*Engine Tribology* C.M. Taylor.1993-07-23 Customer expectations and international competition are obliging car and commercial vehicle manufacturers to produce more efficient and cleaner products in shorter product cycle times. The consideration of Engine Tribology has a leading role to play in helping to achieve these goals. Specific areas of interdisciplinary interest include: design influences on fuel economy and emissions; new materials (ceramics, steels, coatings, lubricants, additives); low viscosity lubricants; and low heat rejection (adiabatic) engines. This volume gives a detailed and current review on some basic features of tribology particularly associated with internal combustion engines such as: lubrication analysis relevant to plain bearings, Hertzian contact theory and elastohydrodynamic lubrication associated with cams and followers and friction and wear in a general context. Several chapters examine engine bearings, valve trains, (cams and followers) and piston assemblies. For each machine element a background introduction is followed by design interpretations and a consideration of future developments. The important topic of materials, solids and lubricants is focused upon in the concluding chapters. The work will be of interest to engineers and researchers in the automobile, automotive products, petroleum and associated industries.

**Developing Social Equity in Australian Adult Education** Pamela Osmond.2021-03-07 Developing Social Equity in Australian Adult Education: Lessons from the Past presents a case study of the trajectory of an Australian adult basic education program in New South Wales from its humanist, social justice beginnings, through forty years of destabilising change. It identifies the influences and influencers that have directed this change; those that were responsible for the creation of the field in its foundation years, and that were displaced by other, more powerful actors representing the global influence of the neoliberal ideology. The story is told largely through archival evidence and the voices of those practitioners who helped shape the discourse and practice of the foundation years, and who were required to respond to constantly changing policies and socio-economic contexts. It discusses some lessons that might be learnt from the past in order that a new set of actors might be mobilised to promote an alternate discourse. This book will appeal to students and scholars of social justice and adult education, and practitioners involved in adult education.

**Understanding Infants Psychoanalytically** Elizabeth Urban.2022-03-28 Focussing on infants and the relationship between child and parent, this book presents a discourse on eminent Jungian child analyst Michael Fordham's model of development that extended Jung's theory to infancy and childhood. In this book, Elizabeth Urban, a Jungian psychotherapist in weekly conversations with Fordham, proposes five key areas, such as identifying periods of primary self-function and the active participation of the infant in development, that contribute to the Fordham model of infant development. Drawing extensively on her observations and experiences working in a London child and adolescent unit, and a mother and baby unit, as well as using real-life observations to support the proposed contributions, the author provides a deeper understanding of infant development in the context of the relationship with the parents. This book is a unique contribution to the study of child development and is of great interest to paediatricians, psychotherapists, and other mental health professionals who work with children and their parents.

Frenchtown Summer Robert Cormier.2009-05-27 Eugene is remembering the summer of 1938 in Frenchtown, a time when he began to wonder "what I was doing here on the planet Earth." Here in vibrant, exquisite detail are his lovely mother, his aunts and uncles, cousins and friends, and especially his beloved, enigmatic father. Here, too, is the world of a mill town: the boys swimming in a brook that is red or purple or green, depending on the dyes dumped that day by the comb shop; the visit of the ice man; and the boys' trips to the cemetery or the forbidden railroad tracks. And here also is a darker world—the mystery of a girl murdered years before. Robert Cormier's touching, funny, melancholy chronicle of a vanished world celebrates a son's connection to his father and human relationships that are timeless.

**Humanism and Religion in Early Modern Spain** Terence O'Reilly.2021-09-30 Humanism and Religion in Early Modern Spain brings together twenty-five essays by renowned historian Terence O'Reilly. The essays examine the interplay of religion and humanism in a series of writings composed in sixteenth-century Spain. It begins by presenting essential background: the coming together during the reign of the Emperor Charles V of Erasmian humanism and various movements of religious reform, some of them heterodox. It then moves on to the reign of Philip II, focusing on the mystical poetry and

prose of St John of the Cross. It explores the influence on his writings of his humanist learning – classical, biblical and patristic. The third part of the book concerns a verse-epistle by John’s contemporary, Francisco de Aldana. One chapter presents the text with a parallel version in English, whilst two others trace its debt to Florentine Neoplatonism, particularly the thought of Marsilio Ficino. The final part is devoted to the humanism of the poet and Scripture scholar Luis de León, and specifically to the confluence in his work of biblical and classical motifs. This book is essential reading for scholars and students of early modern Spanish history, as well those interested in literary studies and the history of religion. (CS 1102).
