### **Guidelines for the Prevention Care and Treatment of Persons with Chronic Hepatitis B Virus Infection**

WHO., World Health Organization, 2015 These are the first World Health Organization (WHO) guidelines for the prevention care and treatment of persons living with CHB infection and complement similar recent published guidance by WHO on the prevention care and treatment of infection due to the hepatitis C virus (HCV). In contrast to several recent international guidelines on the management of CHB infection from the United States Europe Asia-Pacific and the United Kingdom (UK) the primary audience for these WHO guidelines is country programme managers in all settings but particularly in LMICs to help plan the development and scale up.

Immunization Safety Review Institute of Medicine, Board on Health Promotion and Disease Prevention, Immunization Safety Review Committee, 2003-12-26 The Immunization Safety Review Committee was established by the Institute of Medicine (IOM) to evaluate the evidence on possible causal associations between immunizations and certain adverse outcomes, and to then present conclusions and recommendations. The committee's mandate also includes assessing the broader societal significance of these immunization safety issues. While all the committee members share the view that immunization is generally beneficial, none of them has a vested interest in the specific immunization safety issues that come before the group. The committee reviews three immunization safety review topics each year, addressing each one at a time. In this fifth report in a series, the committee examines the hypothesis that exposure to polio vaccine contaminated with simian virus 40 (SV40), a virus that causes inapparent infection in some monkeys, can cause certain types of cancer.

**Vaccines: A Biography** Andrew W. Artenstein, 2009-12-11 Why another book about vaccines? There are already a few extremely well-written medical textbooks that provide comprehensive, state-of-the-art technical reviews regarding vaccine science. Additionally, in the past decade alone, a number of engrossing, provocative books have been published on various related issues ranging from vaccines against specific diseases to vaccine safety and policy. Yet there remains a significant gap in the literature - the history of vaccines. *Vaccines: A Biography* seeks to fill a void in the extant literature by focusing on the history of vaccines and in so doing, recounts the social, cultural, and scientific history of vaccines; it places them within their

natural, historical context. The book traces the lineage - the “biography” - of individual vaccines, originating with deeply rooted medical problems and evolving to an eventual conclusion. Nonetheless, these are not “biographies” in the traditional sense; they do not trace an individual’s growth and development. Instead, they follow an idea as it is conceived and developed, through the contributions of many. These are epic stories of discovery, of risk-takers, of individuals advancing medical science, in the words of the famous physical scientist Isaac Newton, “by standing on the shoulders of giants. ” One grant reviewer described the book’s concept as “triumphalist”; although meant as an indictment, this is only partially inaccurate.

Guidelines on Hepatitis B and C Testing World Health Organization,2017 Testing and diagnosis of hepatitis B (HBV) and C (HCV) infection is the gateway for access to both prevention and treatment services, and is a crucial component of an effective response to the hepatitis epidemic. Early identification of persons with chronic HBV or HCV infection enables them to receive the necessary care and treatment to prevent or delay progression of liver disease. Testing also provides an opportunity to link people to interventions to reduce transmission, through counselling on risk behaviors and provision of prevention commodities (such as sterile needles and syringes) and hepatitis B vaccination. These are the first WHO guidelines on testing for chronic HBV and HCV infection and complement published guidance by WHO on the prevention, care and treatment of chronic hepatitis C and hepatitis B infection. These guidelines outline the public health approach to strengthening and expanding current testing practices for HBV and HCV, and are intended for use across age groups and populations.

**Good Governance for Prison Health in the 21st Century** Who Regional Office for Europe,2014-05-12 Against the background of concern about ministerial responsibility for the health of prisoners in Europe, the members of the WHO European Network on Prison and Health asked the WHO Regional Office for Europe to provide a document on the governance of prison health. A special Expert Group for the Stewardship of Prison Health and members of the WHO European Network on Prison and Health have contributed to this document. The Expert Group concluded, with regard to institutional arrangements for prison health, that: (i) managing and coordinating all relevant agencies and resources contributing to the health and well-being of prisoners is a whole-of-government responsibility, and (ii) health ministries should provide and be accountable for health care services in prisons and advocate healthy prison conditions. The Expert Group considers that such governance of prison health is in accordance with and supportive of the new European policy for health, Health 2020, and will lead to better health and well-being of prisoners as part of better public health.

Making Way in Corpus-based Interpreting Studies Mariachiara Russo,Claudio Bendazzoli,Bart Defrancq,2017-10-24 This book presents a collection of state-of-the-art work in corpus-based interpreting studies, highlighting international research on

the properties of interpreted speech, based on naturalistic interpreting data. Interpreting research has long been hampered by the lack of naturalistic data that would allow researchers to make empirically valid generalizations about interpreting. The researchers who present their work here have played a pioneering role in the compilation of interpreting data and in the exploitation of that data. The collection focuses on both of these aspects, including a detailed overview of interpreting corpora, a collective paper on the way forward in corpus compilation and several studies on interpreted speech in diverse language pairs and interpreter-mediated settings, based on existing corpora.

Geometry of the Passions Remo Bodei, 2018-08-08 The passions have long been condemned as a creator of disturbance and purveyor of the temporary loss of reason, but as Remo Bodei argues in *Geometry of the Passions*, we must abandon the perception that order and disorder are in a constant state of collision. By means of a theoretical and historical analysis, Bodei interprets the relationship between passion and reason as a conflict between two complementary logics. *Geometry of the Passions* investigates the paradoxical conflict-collaboration between passions and reason, and between individual and political projects. Tracing the roles passion and reason have played throughout history, including in the political agendas of Descartes, Hobbes, and the French Jacobins, *Geometry of the Passions* reveals how passion and reason may be used as a vehicle for affirmation rather than self-enslavement.

*Virus Hunter* C.J. Peters, Mark Olshaker, 1998-04-13 A New York Times Notable Book The man who led the battle against Ebola in *The Hot Zone* teams up with the bestselling co-author of *Mind Hunter* to chronicle his extraordinary thirty-year career fighting deadly viruses. For three decades, Dr. C. J. Peters was on the front lines of our biological battle against “hot” viruses around the world. In the course of that career, he learned countless lessons about our interspecies turf wars with infectious agents. Called in to contain an outbreak of deadly hemorrhagic fever in Bolivia, he confronted the despair of trying to save a colleague who accidentally infected himself with an errant scalpel. Working in Level 4 labs on the Machupo and Ebola viruses, he saw time and again why expensive high-tech biohazard containment equipment is only as safe as the people who use it. Because of new, emerging viruses, and the return of old, “vanquished” ones for which vaccines do not exist, there remains a very real danger of a new epidemic that could, without proper surveillance and early intervention, spread worldwide virtually overnight. And the possibility of foreign countries or terrorist groups using deadly airborne viruses—the poor man’s nuclear arsenal—looms larger than ever. High-octane science writing at its best and most revealing, *Virus Hunter* is a thrilling first-person account of what it is like to be a warrior in the Hot Zone.

**The Story of Human Rights** Marcello Flores, 2011 How did the culture of human rights develop? How did different schools of thought influence the legal documents and measures over the centuries? Was the French Revolution truly the turning point for human rights? This book analyses these fundamental questions and outlines the history of human rights from the 18th century to the present day. It captures in one lucid source the essential aspects of the subject and is both an introduction to the arguments, and the key to in-depth study of the concepts and principles. While pushing the traditional boundaries between philosophical histories of rights and legal ones, Flores provides an objective approach to the modern-day, westernised concept, and expands it to analyze the contributions from African, Asian and Islamic cultures.
