Critical Studies in Indian Grammarians I Madhav Deshpande, 2020-08-06 In the historical study of the Indian grammarian tradition, a line of demarcation can often be drawn between the conformity of a system with the well-known grammar of Pāṇini and the explanatory effectiveness of that system. One element of Pāṇini's grammar that scholars have sometimes struggled to bring across this line of demarcation is the theory of homogeneity, or sāvarṇya, which concerns the final consonants in Pāṇini's reference catalog, as well as phonetic similarities between sounds. While modern Sanskrit scholars understand how to interpret and apply Pāṇini's homogeneity, they still find it necessary to unravel the history of varying interpretations of the theory in subsequent grammars. Madhav Deshpande's The Theory of Homogeneity provides a thorough account of the historical development of the theory. Proceeding first to study this conception in the Pāṇinian tradition, Deshpande then passes on to other grammatical systems. Deshpande gives attention not only to the definitions of homogeneity in these systems but also the implementation of the theory in those respective systems. Even where definitions are identical, the concept may be applied quite differently, in which cases Deshpande examines by considering the historical relationships among the various systems.

The Ashṭādhyāyī of Pāṇini Pāṇini,1980 Panini's Ashtadhyayi represents the first attempt in the history of the world to describe and analyse the components of a language on scientific lines. It has not only been universally acclaimed as the first and foremost specimen of Descriptive Grammar but has also been the chief source of inspiration for the linguist engaged in describing languages of different regions. To understand Sanskrit language, and especially that part of it which embodies the highest aspirations of ancient Aryan people, viz., the Brahmanas, Samhitas, Upanisads, it is absolutely necessary to have a complete knowledge of the grammar elaborated by Panini. Being a masterpiece of reasoning and artistic arrangement its study is bound to cultivate intellectual powers. Western scholars have described it as a wonderful specimen or a notable manifestation of Indian intelligence. This book is an English translation of Ashtadhyayi in two volumes and has won a unique position in the world of scholarship.
