The Columbia History of American Television Gary Edgerton,2007-10-12 Television is a form of media without equal. It has revolutionized the way we learn about and communicate with the world and has reinvented the way we experience ourselves and others. More than just cheap entertainment, TV is an undeniable component of our culture and contains many clues to who we are, what we value, and where we might be headed in the future. Media historian Gary R. Edgerton follows the technological developments and increasing cultural relevance of TV from its prehistory (before 1947) to the Network Era (1948-1975) and the Cable Era (1976-1994). He begins with the laying of the first telegraph line in 1844, which gave rise to the idea that images and sounds could be transmitted over long distances. He then considers the remodeling of television's look and purpose during World War II; the gender, racial, and ethnic components of its early broadcasts and audiences; its transformation of postwar America; and its function in the political life of the country. He talks of the birth of prime time and cable, the influence of innovators like Sylvester Pat Weaver, Roone Arledge, and Ted Turner, as well as television's entrance into the international market, describing the ascent of such programs as *Dallas* and *The Cosby Show*, and the impact these exports have had on transmitting American culture abroad. Edgerton concludes with a discerning look at our current Digital Era (1995-present) and the new forms of instantaneous communication that continue to change America's social, political, and economic landscape. Richly researched and engaging, Edgerton's history tracks television's growth into a convergent

technology, a global industry, a social catalyst, a viable art form, and a complex and dynamic reflection of the American mind and character. It took only ten years for television to penetrate thirty-five million households, and by 1983, the average home kept their set on for more than seven hours a day. The Columbia History of American Television illuminates our complex relationship with this singular medium and provides historical and critical knowledge for understanding TV as a technology, an industry, an art form, and an institutional force.

Dramatic Geography Laurence Publicover, 2017-09-15 Focusing on early modern plays which stage encounters between peoples of different cultures, this book asks how a sense of geographical location was created in early modern theatres that featured minimal scenery. While previous studies have stressed these plays' connections to a historical Mediterranean in which England was increasingly involved, this volume demonstrates how their dramatic geography was shaped through a literary and theatrical heritage. Reading canonical plays including *The Merchant of Venice*, *The Jew of Malta*, and *The Tempest* alongside lesser-known dramas such as *Soliman and Perseda*, *Guy of Warwick*, and *The Travels of the Three English Brothers*, *Dramatic Geography* illustrates how early modern dramatists staging foreign worlds drew upon a romance tradition dating back to the medieval period, and how they responded to one another's plays to create an 'intertheatrical geography'. These strategies shape the plays' wider meanings in important ways, and could only have operated within the theatrical environment peculiar to early modern London: one in which playwrights worked in close proximity, in one instance perhaps even living together while composing Mediterranean dramas, and one where they could expect audiences to respond to subtle generic and intertextual negotiations. In reassessing this group of plays, Laurence Publicover brings into conversation scholarship on theatre history, cultural encounter, and literary geography; the book also contributes to current debates in early modern studies regarding the nature of dramatic authorship, the relationship between genre and history, and the continuities that run between the fourteenth and seventeenth centuries.

Just Joking Gross National Geographic Kids, 2017 Brace yourself for some serious (seriously fun) ickiness! This delightfully disgusting book is a tribute to all kinds of everyday nastiness! Funny profiles of super-gross animals and weird-but-true science show that grossness is also downright fascinating.

New Perspectives on Geography of Media SHAO Peiren, 2023-12-02 Based on the ancient Chinese concept of the unity of Heaven and Man (天人合一, 'tian ren he yi'), guided by principles governing the connections and interdependencies between Heaven, Earth, Man, and the media, and in accord with the coexistence of these four elements in balance and in harmony, this monograph outlines the scope of the study, fundamental concepts and theories, and future directions of research in the interdisciplinary field of the geography of media. The author delves deeply into the themes of time, space, place, landscape, and scale to introduce readers to a wide array of intriguing concepts that add new dimensions to this relatively new academic

field. In addition, this monograph presents a history of media geography as it has evolved in the West and in China over the past several decades, and introduces principles and values from traditional Chinese culture that shed light on the nature, direction, and significance of media studies and communication research now being conducted around the globe. Intended readership: professional scholars, graduates, and general readers.
