Banking on Milk Tanya Cassidy, Fiona Dykes, 2019-05-28 *Banking on Milk* takes the reader on a journey through the everyday life of donor human milk banking across the United Kingdom (UK) and beyond, asking questions such as the following: Why do people decide to donate? How do parents of recipients hear about human milk? How does milk donation impact on lifestyle choices? Chapters record the practical everyday reality of work in a milk bank by drawing on extensive ethnographic observations and sensitive interview data from donors, mothers of recipients and the staff of four different milk banks from across the UK, and visits to milk banks across Europe and North America. It discusses the ongoing pressures to do with supply, demand and distribution. An empirically informed ethnography of the contemporary, where both biosociality and biopower abound, this book includes an exploration of how milk banks evolved from registering wet nurses with hospitals, showing how a regulatory culture of medical authority began to quantify and organize human milk as a commodity. This book is a valuable read for all those with an interest in breastfeeding or organ and tissue donation from a range of fields, including midwifery, sociology, anthropology, geography, cultural studies and public health.

The Courage to Grieve Judy Tatelbaum, 2009-10-13 This unusual self-help book about surviving grief offers the reader comfort and inspiration. Each of us will face some loss, sorrow and disappointment in our lives, and *The Courage to Grieve* provides the specific help we need to enable us to face our grief fully and to recover and grow from the experience. Although the book emphasizes the response to the death of a loved one, *The Courage to Grieve* can help with every kind of loss and grief. Judy Tatelbaum gives us a fresh look at understanding grief, showing us that grief is a natural, inevitable human

experience, including all the unexpected, intense and uncomfortable emotions like sorrow, guilt, loneliness, resentment, confusion, or even the temporary loss of the will to live. The emphasis is to clarify and offer help, and the tone is spiritual, optimistic, creative and easy to understand. Judy Tatelbaum provides excellent advice on how to help oneself and others get through the immediate experience of death and the grief that follows, as well as how to understand the special grief of children. Particularly useful are the techniques for completing or finishing grief--counteracting the popular misconception that grief never ends. *The Courage to Grieve* shows us how to live life with the ultimate courage: not fearing death. This book is about so much more than death and grieving it is about life and joy and growth.

Academic Misconduct and Plagiarism Bernard Montoneri,2020-11-15 This book discusses the issue of academic misconduct and publication ethics in general and plagiarism in particular, with a focus on case studies in various universities around the world (notably in Japan, Singapore, Australia, USA, and Canada). We are especially interested in students' and teachers' perception of academic misconduct and their definition and understanding of plagiarism. Most chapters discuss undergraduates' understanding of academic dishonesty and students' experiences using plagiarism softwares. The book also analyzes teachers' perception of cheating and how they respond to it. Writing is perceived by all of the teachers to be the most important form of assessment that required preventative measures in order to reduce the occurrence of academic dishonesty among students. Each chapter recommends strategies to fight plagiarism, such as establishing guidelines and regulations concerning academic integrity, awareness of the scale of the issue (scandals at all levels in most countries, even including famous scholars, administrators, and elected officials), assessing the damage done to academic reputation and credibility, developing trust and credibility on social media (especially with the recent disturbing growth of fake news and data), minimizing the proliferation of dishonest accreditation, of identity theft, of fake peer-reviews, and fighting the growing number of fake papers, with or without the use of computer-generated academic works.
