Supervision in Social Work Liz Beddoe, Jane Maidment, 2017-10-02 Supervision is currently a hot topic in social work. The editors of this volume, both social work educators and researchers, believe that good supervision is fundamental to the development and maintenance of effective practice in social work. Supervision is seen as a key vehicle for continuing development of professional skills, the safeguarding of competent and ethical practice and oversight of the wellbeing of the practitioner. As a consequence the demand for trained and competent supervisors has increased and a perceived gap in availability can create a call for innovation and development in supervision. This book offers a collection of chapters which contribute new insights to the field. Authors from Australia and New Zealand, where supervision inquiry is strong, offer research-informed ideas and critical commentary with a dual focus on supervision of practitioners and students. Topics include external and interprofessional supervision, retention of practitioners, practitioner resilience and innovation in student supervision. This book will be of interest to supervisors of both practitioners and students and highly relevant to social work academics. This book was originally published as a special issue of *Australian Social Work*.

Supervision Essentials for Cognitive-behavioral Therapy Cory Frank Newman, Danielle Alissa Kaplan, 2016 Cognitive-behavioural therapies are the most popular form of mental health services offered today. But with this popularity comes an urgent need for standardized training and education for emerging cognitive-behavioural therapy (CBT) clinicians. This handy guide offers an evidence-based approach to supervision of emerging CBT practitioners. The authors' approach is based on two key concepts: feedback that is geared toward strengths as well as weaknesses, and stimulates problem-solving and growth; and demonstration, by which a supervisor takes part in role-playing exercises and even shows videos of his or her own work with clients, in order to model the experiential knowledge that trainees need to succeed. Using a wealth of case examples, including material from a supervision session with a real trainee (from the DVD Cognitive-Behavioral Therapy Supervision, also available from the American Psychological Association), Newman and Kaplan demonstrate how trainees can learn to think like effective CBT practitioners, from conceptualizing cases and matching interventions to the individual needs of each client, to the comprehensive and subtle understandings of cultural competency and professional ethics.
