El mundo que vivimos Jorge Caceres, En un mundo que no deja de girar y en el que cada día estamos más atrapados en la rutina, una pareja lo deja todo en busca de un sueño que siempre estuvo ahí y que no se habían atrevido a cumplir. Hasta ahora. Solo una mochila y todas las ganas de conocer el ancho mundo. Un viaje en que las historias suceden sin pretensiones,

sin filtros ni postureo, con la mente abierta y quizás ahí este el significado de los viajes con mochila. Porque la libertad se encuentra solo si la buscas.

Un viaje de vida y vuelta Rafael Turrón,2018-11-14 ¿Pasillo, celda o ventanilla? Tras conocer una noticia que hace tambalear tanto su pasado como el presente, pues no tiene futuro, Francisco decide narrar desde su celda la maravillosa experiencia que le aportó Taiwán. Viajes que le hicieron descubrir un mundo que, después, mientras combatía en la guerra, intentó olvidar. Hoy quiere recordar y luchar con palabras para explicar quién es y quién no quiso ser, pero fue.

Megarrascacielos Abg Technologies,2021-03-29 Conquistar el cielo representa un anhelo del hombre desde el nacimiento de la propia humanidad. A través de los siglos se puede acceder a un sinfín de construcciones que dejan en claro esta aseveración. Los egipcios con sus pirámides, los romanos con sus torres, la antigua ciudad de Babilonia, todo eso da cuenta ineludible de incansables avances del ser humano para perfeccionar las técnicas de construcción y elevar colosos verticales en sus ciudades (Description in English below). Materiales como el adobe y la piedra, más tarde el hierro y el concreto, y por último el acero ofrecieron nuevas posibilidades. Estructuras que elevaron su altura junto con sus capacidades habitacionales se convirtieron en legítimos colosos de los cielos.Hoy es común encontrar edificios que superan largamente los 300 m de altura en cualquier rincón del planeta. Pero hace poco más de 150 años esto era aún una utopía, una ilusión. La pieza que completó el rompecabezas y permitió que la altura de los rascacielos alcanzara los primeros 100 m fue el ascensor, que si bien ya existía hacía un tiempo, a mediados del siglo XIX encontró en la audacia y el ingenio de un empresario la forma de transportar personas de manera segura. De la mano del Equitable Life, el primer edificio que contó con el novedoso ascensor seguro, el Monadnock y el Fuller Building, pioneros en diseño y técnicas de construcción, pasando por el Empire State con su récord de 40 años como el edificio más alto del mundo, las Torres Gemelas y la Sears Tower (hoy Willis Tower), Nueva York y Chicago se convirtieron en las ciudades que marcaron el paso en la industria de los rascacielos, ya fuera como torres residenciales o como conglomerados de oficinas, centros comerciales y lujosos hoteles. Con estructuras rectangulares básicas o con diseños modernos y vanguardistas; con fachadas de hormigón o totalmente acristaladas. Las opciones de utilización, construcción y diseño se volvieron infinitas. Asia, con su incesante crecimiento económico y financiero, se transformó en el epicentro de los rascacielos desde el siglo XXI. China es la referencia, con construcciones como la Torre de Shanghái, el Ping An Finance Center y la CITIC Tower. Aunque también Corea y Taiwán albergan en sus capitales rascacielos que se ubican entre los más elevados del planeta. Sin embargo, el mundo árabe es el que domina el cielo con el estratosférico Burj Khalifa y sus 828 m de altura que prevalecen en el árido y caluroso desierto de Dubái. Description in English: Beginning with the construction of the pyramids in Egypt or the ancient city of Babylon, man has not relinquished his desire to conquer the heavens. Essential to this has been perfecting the necessary construction techniques and developing materials as

innovative as they were practical. Thus, the invention of the safe elevator and emphasis on the use of steel. Examples of this are the Shanghai Tower, Taiwan's Taipei 101 and the incredible Burj Khalifa, the jewel of the Middle East standing 828 meters high.

El éxito a través del fracaso Petroski, Henry, 2023-07-17 Henry Petroski demuestra en este ensayo que el avance tecnológico y la mejora en el diseño son más una reacción ante la frustración por algo que no funciona bien que una forma de responder a nuevas necesidades. De esta manera el autor arroja una nueva luz sobre algunos fracasos espectaculares: desde los desastres de los transbordadores espaciales hasta la caída de las torres gemelas de Nueva York.

Un arquitecto es una caja Alberto Campo Baeza, 2021-06-01 De nuevo una caja llena de ideas. de ideas de arquitectura. Porque no me cansare de repetir que lo que los arquitectos hacemos es construir ideas y que estas ideas deben ser capaces de ser explicadas con claridad, que es lo que en estos textos se hace. De nuevo una colección de escritos de un grupo de arquitectos, todos ellos profesores que me han ayudado en la enseñanza en estos últimos años. No puedo dejar de repetir que en todos ellos se cumple, así se lo he exigido siempre a mis profesores, la triple condición orteguiana propuesta por Julián Marías: saber, saber enseñar y querer enseñar. Tengo la esperanza de que las ideas contenidas en esta caja que aquí hoy se abre llegarán bien lejos.

Marketing sectorial Julio Cerviño Fernández, 2008-09 El entorno competitivo actual se caracteriza por una gran especialización en sus respectivos sectores, con tendencias y características competitivas muy diferentes. Para la empresa, la clave está en diseñar e implementar una estrategia a partir de las relaciones inherentes entre el entorno socioeconómico general y su sector de actividad, adaptando y gestionando sus diversas áreas funcionales a las características particulares de su sector y a las tendencias generales del entorno nacional e internacional. En general, las bases conceptuales de la ciencia del marketing suelen ser las mismas en todos los sectores: una buena orientación al mercado buscando la creación de valor para todos los stakeholders de la empresa (principalmente consumidores, accionistas y empleados). La probabilidad de éxito en las decisiones comerciales se incrementa cuando la empresa define bien su público y mercado objetivo e implanta estrategias y políticas adaptadas a las especificidades de ese mercado. Pues bien, el objetivo de este libro es tratar, para el área de marketing, esta creciente especialidad en sectores de actividad, que requiere de conocimientos más específicos y sectoriales. El libro se dirige principalmente al estudiante avanzado de licenciatura y de Máster en Dirección y Gestión de Empresas (MBAs) que cuente con conocimientos previos en el campo del marketing. La estructura en catorce capítulos, que cubren áreas de especialización de creciente interés en el ámbito empresarial, está diseñada para que, dentro de los grados-licenciaturas del nuevo sistema de Bolonia, el programa encuadre fácilmente en las semanas lectivas de un cuatrimestre académico. Asimismo, y debido a la profunda cobertura de los temas y el apoyo de ejemplos y casos prácticos de empresas,

también constituye un excelente instrumento para los cursos intensivos Executive y un manual de apoyo para los directivos del área de marketing de cualquier tipo de empresa. El libro es un esfuerzo conjunto de un grupo amplio de profesores y especialistas de diversas universidades, escuelas de negocio y empresas, que han puesto en común los conocimientos académicos y experiencias profesionales en sus diversas áreas de especialización. Los contenidos están desarrollados de una manera práctica, amena y a la vez rigurosa y profunda, que permitirá al lector descubrir las diversas especialidades sectoriales dentro del apasionante mundo del marketing. Autores: Julián Peinador de Juana, Sara Campo, Ma Elisa Alén, J. APRENDIENDO DE LA ARQUITECTURA Gaston Michel,2022-03-23 La intención de estas reflexiones, es ayudar a comprender lo trascendente que es significa para nuestra profesión y para la sociedad en general mejorar en el máximo grado posible la capacidad de diseño en los arquitectos y la importancia decisiva que tiene realizar un buen anteproyecto con el que se tomen las mejores decisiones en relación a las circunstancias del requerimiento, con el fin de justificar todo el esfuerzo que demanda ejecutar un completo y bien documentado proyecto ejecutivo consecuente, de manera previa e independiente de la futura etapa de construcción, para garantizar la calidad de todo el proceso para realizar una buena obra de arquitectura. Pretendo demostrar, y si no al menos interesar al lector en debatir, que ese mejor desempeño del arquitecto diseñador está ligado a poder actuar con un conocimiento adquirido basado en la formación teórica y crítica de la arquitectura en general y de la Arquitectura Moderna en particular, comprendiendo las causas y efectos de las ideas fundamentales que sembraron los mejores arquitectos en sus mejores actuaciones. Entendiendo que un buen desarrollo de la estética en la arquitectura es lo que hace la diferencia y como ello se consigue desde la práctica proyectual, recorreremos los momentos más destacados de la historia en busca de las demostraciones que nos clarifiquen y nos ayuden a capacitarnos para ser los buenos proyectistas que la sociedad necesita. Pero no empezaremos nuestro derrotero en 1900, que es cuando

comienzan los cambios del diseño que necesitamos conocer y dominar para cumplir el objetivo. Lo haremos en el año 450 AC aproximadamente, pues explorar cómo se han comportado las sucesivas sociedades acerca de la estética en la arquitectura nos permitirá reconocer que en nuestra disciplina hay un proceso de progreso evolucionista, así como en la teoría darwiniana de la evolución de las especies.
