perception of certain characteristics of Russia and Eastern Europe, whether real or attributed, was shaped by (and used for) the construction of a liberal narrative of the West, which eventually became dominant. The focus of this inquiry is French culture, from the beginning of the debate about Russia among the philosophes (c.1740) to the consolidation of a professional field of Slavic studies (c.1880). A wide range of writing - literature, travel accounts, histories, political tracts, scientific journals, and parliamentary debates - is examined through the work of major

authors (from Montesquieu, Diderot and Rousseau to Tocqueville, de Maistre and Guizot, from Mme. de Staël, Hugo and Balzac to Dumas, Michelet and Comte), as well as that of many less well known figures. The book also explores possible continuities between those first academic accounts of Russia and Eastern Europe and present-day scholarship in Europe and the USA, to show that the liberal ideological accounts constructed in the nineteenth century still to a great extent inform contemporary academic studies.

**Proceedings of the 4th International Congress of the Archaeology of the Ancient Near East, 29 March - 3 April 2004, Freie Universität Berlin: The reconstruction of environment : natural resources and human interrelations through time ; art history : visual communication** Hartmut Kühne, Rainer Maria Czichon, Florian Janoscha Kreppner. 2008 The Congress hosted 611 registered participants from 38 countries. Its aim was to be an international forum for scholars and demands of Near Eastern Archaeology. From the four sections of the Congress, Vol. I: 1) The Reconstruction of Environment. Natural Resources and Human Interrelation through Time, 2) Visual Communication, [Vol. II: 3) Social and Cultural Transformation: The Archaeology of Transitional Periods and Dark Ages, 4) Archaeological Field Reports (Excavations, Surveys, Conservation) ISBN 978344705757-8]. Together these volumes unite 77 contributions on about 1100 pages. They are arranged according to the sections. The first three will be introduced by the key lectures which were given by Tony Wilkinson, Winfried Orthmann, and Roger Matthews. The resumes of these sections were provided by Wendy Matthews, Dominik Bonatz, and Diederik J.W. Meijer. The contributions cover many aspects of the main themes through time, from the Neolithic to the Hellenistic / Roman period, and offer interdisciplinary approaches to complex archaeological problems.

*Éducation géographique* Juan-Luis Klein, Suzanne Laurin. 1999-08-11T00:00:00-04:00 Oeuvre collective d'un groupe de professeurs du département de géographie de l'Université du Québec à Montréal, ce livre invite à revoir la place et le rôle de la géographie dans l'éducation. À l'origine du projet, il y a la responsabilité commune des auteurs de préparer les futurs enseignants en sciences humaines de l'école secondaire au Québec et de les introduire à la connaissance géographique. C'est pourquoi les auteurs ont voulu offrir un espace de réflexion, non seulement sur ce qui caractérise le contenu de cette géographie, à l'université et à l'école, mais aussi sur sa nécessaire actualisation pour assurer la formation du citoyen et le développement d'une conscience territoriale au Québec. L'unité de leur réflexion tient dans la volonté de faire connaître, d'approfondir et de mettre en relation les savoirs de base qui font de l'éducation géographique un aspect essentiel de la formation à la citoyenneté.
