The Last Utopia Samuel Moyn, 2012-03-05 Human rights offer a vision of international justice that today's idealistic millions hold dear. Yet the very concept on which the movement is based became familiar only a few decades ago when it profoundly reshaped our hopes for an improved humanity. In this pioneering book, Samuel Moyn elevates that extraordinary transformation to center stage and asks what it reveals about the ideal's troubled present and uncertain future. For some, human rights stretch back to the dawn of Western civilization, the age of the American and French Revolutions, or the post-World War II moment when the Universal Declaration of Human Rights was framed. Revisiting these episodes in a dramatic tour of humanity's moral history, *The Last Utopia* shows that it was in the decade after 1968 that human rights began to make sense to broad communities of people as the proper cause of justice. Across eastern and western Europe, as well as throughout the United States and Latin America, human rights crystallized in a few short years as social activism and political rhetoric moved it from the hallways of the United Nations to the global forefront. It was on the ruins of earlier political utopias, Moyn argues, that human rights achieved contemporary prominence. The morality of individual rights substituted for the soiled political dreams of revolutionary communism and nationalism as international law became an alternative to popular struggle and bloody violence. But as the ideal of human rights enters into rival political agendas, it requires more vigilance and scrutiny than when it became the watchword of our hopes.

Violence Against Women, 2014 Violence against women undermines women's core fundamental rights such as dignity, access to justice and gender equality. For example, one in three women has experienced physical and/or sexual violence since the age of 15; one in five women has experienced stalking; every second woman has been confronted with one or more forms of sexual harassment. What emerges is a picture of extensive abuse that affects many women's lives but is systematically underreported to the authorities. The scale of violence against women is therefore not reflected by official data. This FRA survey is the first of its kind on violence against women across the 28 Member States of the European Union (EU). It is based on interviews with 42,000 women across the EU, who were asked about their experiences of physical, sexual and psychological violence, including incidents of intimate partner violence ('domestic violence'). The survey also included questions on stalking, sexual harassment, and the role played by new technologies in women's experiences of abuse. In addition, it asked about their experiences of violence in childhood. Based on the detailed findings, FRA suggests courses of

action in different areas that are touched by violence against women and go beyond the narrow confines of criminal law, ranging from employment and health to the medium of new technologies.--Editor.

Divine Names on the Spot II F Porzia, C Bonnet, 2023-09-14 English summary: Names, images, and narratives are intimately related and frequently polysemous. As pieces of information on the gods, they convey fragments of knowledge and attempts to interpret the multifaceted complexity of the divine world. In what Robert Parker describes as an archipelago, images and narratives are like compasses used to approach the mapping of the gods. The different contributions collected in this volume, dealing with the Greek and the Semitic worlds (the two main areas of the Mapping Ancient Polytheisms project), explore connections but also discrepancies between these different semantics, in order to highlight specificities and commonalities in the onomastic and iconographic languages. French description: Les noms, les images et les recits sont intimement lies et volontiers polysemiques. En tant qu'elements d'information sur les dieux, ils vehiculent des fragments de connaissance et constituent autant de tentatives d'interpretation de la complexite multiforme du monde divin. Dans ce que Robert Parker decrit comme un archipel, les images et les recits sont comme des boussoles qui facilitent la cartographie des dieux. Les differentes contributions rassemblees dans ce volume, traitant des mondes grec et semitique (les deux principaux domaines abordes dans le projet Mapping Ancient Polytheisms), explorent les connexions mais aussi les divergences existant entre ces differentes semantiques, afin de mettre en evidence les specificites et les points communs entre langage onomastique et langage iconographique.

Collection of Essays by Legal Advisers of States, Legal Advisers of International Organizations and Practitioners in the Field of International Law United Nations. Office of Legal Affairs, 1999 The world has changed radically since 1989, when the General Assembly declared the period from 1990 to 1999 as the United Nations Decade of International Law. During that time, the international community claimed some major achievements as reflected by the adoption of conventions and treaties. This publication presents a collection of essays from legal advisers of States and international organizations, all of whom are among those committed to promoting respect for international law. Their contribution provides a practical perspective on international law, viewed from the standpoint of those involved in its formation, application and administration.

International Protection of Human Rights: Achievements and Challenges Felipe Gómez Isa, Koen de Feyter, 2006-01-01 At the beginning of the nineties, there was an expectation within the human rights community that the next decade would be a period of consolidation for the international human rights regime. This did not happen. In fact, the human rights regime underwent dramatic changes in response to new circumstances. We have tried to highlight both the achievements and the challenges ahead in this Manual, the result of a joint project under the auspices of HumanitarianNet, a Thematic Network on Humanitarian Development Studies led by the University of Deusto (Bilbao, the Basque Country, Spain), and the European Inter-University Centre for Human Rights and Democratisation (EIUC, Venice, Italy).

Liquid Metal Magnetohydrodynamics J.J. Lielpeteris,R.J. Moreau,2012-12-06 Liquid metal MHD is within the scope of two series of international conferences. One is the International Congress on MHD Power Generation, held every four years, which includes technical and economical aspects as well as scientific questions. The other is the Beer-Sheva Seminar on MHD Flows and Turbulence, held every three years in Israel. In addition to these well established meetings, an IUTAM Symposium was previously organized in Cambridge (UK) in 1982 on Metallurgical Applications of MHD by the late Arthur Shercliff. It was focussed on a very specific subject developing rapidly from the middle of the 1970's. The magnetic field was generally AC, including frequencies high enough for the skin-depth to be much smaller than the typical length scale of the liquid pool. And the development of new technologies, or the improvement of existing ones, was the main justification of most of the researches presented and discussed. Only two participants from Eastern countries attended this Symposium. By the middle of the 1980's we felt that on this very same topic ideas had reached much more maturity than in 1982. We also realized that a line of research on MHD flows related to fusion reactors (tokamaks) was developing significantly, with particular emphasis on flows at large interaction parameter.

International Human Rights Law in a Global Context Felipe Gómez Isa,Koen de Feyter,2009-01-01 The international human rights system remains as dynamic as ever. If at the end of the last century there was a sense that the normative and institutional development of the system had been completed and that the emphasis should shift to issues of implementation, nothing of the sort occurred. Even over the last few years significant changes happened, as this book amply demonstrates. We hope that this Manual makes a contribution to the development of International Human Rights Law and is of interest for those working in the field of promotion and protection of human rights. The book is the result of a joint project under the auspices of HumanitarianNet, a Thematic Network led by the University of Deusto, and the European Inter-University Centre for Human Rights and Democratisation (EIUC, Venice).

Treaty Series / Recueil Des Traités United Nations,2007-11-02

Reading Classes Barbara Jensen,2012-05-15 Discussions of class make many Americans uncomfortable. This accessible book makes class visible in everyday life. Solely identifying political and economic inequalities between classes offers an incomplete picture of class dynamics in America, and may not connect with people's lived experiences. In *Reading Classes*, Barbara Jensen explores the anguish caused by class in our society, identifying classism—or anti-working class prejudice—as a central factor in the reproduction of inequality in America. Giving voice to the experiences and inner lives of working-class people, Jensen—a community and counseling psychologist—provides an in-depth, psychologically informed examination of how class in America is created and re-created through culture, with an emphasis on how working- and middle-class cultures differ and conflict. This book is unique in its claim that working-class cultures have positive qualities that serve to keep members within them, and that can haunt those who leave them behind. Through both autobiographical reflections on her

dual citizenship in the working class and middle class and the life stories of students, clients, and relatives, Jensen brings into focus the clash between the realities of working-class life and middle-class expectations for working-class people. Focusing on education, she finds that at every point in their personal development and educational history, working-class children are misunderstood, ignored, or disrespected by middle-class teachers and administrators. Education, while often hailed as a way to cross classes, brings with it its own set of conflicts and internal struggles. These problems can lead to a divided self, resulting in alienation and suffering for the upwardly mobile student. Jensen suggests how to increase awareness of the value of working-class cultures to a truly inclusive American society at personal, professional, and societal levels.

Information Theory and Esthetic Perception Abraham A. Moles, 1968

Acts of Religion Jacques Derrida, 2013-02-01 Acts of Religion, compiled in close association with Jacques Derrida, brings together for the first time a number of Derrida's writings on religion and questions of faith and their relation to philosophy and political culture. The essays discuss religious texts from Jewish, Christian, and Muslim traditions, as well as religious thinkers such as Kant, Levinas, and Gershom Scholem, and comprise pieces spanning Derrida's career. The collection includes two new essays by Derrida that appear here for the first time in any language, as well as a substantial introduction by Gil Anidjar that explores Derrida's return to his own religious origins and his attempts to bring to light hidden religious dimensions of the social, cultural, historical, and political.

From Reliable Sources Martha C. Howell, Walter Prevenier, 2001 A lively introduction to historical methodology, an overview of the techniques historians must master in order to reconstruct the past.

Tropical Forests in a Changing Global Context Morgan de Dapper, 2005

Acadians and Cajuns Ursula Mathis-Moser, Günter Bischof, 2009

In Search of the Sacred Seyyed Hossein Nasr, Ramin Jahanbegloo, 2010-07-14 In this book, a series of interviews offers an accessible, revealing, human and intellectual biography of leading Islamic scholar Seyyed Hossein Nasr. Seyyed Hossein Nasr is one of the preeminent philosophers writing today. Sure to be a key resource for decades to come, *In Search of the Sacred: A Conversation with Seyyed Hossein Nasr on His Life and Thought* illuminates Nasr's experiences and shares his insights on topics from religion and philosophy to science and the arts. Based on a series of interviews, the book combines traditional autobiography with an exploration of the intellectual and spiritual trajectories of the author's thought during key periods of his life. In doing so, it presents a fascinating panorama, not only of the life and ideas of one man, but also of major events ranging from intellectual life in Iran during the Pahlavi period and the Iranian Revolution to some of the major religious and intellectual debates between Islam and modernism. Nasr writes that his whole life has been a quest for the sacred. This work connects that quest with some of the most important issues of the day in encounters between Islam and the West.

Methods and Techniques in Post-secondary Education Donald A. Bligh, David Jaques, David Warren Piper, 1980 UNESCO pub. Monograph and annotated bibliography on higher education teaching methods and evaluation techniques - discusses objectives in higher education, student assessment and selection methods, curriculum development, implications for educational administration and evaluation of courses and teaching, etc., And includes a subject-author index to the bibliography.

ZEMCH: Toward the Delivery of Zero Energy Mass Custom Homes Masa Noguchi, 2016-06-25 In this book, leading international experts explore the emerging concept of the zero energy mass custom home (ZEMCH) - designed to meet the need for social, economic, and environmental sustainability - and provide all of the knowledge required for the delivery of zero energy mass customized housing and community developments in developed and developing countries. The coverage is wide ranging, progressing from explanation of the meaning of sustainable development to discussion of challenges and trends in mass housing, the advantages and disadvantages of prefabricated methods of construction, and the concepts of mass customization, mass personalization, and inclusive design. A chapter on energy use will aid the reader in designing and retrofitting housing to reduce energy demand and/or improve energy end-use efficiency. Passive design strategies and active technologies (especially solar) are thoroughly reviewed. Application of the ZEMCH construction criteria to new buildings and refurbishment of old houses is explained and the methods and value of building performance simulation, analyzed. The concluding chapter presents examples of ZEMCH projects from around the world, with discussion of marketing strategy, design, quality assurance, and delivery challenges. The book will be invaluable as a training/teaching tool for both students and industry partners.
