Reading and Riding Eileen S. DeMarco, 2006 Reading and Riding is the first in-depth study of Hachette and Company's railroad bookstore network. The Bibliotheque des Chemins de Fer, begun in 1853 as a means to market a special collection of books to train travelers, developed into France's first national chain bookstore. This analysis of the railroad bookstore network demonstrates how it transformed Hachette and Company from an academic publishing house into Europe's dominant publisher and distributor of all types of books, newspapers, and periodicals. It reveals the network's critical role in the modernization of the French publishing industry through the application of new marketing techniques, the use of the growing rail network as a primary means of distribution, and the large-scale employment of women.

Mansions of the Moon: A Lunar Zodiac for Astrology and Magic 2nd Edition with 2019-2033 Mansion Ephemeris Christopher Warnock, 2019-02-07 The Mansions of the Moon are a lunar Zodiac, measuring the movement of the Moon against the fixed stars. Used by medieval and Renaissance astrologers, this ancient system has been lost for hundreds of years. In the Mansions of the Moon, author Christopher Warnock, a leading traditional astrologer and astrological magician, explains the origin and use of the Mansions, for electional and natal astrology as well as for the production of Mansion talismans. Included are English translations of the Mansion sections from Picatrix, the most famous astrological grimoire. Also included are 28 beautiful Mansion images by the talented artist and mage Nigel Jackson, which readers can use to create their own Mansion talismans. With a full introduction, theory and practical examples, updated 2019-2033 Mansions ephemeris and numerous useful appendices of traditional Mansion sources, the Mansions of the Moon is a must have source for traditional astrology and astrological magic.

The Spaces of the Modern City Gyan Prakash, Kevin M. Kruse, 2021-06-08 By United Nations estimates, 60 percent of the world's population will be urban by 2030. With the increasing speed of urbanization, especially in the developing world, scholars are now rethinking standard concepts and histories of modern cities. The Spaces of the Modern City historicizes the contemporary discussion of urbanism, highlighting the local and global breadth of the city landscape. This interdisciplinary collection examines how the city develops in the interactions of space and imagination. The essays focus on issues such as street design in Vienna, the motion picture industry in Los Angeles, architecture in Marseilles and Algiers, and the kaleidoscopic paradox of post-apartheid Johannesburg. They explore the nature of spatial politics, examining the disparate

worlds of eighteenth-century Baghdad, nineteenth-century Morelia, Cold War-era West Berlin, and postwar Los Angeles. They also show the meaning of everyday spaces to urban life, illuminating issues such as crime in metropolitan London, youth culture in Dakar, memory projects in Tokyo, and Bombay cinema. Informed by a range of theoretical writings, this collection offers a fresh and truly global perspective on the nature of the modern city. The contributors are Sheila Crane, Belinda Davis, Mamadou Diouf, Philip J. Ethington, David Frisby, Christina M. Jiménez, Dina Rizk Khoury, Ranjani Mazumdar, Frank Mort, Martin Murray, Jordan Sand, and Sarah Schrank.

The Great Train Race Allan Mitchell, 2000 The breadth of [this] comparative study of French and German railroad development - the largest and most important railway systems on the continent - is a signal achievement... A brief sketch of the book's trajectory does justice neither to the wealth of detail nor to the arresting insights that future historians will draw on for years to come. - Central European History ... a fine book. Indeed, it is a labour of love, informed by intensive research and a lifetime's interest. All historians of European railways will be greatly in its debt. - The International History Review The Great Train Race is a well-researched book, full of useful comparative insights into French and German railway development, and doubtless an important contribution to the history of Franco-German rivalry before World War One ... [R]ecommended to economic historians as a study which shows, in well-balanced comparative perspective, the great importance of their field for understanding political history. - Journal of Modern History For Mitchell, this was clearly a labor of love, and it is a pleasure to see a job well done. The book has a full scholarly apparatus along with vital charts and maps to keep things clear. - H-German Allan Mitchell is presenting, with *The Great Train Race*, a highly informed and ambitious study, in which the fundamental importance of trains for the societies of both countries has been convincingly argued. - Historische Zeitschrift ...Presents a rich and understandable overview...The book provides an excellent model for researching and writing comparative railway histories. Such analyses of the relationship between state and railway are rare events. - The Journal of Transport History From their origins, railways produced an intense competition between the two major continental systems in France and Germany. Fitting a new technology into existing political institutions and social habits, these two nations became inexorably involved in industrial and commercial rivalry that eventually escalated into the armed conflict of 1914. Based on many years of research in French and German archives, this study examines the adaptation of railroads and steam engines from Britain to the continent of Europe after the Napoleonic age. A fascinating example of how the same technology, borrowed at the same time from the same source, was assimilated differently by the two continental powers, this book offers a groundbreaking analysis of the crossroads of technology and politics during the first Industrial Revolution.

Decolonizing Christianity Darcie Fontaine, 2016-06-20 This book traces Christianity's change from European imperialism's moral foundation to a voice of political and social change during decolonization.

Financial Transaction Manager Technical Overview Craig Bryce, Sean Dunne, Prasad Edlabadkar, Peter

McGrath,Sandesh Udupa,IBM Redbooks,2014-03-21 Dramatic forces of change continue to sweep the financial services industry. The age of the empowered customer is here and are changing the way financial products are delivered, sold, and serviced, which are making relationships more complex than ever. The explosion of data and intense competition, which is combined with slow or inconsistent economic conditions, makes it imperative for financial institutions to find new and cost effective ways to increase market share, renew customer trust, and drive profitable growth. In this new business environment, the transaction processing arm of the industry is facing increased pressure to reduce float, better manage liquidity, and provide regulators and clients with increased transparency. At the same time, the industry must effectively manage the risks that are associated with introducing customer-focused and regionalized products and services. Financial Transaction Manager enables the management, orchestration, and monitoring of financial transactions during their processing lifecycle. Financial Transaction Manager provides the capability to integrate and unify financial transactions in various industry formats (including ISO 20022, SWIFT, NACHA, EDIFACT, ANSI X12 and others). By using Financial Transaction Manager, financial institutions gain visibility into message processing, balance financial risk, and facilitate effective performance management. This IBM® Redbooks® publication outlines how Financial Transaction Manager is deployed to realize the benefits of transaction transparency, increase business agility, and allow for innovation that is built on a robust and high-performance environment.

Decolonization and the Remaking of Christianity Elizabeth A. Foster,Udi Greenberg,2023-10-24 In the decades following the era of decolonization, global Christianity experienced a seismic shift. While Catholicism and Protestantism have declined in their historic European strongholds, they have sustained explosive growth in Asia, Latin America, and Africa. This demographic change has established Christians from the Global South as an increasingly dominant presence in modern Christian thought, culture, and politics. Decolonization and the Remaking of Christianity unearths the roots of this development, charting the metamorphosis of Christian practice and institutions across five continents throughout the pivotal years of decolonization. The essays in this collection illustrate the diverse new ideas, rituals, and organizations created in the wake of Western imperialism's formal collapse and investigate how religious leaders, politicians, theologians, and lay people debated and shaped a new Christianity for a postcolonial world. Contributors argue that the collapse of colonialism and broader cultural challenges to Western power fostered new organizations, theologies, and political engagements across the world, ultimately setting Christianity on its current trajectory away from its colonial heritage. These essays interrogate decolonization's varied and conflicting impacts on global Christianity, while also providing a novel framework for rethinking decolonization's modern legacies. Taken together, this book charts the relationship between decolonization and Christianity on a truly global scale. Contributors: Joel Cabrita, Darcie Fontaine, Elizabeth A. Foster, Udi Greenberg, David Kirkpatrick, Eric Morier-Genoud, Phi-Vân Nguyen, Justin Reynolds, Sarah Shortall, Lydia Walker, Charlotte Walker-Said, Albert Wu, Gene

Zubovich.

Business in the Age of Extremes Hartmut Berghoff, Jürgen Kocka, Dieter Ziegler, 2013-01-28 This collection of essays explores the impact that nationalism, capitalism and socialism had on economics during the first half of the twentieth century. Focusing on Central Europe, contributors examine the role that businesspeople and enterprises played in Germany's and Austria's paths to the catastrophe of Nazism. Based on new archival research, the essays gathered here ask how the business community became involved in the political process and describes the consequences arising from that involvement. Particular attention is given to the responses of individual businesspeople to changing political circumstances and their efforts to balance the demands of their consciences with the pursuit for profit.

Extremely pureXML in DB2 10 for z/OS Paolo Bruni, Neale Armstrong, Ravi Kumar, Kirsten Ann Larsen, Tink Tysor, Hao Zhang, IBM Redbooks, 2011-01-28 The DB2® pureXML® feature offers sophisticated capabilities to store, process and manage XML data in its native hierarchical format. By integrating XML data intact into a relational database structure, users can take full advantage of DB2's relational data management features. In this IBM® Redbooks® publication, we document the steps for the implementation of a simple but meaningful XML application scenario. We have chosen to provide samples in COBOL and Java™ language. The purpose is to provide an easy path to follow to integrate the XML data type for the traditional DB2 for z/OS® user. We also add considerations for the data administrator and suggest best practices for ease of use and better performance.

Adventure Capital Julie Kleinman, 2019-12-03 Paris's Gare du Nord is one of the busiest international transit centers in the world. In the past three decades, it has become an important hub for West African migrants—self-fashioned adventurers—navigating life in the city. In this groundbreaking work, Julie Kleinman chronicles how West Africans use the Gare du Nord to create economic opportunities, confront police harassment, and forge connections to people outside of their communities. Drawing on ten years of ethnographic research, including an internship at the French national railway company, Kleinman reveals how racial inequality is ingrained in the order of Parisian public space. She vividly describes the extraordinary ways that African migrants retool French transit infrastructure to build alternative pathways toward social and economic integration where state institutions have failed. In doing so, these adventurers defy boundaries—between migrant and citizen, center and periphery, neighbor and stranger—that have shaped urban planning and immigration policy. Adventure Capital offers a new understanding of contemporary migration and belonging, capturing the central role that West African migrants play in revitalizing French urban life.

The European Blood and Marrow Transplantation Textbook for Nurses Michelle Kenyon,Aleksandra Babic,2018-03-14

This book is open access under a CC BY 4.0 license. This textbook, endorsed by the European Society for Blood and Marrow Transplantation (EBMT), provides adult and paediatric nurses with a full and informative guide covering all aspects of transplant nursing, from basic principles to advanced concepts. It takes the reader on a journey through the history of transplant nursing, including essential and progressive elements to help nurses improve their knowledge and benefit the patient experience, as well as a comprehensive introduction to research and auditing methods. This new volume specifically intended for nurses, complements the ESH-EBMT reference title, a popular educational resource originally developed in 2003 for physicians to accompany an annual training course also serving as an educational tool in its own right. This title is designed to develop the knowledge of nurses in transplantation. It is the first book of its kind specifically targeted at nurses in this specialist field and acknowledges the valuable contribution that nursing makes in this area. This volume presents information that is essential for the education of nurses new to transplantation, while also offering a valuable resource for more experienced nurses who wish to update their knowledge.
