

The Modern Law Of Restitution Practical Approach

Justin Gleeson, Robert Dick

The Modern Law of Restitution Gerard McMeel, 2000 In a sequence of landmark decisions in the 1990s, from *Lipkin Gorman v Karpnale* to *Klienwort Benson v Lincoln City Council*, the House of Lords and courts throughout the common law world have recognised and developed a coherent law of restitution based upon the principle of reversing unjust enrichment. This intellectual revolution supersedes obsolete learning on quasi-contract and constructive trusts. Whenever money goes astray, or an apparently consensual transaction goes awry, lawyers need to be familiar with the principles and detailed rules of this new subject. This work addresses the relationship between the unjust enrichment principle and the traditional rules on transactions and insists upon the primacy of contract and the subsidiarity of restitution to established categories of law. The book guides both the student and the busy practitioner through the difficult practical issues and the arcane vocabulary towards a clearer understanding of the restitutionary enquiry.

Restitution and Unjust Enrichment Andrew Kull, Ward Farnsworth, 2018-10-15 Restitution is a body of law that has immense practical value and wide application to disputes of all sorts. Simply put, it is the set of rules that govern recovery of gains that a party should not keep—or “unjust enrichment,” as it is formally called; and unjust enrichment occurs every day in both private and commercial transactions. Restitution has the dual distinction of being one of the most useful but overlooked bodies of law, due to its lack of study by several generations of modern lawyers. Without a single casebook in print on the subject, it has been nearly impossible to teach restitution law in the past. *Restitution and Unjust Enrichment: Cases and Notes* fills that void and presents the substance, remedies and history of restitution in a practical and interesting manner. Professors and students will benefit from: The only casebook available for teaching this important and interesting subject, and the first new one in 50 years. A modern reworking of the topic that adopts the framework of *Publication of Restatement Third, Restitution and Unjust Enrichment* (2011) (“R3RUE”) for teaching purposes. A complete discussion of Restitution, which is part of the required curriculum for students who receive legal training in other parts of the common-law world. Authorship by leading scholars in the field. Andrew Kull was the sole Reporter for R3RUE, published in two hardcover volumes. Ward Farnsworth is the author of a convenient treatise on Restitution, published by the University of Chicago Press in 2014. He is also co-author of the Wolters Kluwer casebook *Torts: Cases and Questions*, currently in its second edition.

The Modern Law of Unjust Enrichment and Restitution Gerard McMeel, 2003

The Principles of the Law of Restitution Graham Virgo, 1999 This new textbook outlines the general principles of the rapidly developing subject of the Law of Restitution. Restitution is concerned with the reversing of unjust enrichment and was recently recognized as a discrete body of law by the House of Lords although restitutionary principles have in fact been evolving for over 200 years. Rather than taking the traditional approach which assumes that restitutionary remedies will be awarded against a defendant only where it can be shown that the defendant has been unjustly enriched at the expense of the plaintiff. The book asserts that the law of restitution is simply concerned with the question of when restitutionary remedies may be awarded, that is remedies which are assessed by reference to a benefit obtained by the defendant. But in determining whether restitutionary remedies are available it is necessary to identify the causes of the action which triggers them. There are three such causes of action, namely the reversal of the defendant's unjust enrichment, the commission of a wrong by the defendant, and the vindication of the defendant's property rights. The state of the law is examined through analyses of the statutory provisions and key cases demonstrating the way the law is used to resolve a wide variety of legal problems. The very different views of academics as to the nature and ambit of the subject are also identified. This book will be invaluable to students on restitution courses at every level.

Unjust Enrichment Peter Birks, 2005-01-13 This new edition of Unjust Enrichment by the editor of the Clarendon Law Series, is a fully updated, clear and concise account of the law of unjust enrichment. It attempts to move away from the use of obscure terminology inherited from the past. This text is the first book to insist on the switch from restitution to unjust enrichment, from response to event. It organises modern law around five simple questions: Was the defendant enriched? If so, was it at the claimant's expense? If so, was it unjust? The fourth question is then what kind of right the claimant has, and the fifth is whether the defendant has any defences. This second edition was revised and updated by Peter Birks before his

death from cancer on 6 July 2004 at the age of 62. It represents the final thinking of the world's leading authority on the subject.

The Law and Ethics of Restitution Hanokh Dagan, 2004-08-12 This 2004 book provides a comprehensive account of the American law of restitution.

The Law of Restitution Andrew S. Burrows, 2002 Restitution is increasingly covered at undergraduate level in courses on contract, tort, common law and obligations. This book provides comprehensive coverage of the subject, including detailed examination of such areas as subrogation, limitation of actions and conflict of laws.

Model Rules of Professional Conduct American Bar Association. House of Delegates, Center for Professional Responsibility (American Bar Association), 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Restitution Joachim Dietrich, 1998 Restitution: A new perspective provides a detailed critique of current and widely accepted theories seeking to unify the law of restitution on the basis of a principle of unjust enrichment. Commencing with a

brief history of restitution, the book proceeds to illustrate the diverse legal problems addressed by the law of restitution. The legal doctrines now collected under this heading are demonstrated to have fulfilled a gap-filling role in our law, much like the diverse doctrines of equity have done. The book questions the underlying basis for unjust enrichment theories and demonstrates their inadequacy as descriptions and explanations of restitution. The book then sets out alternative methods of organising and rationalising the topics of restitution. The approach adopted rejects an explanation of liability in restitution on the basis of a defendant's unjust enrichment and thus challenges much of the current academic and judicial writing in the field. Instead, the approach adopted is to emphasise the relevance of a defendant's conduct in determining the nature and extent of any liability imposed.

The Law of Restitution Andrew S. Burrows, 2011 This highly-praised textbook provides detailed and incisive coverage of all aspects of restitution. The author's expert analysis and clarity of style will be invaluable to both students and practitioners with an interest in this area of law.

Unjust Enrichment Kit Barker, Ross Grantham, 2008 The objective of this book is to enable both practitioners and students to gain a full understanding of the law of restitution and its place in the wider law of civil obligations. To this end, the book contains extracts from important cases as well as extracts from the writings of leading scholars. Explanatory text, notes and questions accompany the extracts which provide a stimulating and insightful guide that will leave readers with a thorough doctrinal and practical understanding of the law of restitution. This work is exceptional in two ways. The first, unlike many similar books, this work offers the reader a coherent theoretical structure within which to study and understand the materials. The second is the extensive commentary that accompanies the materials. The analysis included in this work is deep and thorough and includes a range of questions that will challenge the reader. The book is both a textbook and a collection of primary materials.

Compensation and Restitution in Investor-State Arbitration Borzu Sabahi, 2011-06-30 This book examines the history, principles, and practice of awarding compensation and restitution in investor-State arbitration disputes, which are initiated under investment treaties. The principles discussed may be applied to all international law cases where damage to property is an issue. The book starts by tracing the roots of the applicable international legal principles to Roman law, and from there follows their evolution through the European law of extra-contractual liability and eventually through the Chorzów Factory case to principles of compensation and restitution in the modern law of international investment. The greater part of the book is then dedicated to examination of the modern application of these principles, focusing on the jurisprudence of international tribunals under various arbitral rules such as ICSID and UNCITRAL Rules. Monetary compensation as the prevalent form of remedy sought and awarded in investor-State disputes is discussed in more detail, including topics such as the amount of compensation for damage resulting from breach of investment treaties or for lawful expropriation of foreign

investor's property, a brief overview of valuation methods, supplementary compensation for moral damages, interest, costs, and currency fluctuations as well as various principles that may limit the amount of recoverable compensation, such as causation. A full chapter is dedicated to the discussion of the theory and practice of awarding restitution in investor-State disputes. The book also covers the general principle of reparation in international law as applied in investor-State arbitrations. The topics discussed cover all the theoretical as well as practical issues which may be raised in awarding compensation and restitution in investment treaty disputes between States and foreign investors.

Restitution in Private International Law George Panagopoulos, 2000-11-10 Panagopoulos, a barrister practicing in London, begins with a summary of the English domestic law of restitution and reviews the classification of restitutionary claims. He then examines the differences among a variety of common law approaches to restitutionary issues, focusing on the US and UK. A final section analyzes jurisdiction in private international law, both under the Brussels Convention and the traditional common law rules of England. The legalistic language used in the book emphasizes that it was designed primarily for law professionals. Distributed by ISBS. c. Book News Inc.
