Ojibway Heritage Basil Johnston,2011-01-28 Rarely accessible beyond the limits of its people, Ojibway mythology is as rich in meaning and mystery, as broad, as deep, and as innately appealing as the mythologies of Greece, Rome, Egypt, and other civilizations. In *Ojibway Heritage*, Basil Johnston sets forth the broad spectrum of his people's life, legends, and beliefs. Stories to be read, enjoyed, dwelt on, and freely interpreted, their authorship is perhaps most properly attributed to the tribal storytellers who have carried on the oral tradition which Basil Johnston records and preserves in this book.

Northwest Coast Indian Art Bill Holm,2017-01-03 The 50th anniversary edition of this classic work on the art of Northwest Coast Indians now offers color illustrations for a new generation of readers along with reflections from contemporary Northwest Coast artists about the impact of this book. The masterworks of Northwest Coast Native artists are admired today as among the great achievements of the world's artists. The painted and carved wooden screens, chests and boxes, rattles, crest hats, and other artworks display the complex and sophisticated northern Northwest Coast style of art that is the visual language used to illustrate inherited crests and tell family stories. In the 1950s Bill Holm, a graduate student of Dr. Erna Gunther, former Director of the Burke Museum, began a systematic study of northern Northwest Coast art. In 1965, after studying hundreds of bentwood boxes and chests, he published *Northwest Coast Indian Art: An Analysis of Form*. This book is a foundational reference on northern Northwest Coast Native art. Through his careful studies, Bill Holm described this visual language using new terminology that has become part of the established vocabulary that allows us to talk about works like these and understand changes in style both through time and between individual artists's styles. Holm examines how these pieces, although varied in origin, material, size, and purpose, are related to a surprising degree in the organization and form of their two-dimensional surface decoration. The author presents an incisive analysis of the use of

color, line, and texture; the organization of space; and such typical forms as ovoids, eyelids, U forms, and hands and feet. The evidence upon which he bases his conclusions constitutes a repository of valuable information for all succeeding researchers in the field. Replaces ISBN 9780295951027

As We Have Always Done Leanne Betasamosake Simpson, 2017-10-17 Winner: Native American and Indigenous Studies Association's Best Subsequent Book 2017 Honorable Mention: Labriola Center American Indian National Book Award 2017 Across North America, Indigenous acts of resistance have in recent years opposed the removal of federal protections for forests and waterways in Indigenous lands, halted the expansion of tar sands extraction and the pipeline construction at Standing Rock, and demanded justice for murdered and missing Indigenous women. In *As We Have Always Done*, Leanne Betasamosake Simpson locates Indigenous political resurgence as a practice rooted in uniquely Indigenous theorizing, writing, organizing, and thinking. Indigenous resistance is a radical rejection of contemporary colonialism focused around the refusal of the dispossession of both Indigenous bodies and land. Simpson makes clear that its goal can no longer be cultural resurgence as a mechanism for inclusion in a multicultural mosaic. Instead, she calls for unapologetic, place-based Indigenous alternatives to the destructive logics of the settler colonial state, including heteropatriarchy, white supremacy, and capitalist exploitation.

The Trickster Brain David Williams, 2012-05-29 Until recently, scientific and literary cultures have existed side-by-side but most often in parallel universes, without connection. *The Trickster Brain: Neuroscience, Evolution, and Nature* by David Williams addresses the premise that humans are a biological species stemming from the long process of evolution, and that we do exhibit a universal human nature, given to us through our genes. From this perspective, literature is shown to be a product of our biological selves. By exploring central ideas in neuroscience, evolutionary biology, linguistics, music, philosophy, ethics, religion, and history, Williams shows that it is the circuitry of the brain's hard-wired dispositions that continually create similar tales around the world: "archetypal" stories reflecting ancient tensions that arose from our evolutionary past and the very construction of our brains. The book asserts that to truly understand literature, one must look at the biological creature creating it. By using the lens of science to examine literature, we can see how stories reveal universal aspects of the biological mind. The Trickster character is particularly instructive as an archetypal character who embodies a raft of human traits and concerns, for Trickster is often god, devil, musical, sexual, silver tongued, animal, and human at once, treading upon the moral dictates of culture. Williams brings together science and the humanities, demonstrating a critical way of approaching literature that incorporates scientific thought.

Indians of the Northwest Coast Maximilien Bruggmann, Peter R. Gerber, 1989 Traces the development of the unique civilizations of the Northwest--the Tlingit, Tsimshian, Haida, Kwakiutl, Nootka, and Coast Salish peoples--and documents the powerful imagery of their cultures

Mythical Trickster Figures William J. Hynes, William G. Doty, 1993-01-30 *Mythical Trickster Figures*, is the first substantial collection of essays about the trickster to appear since Radin's 1955 *The Trickster*. Contributions by leading scholars treat a wide range of manifestations of this mischievous character, ranging from the Coyote of the American Southwest to such African figures as Eshu-Elegba and Ananse, the Japanese Susa-no-o, the Greek Hermes, Christian adaptations of Saint Peter, and examples found in contemporary American fiction and drama. The many humorous trickster stories included are fascinating in themselves, but Hynes and Doty also highlight the wide range of features of the trickster--the figure whose comic appearance often signifies that the most serious cultural values are being both challenged and enforced. William J. Hynes is Vice President for Academic Affairs and Professor of Religious Studies at Saint Mary's College of California. William G. Doty is Professor of Religious Studies at The University of Alabama and the author of *Mythography: The Study of Myths and Rituals* also published by The University of Alabama Press.
