NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Wall Street Journal • Financial Times In The Power of Habit, award-winning business reporter Charles Duhigg takes us to the thrilling edge of scientific discoveries that explain why habits exist and how they can be changed. Frame and Generic Space Bernard Leupen,2006 The average lifespan of a house is somewhere around 100 years. During that time it will see many mutations in household composition and related spatial rituals. Designers are therefore faced with the task of giving form to something that is constantly subject to change. Many studies into flexibility focus on the changeable, on movable partitions and variation in the internal layout. The present study takes not the changeable but the permanent as its departure-point. The permanent--i.e. the more durable component of the house or building--constitutes the frame within which change can take place, while the frame defines the generic space, the space in which change can occur.
