30 Plus Trios for Flute John Cacavas. These trios arrangements were scored and compiled basically for recreational playing, yet keeping in mind many of the problems confronting young players. The music is carefully phrased, and unlike many books of this nature, dynamics play an important part. The two categories of compositions are those of a serious nature and folk or traditional songs. Although it is recommended that a trio play this book, it will also be satisfactory for duets. The repeats are optional, but for public performance they should be observed. The melody is always in the first part; for that reason players may alternate parts.

Flute Technique Frederick Bennett Chapman.1958

The Early Flute John Solum.1995 With the growing interest in recent years in the use of period instruments for recordings, live professional performances, and amateur music-making, the old-style transverse flutes are experiencing a remarkable comeback. The Early Flute is the first book in modern times to deal exclusively with the flutes used in the Renaissance, Baroque, and Classical eras. The book details the history of the transverse flute from 1500 until the early nineteenth century. Advice is given on acquiring instruments and on their care and maintenance. Additional chapters guide the reader to sources about relevant technique and style, recommend repertoire, and give general advice to the modern player. The text is enhanced by numerous photographs of important historic flutes.

How to Make Native American Flutes Raymond Wells.2016-07-01 This book will teach you how to make the Native American Flute (5 or 6 hole flute). Using a band-saw and table router. No turning lathe is needed. Power tools are used in this book, making the job much faster. Flute fundamentals: Air is blown into the mouth end of the flute, it travels under the lip, and is channeled to pass over the air split. As the air is being split, half is going over the air split (outside the flute), the other half going inside the flute. This produces a harmonic vibration of the air waves. The holes in the body of the flute allows

the air going inside the flute to escape at the flute holes. The flute players fingers, controls the air escaping at the flute holes. A different sound (note) is heard as the air escapes the body of the flute, at each hole. The sound is different because the wave length is different at each hole. The shorter the wave length the higher the note (pitch). The longer the wave length the lower the note (pitch). Lots of detailed information and photos, and tables.
