Mary Bailey, Peter Burgess

The Reef Aquarium J. Charles Delbeek, Julian Sprung, 1994

The Reef Aquarium J. Charles Delbeek, Julian Sprung, 2005 Reefkeeping science involves the interplay of biology, chemistry, and physics. However, a reef aquarium is not simply a product of scientific knowledge. The application of engineering and its product technology, makes it possible to duplicate the specific biological, chemical, and physical requirements of a coral reef in a relatively small volume of water. This third volume in The Reef Aquarium series, provides the most thorough description of the science behind the creation of a captive reef, and critically reviews and explains the different philosophical approaches to reef aquarium design. It also describes and illustrates the existing as well as emerging technology for building reef aquariums, to help guide the selection of equipment, its proper use, and installation.

For the first time, master aquarist Eric Borneman offers an authoritative, comprehensive, and fully illustrated guide to appropriate aquarium species, including a diversity of soft corals, as well as popular and rare large-polyp and small-polyp stony corals. World-class photographs and text reviewed by leading coral biologists and coral keepers guides the reader through the selection and husbandry of hundreds of species.

The second half of the book showcases a gallery of some of the most spectacular coral reef aquariums from around the world, coupled with information sections that provide a snapshot of each system's features and care. A Fascination for Fish David C. Powell, 2003-04-24 This autobiography is a charming and accurate telling by a modest man whose brilliant career has allowed millions to venture into the sea and feel what Dave feels when he's underwater—without getting wet!—John E. McCosker, Director Emeritus, Steinhart Aquarium, San Francisco Dave Powell is one of the giants in the development of the modern public aquarium. His great talents and skill have come from years of working with the technology of public aquariums, and also from a great love of the sea. This book is a wonderful tale of his adventures (and misadventures) as he worked to capture the essence of the ocean and bring it to public view.—Bruce Carlson, Director, Waikiki Aquarium, Honolulu Gobies, jellyfish, coelacanth, white sharks—it's all here. A delightfully written book detailing the experiences of the most innovative aquarist of our time. How to Frag Corals Albert B. Ulrich III, Step-by-step instructions Be confident and successful fragging corals. What does your ideal coral aquarium look like? Do you want a mixed coral reef tank, buzzing with color and energy as fish and invertebrates fill every level with the colors and textures of a coral reef? It is a devastating feeling to buy a new coral and watch it shrivel away and die in your tank. Wild-collected corals travel long distances in some challenging living conditions before they make it to your home aquarium, and many of those specimens are damaged and dying before you get them home. In this book, I will show you how some successful reef aquarium hobbyists are able to fill their tanks with corals that are already proven to grow well in their tanks. These aquarists are also able to trade with other hobbyists to acquire some of the corals that are grow best for them, and many are even able to use these secrets to make a little money on the side. Ok, they aren't really secrets, but what I am talking about is fragging corals. Hi, I'm Albert Ulrich, the author of *The New Saltwater Aquarium Guide* and *107 Tips for the Marine Reef Aquarium*.
