Essentials of Global Mental Health Samuel O. Okpaku.2014-02-27 Defines an approach to mental healthcare focused on achieving international equity in coverage, options and outcomes.

Cancer Epidemiology Amr Soliman, David Schottenfeld, Paolo Boffetta.2013-06-04 According to the World Health Organization's 2008 GLOBOCAN report, 64% of global cancer deaths -- and 56% of cancer cases -- were registered in countries in Africa, Asia, or Latin America. So while cancer is unquestionably a global burden, its reach in the developing world points to the need for specialized study on cancer in these countries. Cancer Epidemiology: Low- and Middle-Income Countries and Special Populations reviews the current status of cancer epidemiologic research and training -- rationale, requisite infrastructure, methodologic principles, and illustrative examples in low- and middle-income countries -- in order to facilitate future advances by trained health professionals. The result is a valuable resource for both program leaders and graduate and post-graduate students pursuing careers in international cancer epidemiologic research.

Coronavirus Disease (COVID-19): Pathophysiology, Epidemiology, Clinical Management and Public Health Response, Volume II (volume I.B) Thomas Rawson, Marco Iosa, Fabrizio Ricci, Zisis Kozlakidis, Longxiang Su, Catherine Ropert, Jonathan Kantor, Constantinos Tsioutis, Susan Christina Welburn, Burc Barin, Jiufeng Sun, Eugenie Ruth Lumbers. 2023-05-31 Almost nine months since the first recorded case, the novel betacoronavirus; severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), has now passed 18 million confirmed cases. The multi-disciplinary work of researchers worldwide has provided a far deeper understanding of COVID-19 pathogenesis, clinical treatment and outcomes, lethality, disease-spread dynamics, period of infectivity, containment interventions, as well as providing a wealth of relevant epidemiological data. With 27 vaccines currently undergoing human trials, and countries worldwide continuing to battle case numbers, or prepare for resurgences, the need for efficient, high-quality pipelines for peer-reviewed research remains as crucial as ever.

Neutrosophic Sets and Systems, Vol. 31, 2020 Florentin Smarandache, Mohamed Abdel-Basset. "Neutrosophic Sets and Systems" has been created for publications on advanced studies in neutrosophy, neutrosophic set, neutrosophic logic, neutrosophic probability, neutrosophic statistics that started in 1995 and their applications in any field, such as the neutrosophic structures developed in algebra, geometry, topology, etc.

Epidemiology Of Eye Disease, The (Third Edition) Johnson Gordon J, Minassian Darwin C, Weale Robert A, West Sheila K. 2012-03-13 This unique book is a comprehensive coverage of the epidemiology of the world's major blinding eye diseases, written by internationally acclaimed experts in each field. Edited by world-renowned epidemiologists and ophthalmologists, the chapters on each leading cause of blindness describe its biology, epidemiology, risk factors, clinical

trials, possibilities for prevention, and new research avenues. New chapters include Research Synthesis, Epidemiology of Dry Eye Disease, and Epidemiology of Uveitis, as well as programme issues for reaching the goal of eliminating avoidable blindness by 2020. This book is essential for any eye care practitioner interested in the causation or prevention of disease, and should be part of any public health discipline's library with a focus on improving eye health worldwide.

Coronary Heart Disease Epidemiology Michael Marmot, M. G. Marmot, Paul Elliott. 2005 Heart attack (ischaemic heart disease or coronary heart disease) as one of a group of cardiovascular diseases, is one of the main causes of death (over 30 million/year) in the developed and developing world. The dual aim of this book is to review the well-established risk factors in CHD and to look forward to disease prevention, equipped with lessons from the past. The book covers etiology to public health, including studies within a single population and international studies, important areas of methodological development, trials to test preventive strategies, and the application of epidemiological and other knowledge to the development of public health policy for the prevention of widespread disease. It is an all-encompassing work containing contributions from the world authorities in the field.

Mathematical Modelling in Health, Social and Applied Sciences Hemen Dutta. 2020-02-29 This book discusses significant research findings in the field of mathematical modelling, with particular emphasis on important applied-sciences, health, and social issues. It includes topics such as model on viral immunology, stochastic models for the dynamics of influenza, model describing the transmission of dengue, model for human papillomavirus (HPV) infection, prostate cancer model, realization of economic growth by goal programming, modelling of grazing periodic solutions in discontinuous systems, modelling of predation system, fractional epidemiological model for computer viruses, and nonlinear ecological models. A unique addition in the proposed areas of research and education, this book is a valuable resource for graduate students, researchers and educators associated with the study of mathematical modelling of health, social and applied-sciences issues. Readers interested in applied mathematics should also find this book valuable.

Child and Adolescent Psychiatry in Sri Lanka Yasodha Maheshi Rohanachandra. 2023-05-09 Sri Lanka is a lower middle-income country (LMIC) with a population of 4.6 million between 5 and 17 years-old. Poverty, terrorism and the effects of long-standing civil war have created a high mental health burden in the country. Similar to other LMICs, mental health is a neglected and an under-researched area in Sri Lanka. Sri Lanka has only 10 board-certified child and adolescent psychiatrists in the country with 0.03 child and adolescent psychiatrists per 100 000 population. Due to the limited number of child and adolescent psychiatrists, a child and adolescent psychiatrist in Sri Lanka has a diverse role including curative, health promotion, medico-legal, research and teaching responsibilities. This book gives an overview of the common psychosocial problems among children and adolescents in Sri Lanka and the nature of the child and adolescent mental health

services available in the country at present, and elaborates the challenges faced by practitioners when providing mental health services to children and adolescents, with limited resources. The book also discusses practical solutions that can be taken to improve the child and adolescent mental health services in low-income settings, where scarcity of resources makes it impossible to adhere to ideal practice.

COVID-19 in South, West, and Southeast Asia Mohd Mizan Aslam, Rohan Gunaratna. 2022-12-19 Aslam and Gunaratna bring together a broad analysis of the responses of states in Asia to the threats presented by the COVID-19 pandemic in its early phase. While the impact of the pandemic has undoubtedly been disastrous, it has also taught many lessons about social, political, economic, and security norms in modern civilization. The contributors to this book look at how these lessons have been learned—often the hard way—by a range of states including India, Pakistan, Sri Lanka, Singapore, Indonesia, Thailand, Brunei Darussalam, and Jordan, as well as by international organizations including ASEAN. They look at a range of issues, going beyond the most apparent healthcare concerns to also look at challenges such as the gig economy, terrorism, extremism, religious identity, and cybersecurity. Using these country-based case studies, this book establishes a framework for understanding these challenges and establishing best practice and scalable solutions for addressing them. A valuable resource for scholars and practitioners trying to understand how the world will and won't be changed by the impact of COVID-19, especially in the realms of security, society, and economy.

Negotiating the Pandemic Inayat Ali, Robbie Davis-Floyd. 2022-03-30 This book centers on negotiations around cultural, governmental, and individual constructions of COVID-19. It considers how the coronavirus pandemic has been negotiated in different cultures and countries, with the final part of the volume focusing on South Asia and Pakistan in particular. The chapters include auto-ethnographic accounts and ethnographic explorations that reflect upon experiences of living with the pandemic and its implications for all areas of life. The book explicates people's dealings with COVID-19 at various levels, situates the spread of rumors, conspiracy theories, and new social rituals within micro- and/or macro-contexts, and describes the interplay between the virus and various institutionalized forms of inequalities and structural vulnerabilities. Bringing together a variety of perspectives, the volume relates to the past, describes the Covidian present, and offers futuristic implications. It enlists distinct imaginaries based on current understandings of an extraordinary challenge that holds

significant importance for our human future.

Digital Advances in Medicine, E-Health, and Communication Technologies Rodrigues, Joel J.P.C..2013-01-31 Digital Advances in Medicine, E-Health, and Communication Technologies explores the developments and trends in medical informatics and its approaches toward telemedicine and e-health applications. This comprehensive collection of research brings together academia and industry by highlighting recent advances in electronic health, medical communications and applications for e-health and medicine.

Biosurveillance Taha Kass-Hout,Xiaohui Zhang.2010-11-09 As evidenced by the anthrax attacks in 2001, the SARS outbreak in 2003, and the H1N1 influenza pandemic in 2009, a pathogen does not recognize geographic or national boundaries, often leading to devastating consequences. Automated biosurveillance systems have emerged as key solutions for mitigating current and future health-related events. Focusing on this promising public health innovation, Biosurveillance: Methods and Case Studies discusses how these systems churn through vast amounts of health-related data to support epidemiologists and public health officials in the early identification, situation awareness, and response management of natural and man-made health-related events. The book follows a natural sequence from theory to application. The initial chapters build a foundation while subsequent chapters present more applied case studies from around the world, including China, the United States, Denmark, and the Asia-Pacific region. The contributors share candid, first-hand insights on lessons learned and unresolved issues that will help chart the future of biosurveillance. As this book illustrates, biosurveillance operates in a complex, multidimensional problem space that incorporates varied data. Capturing the progress of modern-day pioneers who are walking in John Snow's footsteps, this volume shows how contemporary information technology can be applied to the age-old challenge of combating the spread of disease and illness.

The Epidemiology of Diabetes Mellitus Jean Marie Ekoé,Marian Rewers,Rhys Williams,Paul Zimmet.2008-09-15 The first edition of this book gained recognition as the definitive textbook of diabetes epidemiology. The second edition builds on this success, gathering recent information on international trends and data for diabetes mellitus. In particular, the book highlights the dramatic rise of Type 2 diabetes in children, adolescents and the elderly throughout the world. One new section features prevention and screening of both Type1 and Type 2 diabetes. Other new chapters cover the epidemiology of obesity and the impact of nutrition, and review available guidelines for better worldwide glycemic control. Future challenges, including the effects of antipsychotic treatment and HIV infection and therapy on diabetes, are also addressed. All chapters

have been completely revised and updated, covering: definitions, classification and risk factors for diabetes new evidence for screening and prevention of Type 1 and Type 2 diabetes epidemiology of complications and associated risk factors economic aspects: the direct and indirect costs of diabetes. The Epidemiology of Diabetes Mellitus fills the need for a current compendium of diabetes epidemiology in the tradition of the first monumental text of the late Kelly West. It is essential reading for general practitioners, diabetologists, clinical endocrinologists, cardiologists, epidemiologists, nurses, dieticians, and other diabetes care providers, as well as health care decision makers.

Coronasphere Chandan Kumar Sharma, Reshmi Banerjee. 2022-12-23 This book presents a broad overview of the challenges posed by COVID-19 in India and its neighboring countries. It studies the differing responses to COVID-19 infections across South Asia, the variegated impact of the pandemic on its societies, communities and economies, and emerging challenges which require an interdisciplinary understanding and analysis. With a range of case studies from India, Bangladesh, Myanmar, Pakistan, Nepal, Bhutan, and Sri Lanka, this book, Analyses the socio-economic impact of the pandemic, including the structural challenges faced by farmers in the agricultural production and migrant workers in the informal sectors; Examines the shifting trends in migration and displacement during the pandemic; Explores the precarity faced by LGBTQ+, transgender, Dalit, tribal, senior citizens, and other marginalized communities during the pandemic; Discusses the gendered impact of the pandemic on women and girls, combining with multiple and intersecting inequalities like race, ethnicity, socio-economic status, age, geographical location, and sexual orientation; Sheds light on the position of health infrastructure and healthcare services across different countries, and the transitions experienced in their education sectors as well, in response to COVID-19. A holistic read on the pandemic, this book will be of interest to scholars and researchers of sociology, medical anthropology, sociology of health, pandemic and health studies, political studies, social anthropology, public policy, and South Asian studies.

Zoonosis Jacob Lorenzo-Morales. 2012-04-04 Zoonotic diseases are mainly caused by bacterial, viral or parasitic agents although unconventional agents such as prions could also be involved in causing zoonotic diseases. Many of the zoonotic diseases are a public health concern but also affect the production of food of animal origin thus they could cause problems in international trade of animal-origin goods. A major factor contributing to the emergence of new zoonotic pathogens in human populations is increased contact between humans and animals. This book provides an insight on zoonosis and both authors and the editor hope that the work compiled in it would help to raise awareness and interest in this field. It should also help

researchers, clinicians and other readers in their research and clinical usage.

Strategic Management During a Pandemic Vikas Kumar,Gaurav Gupta.2021-08-26 The COVID-19 pandemic changed world dynamics, working scenarios, as well as professional and emotional dimensions. The virus has emerged as a significant threat for the continuity of business. Keeping the gravity of the problem in mind, companies must understand the need for change and must now update their strategy to account for pandemics. The next pandemic may be more severe than the current one, meaning that organizations need to devise mechanisms and business models to fight with these situations and maintain business continuity. They should not only look forward to saving plants, machinery and infrastructure, but also concentrate on employee welfare, customer engagement and satisfaction during this crisis time. The book will not only present the evidence of various effective solutions to run a business in the time of a pandemic, but also put forward the new models and practices of business being followed by people at the time of crisis. It aims to create a bridge between existing business models and proposed business solutions, focusing on existing theories and most importantly case studies from recent happenings. This rich collection of chapters will provide insights regarding the business challenges, opportunities and practices during pandemic situations like COVID-19, making it particularly valuable to researchers, academics and students in the fields of strategic management, leadership and disaster management.

Resilience and seizing opportunities Food and Agriculture Organization of the United Nations,INFOFISH.2022-08-24 The study, Resilience and seizing opportunities - Small-scale fisheries and aquaculture businesses that thrived during the COVID-19 pandemic in South and Southeast Asia, attempts to evaluate and compare the pre- and post-pandemic situation and scenario of the concerned groups of the fisheries and aquaculture industry in eight countries. It reveals how these groups survived by adopting innovations in various country contexts and social settings and how the production, supply and market continued operation. The study shows how responsive the government policies and interventions were in supporting the concerned groups. It also shows the preventive measures taken to contain the mass spread of the COVID-19 pandemic and the manner in which the community livelihoods were impacted by these measures. The case studies included provide evidence of the resilience of the small-scale fishers, aquaculture operators and fisheries-based business operators and illustrate how opportunities may be seized by them and others affected by similar pandemics and other natural disasters and events. The study sheds light on areas where more focus should be given so that all parties may be better prepared for future crises, have equitable and inclusive support policies, have transparency in policy responses as well as take into account gender equality. The recommendations of the study can be applied at national, regional and international level while adaptation policies, investment and action plans may be taken for the sustainability and resilience of small-scale fisheries and aquaculture businesses in the future.

Pandemic Risk, Response, and Resilience Indrajit Pal, Rajib Shaw. 2022-05-20 *Pandemic Risk, Response, and Resilience: COVID-19 Responses in Cities Around the World* examines the pandemic's global impacts on public health, economies, society and labor. The book shows how COVID-19 intensified natural and anthropogenic hazards and destroyed years of communities, governments and the work of development organizations and their investments. It focuses on how disaster resilience is central to achieving the 2030 Sustainable Development Goals in a post-COVID-19 era. Sections cover current governance practices, with special attention given to Asia's more successful responses. It shows how the various sectors across that society were most impacted by COVID-19, including tourism and food systems. This book is an essential reference for researchers and practitioners who need to understand response, preparedness and future pathways for

pandemic resilience. Showcases risk governance at local, national and regional scales Captures multidisciplinary and multi-sectoral insights through numerous case studies Uniquely addresses, in a comprehensive and structure manner, risk governance methodologies

Caste, COVID-19, and Inequalities of Care Sanghmitra S. Acharya, Stephen Christopher. 2022-03-01 This book explores how social discrimination in South Asia contributes to health disparities and impedes well-being. Specifically, it addresses how marginalization shapes health outcomes, both under normal circumstances and specifically during the COVID-19 pandemic. Coming from diverse backgrounds and representing different academic disciplines, the authors have contributed a range of chapters drawing from quantitative and ethnographic material across South Asia. Chapters address reservation politics, tribal lifeways, Dalit exclusions from governmental institutions, Muslim ghettoization, gendered domestic violence, social determinants of health among migrant workers, and the pandemic fallout across South Asian society, among other subjects. Scholars draw on decades of experience and firsthand ethnographic fieldwork among affected communities. The chapters provide an innovative analysis, often in real time, of the human toll of casteism, classism, patriarchy, and religious intolerance—many set against the spectre of COVID-19. Many authors not only present social critiques but also offer specific policy recommendations. The book is of great interest to social scientists, public health practitioners, and policy advocates interested in addressing systemic inequalities and ensuring that future pandemics are not disproportionately felt by the most vulnerable.
