**Educating the Student Body** Committee on Physical Activity and Physical Education in the School Environment,Food and Nutrition Board,Institute of Medicine.2013-11-13 Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for

strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

**2001 Shape of the Nation Report** National Association for Sport and Physical Education.2002 This report describes the current state of U.S. physical education (PE) to help determine the mandate and availability of PE programs by state; PE teacher qualifications; curricular standards; class size; and accountability for student achievement. Information comes from surveys of PE directors/consultants in all 50 states and the District of Columbia (DC). Surveys requested information about the PE mandate, state standards, student assessment, substitutions for PE, time allocations, teacher licensing, and current concerns. Only two states do not have PE mandates, though in many states, the mandate requires only that PE be provided and local districts provide content and format guidelines. Only one state requires daily PE for all students. In most states, certified PE specialists are recommended, but classroom teachers teach elementary PE. In nearly 40 states, certified PE specialists are required to teach middle and high school PE. Only six states do not require continuing education to maintain teacher licensure. Only four states have or are developing PE content standards. Most states allow a PE teacher student ratio of 1:30. PE is being assessed by state approved assessment in five states and DC. Physical fitness is being assessed in seven states and DC. Ten recommendations are presented. Summary information by each state is included. (SM)

**National Standards & Grade-Level Outcomes for K-12 Physical Education** SHAPE America - Society of Health and Physical Educators.2014-03-13 Focused on physical literacy and measurable outcomes, empowering physical educators to help students meet the Common Core standards, and coming from a recently renamed but longstanding organization intent on shaping a standard of excellence in physical education, National Standards & Grade-Level Outcomes for K-12 Physical Education is all that and much more. Created by SHAPE America — Society of Health and Physical Educators (formerly AAHPERD) — this text unveils the new National Standards for K-12 Physical Education. The standards and text have been retooled to support students’ holistic development. This is the third iteration of the National Standards for K-12 Physical Education, and this latest version features two prominent changes: •The term physical literacy underpins the standards. It

encompasses the three domains of physical education (psychomotor, cognitive, and affective) and considers not only physical competence and knowledge but also attitudes, motivation, and the social and psychological skills needed for participation. • Grade-level outcomes support the national physical education standards. These measurable outcomes are organized by level (elementary, middle, and high school) and by standard. They provide a bridge between the new standards and K-12 physical education curriculum development and make it easy for teachers to assess and track student progress across grades, resulting in physically literate students. In developing the grade-level outcomes, the authors focus on motor skill competency, student engagement and intrinsic motivation, instructional climate, gender differences, lifetime activity approach, and physical activity. All outcomes are written to align with the standards and with the intent of fostering lifelong physical activity. National Standards & Grade-Level Outcomes for K-12 Physical Education presents the standards and outcomes in ways that will help preservice teachers and current practitioners plan curricula, units, lessons, and tasks. The text also • empowers physical educators to help students meet the Common Core standards; • allows teachers to see the new standards and the scope and sequence for outcomes for all grade levels at a glance in a colorful, easy-to-read format; and • provides administrators, parents, and policy makers with a framework for understanding what students should know and be able to do as a result of their physical education instruction. The result is a text that teachers can confidently use in creating and enhancing high-quality programs that prepare students to be physically literate and active their whole lives.

*PE Metrics* SHAPE America - Society of Health and Physical Educators.2018-03-05 If you are looking for the definitive resource to help you measure your students' achievement, your search is over. *PE Metrics: Assessing Student Performance Using the National Standards & Grade-Level Outcomes for K-12 Physical Education, Third Edition*, aligns with SHAPE America's National Standards and Grade-Level Outcomes for K-12 Physical Education, was created by SHAPE America and its writing team, and was reviewed by researchers and teachers with expertise in assessment. The result is a text that you can use with confidence as you help develop physical literacy in your students. Written for physical educators, administrators, and curriculum writers (and for physical education majors and minors), this latest edition offers the following: • 130 ready-to-use assessments for kindergarten through grade 12 (65 elementary, 43 middle school, and 22 high school) • Worksheets, checklists, and rubrics that support the assessments • Guidance on creating your own assessments for any lesson or unit These assessments are aligned with the three SHAPE America lesson planning books for elementary, middle, and secondary school and dovetail with SHAPE America's *The Essentials of Teaching Physical Education*. The assessments can be used as they are, or you can modify them or use them as samples in creating assessments that are best suited to your needs. *PE Metrics*, now in a four-color design, is organized into four main parts: Part I introduces the purpose and uses of assessment, how to develop an assessment plan, and the various types of assessments and tools you can use. Part II contains sample assessments for students in grades K-5, focusing on fundamental motor skills; as such, the elementary-

level assessments center heavily on Standard 1. In part III, the emphasis shifts to middle school assessments, with a concentration on Standard 2 and on the categories of dance and rhythms, invasion games, net/wall games, fielding/striking games, outdoor pursuits, aquatics, and individual-performance activities. Part IV offers sample assessments for high school students, with a priority on providing evidence of the knowledge and skills students will need to remain active and fit after they leave high school. This resource provides a comprehensive, performance-based assessment system that enables you to incorporate assessment into every facet of your teaching, create assessments that are unique to your program, and measure your students' performance against the grade-level outcomes. The assessments are process focused and are designed to measure multiple constructs as well as provide meaningful feedback to students—ultimately helping them to develop holistically across all three learning domains (psychomotor, cognitive, and affective). PE Metrics will help you instill in students the knowledge, skills, and confidence they need to enjoy a lifetime of healthful physical activity.
