*A Cinema of Loneliness* Robert Phillip Kolker,2000 In this 20th anniversary edition, Kolker continues and expands his inquiry into the phenomenon of cinematic representation of culture by updating and revising the chapters on Kubrick, Scorsese, Altman and Spielberg.

*Person and God in a Spanish Valley* William A. Christian, Jr.,2020-06-30 A classic twentieth-century work in the anthropology of Catholicism *Person and God in a Spanish Valley* is a moving portrait of how individuals and communities in a remote, mountainous valley of northern Spain relate to the divine. In the late 1960s, anthropologist and historian William A. Christian, Jr., conducted groundbreaking fieldwork in the Nansa Valley, one of the most devout regions of Spain. With sensitivity and uncommon insight, Christian describes the complex system of shrines, devotions, and pilgrimages that existed in the region for centuries, and recounts the disruption of the valley's traditional way of life as young priests from urban centers arrived carrying a more modern, Vatican II version of Catholicism. *Person and God in a Spanish Valley* places Catholic faith and practice within a broader history of agrarian politics and reform in northern Spain, and stands as a landmark work of modern anthropology.

**Efraim's Book** Alfred Andersch,1994 *Efraim's Book* is the sophisticated, offbeat novel about the peculiar society of post-World-II Berlin. Its hero George Efraim is a Jewish reporter who has fought for the British on the Italian front and lost both parents to Auschwitz. He returns home to Berlin in 1962 for the first time since the war to investigate the wartime disappearance of his editor's daughter, only to begin writing a novel, which helps him to embark on a certain arrangement of signs with the help of which I hope to chart my position. Like the great German novels of Günter Grass and Heinrich Böll, Alfred Andersch's *Efraim's Book* grapples with the legacy of World War II and the Holocaust in all its horror and sad humanity. A troubling yet often humorous book, it offers a poignant account of the traumatized German state.

**Practical Friendship** Christian Langkamp,2021-09-24 *Practical Friendship* brings insights together from ancient and

contemporary philosophy, theology, psychology and sociology to identify what good friendship means and how we can live it. Based on the analysis it proposes we adopt a role based view of friendship, that also can be used to analyse loneliness. Based on research and anecdotal evidence the book compiles a range of recommendations on how to maintain our friendships in good repair and how to foster friendship in old age. The book addresses an audience of professionals working to fight loneliness in our society as well as lay people wanting to reflect on how to improve the friendships in their lives. Additional sections are addressed at researchers in sociology and psychology who want to expand their understanding of friendship in order to tune their research to generate insight for loneliness-support.

**Brave New Brain** Nancy C. Andreasen,2004 Here, leading neuroscientist Nancy Andreasen offers a state-of-the-art look at what we know about the human brain and the human genome--and shows how these two vast branches of knowledge are coming together in a boldly ambitious effort to conquer mental illness. Andreasen gives us an engaging and readable description of how it all works--from billions of neurons, to the tiny thalamus, to the moral monitor in our prefrontal cortex. She shows the progress made in mapping the human genome, whose 30,000 to 40,000 genes are almost all active in the brain. We read gripping stories of the people who develop mental illness, the friends and relatives who share their suffering, the physicians who treat them, and the scientists who study them so that better treatments can be found. Four major disorders are covered--schizophrenia, manic depression, anxiety disorders, and dementia--revealing what causes them and how they affect the mind and brain. Finally, the book shows how the powerful tools of genetics and neuroscience will be combined during the next decades to build healthier brains and minds. By revealing how combining genome mapping with brain mapping can unlock the mysteries of mental illness, Andreasen offers a remarkably fresh perspective on these devastating diseases.

Chekhov and His Russia Walter Horace Bruford,1998 First Published in 1998. Routledge is an imprint of Taylor & Francis, an informa company.

**Idleness** Brian O'Connor,2020-04-07 For millennia, idleness and laziness have been regarded as vices. We're all expected to work to survive and get ahead, and devoting energy to anything but labor and self-improvement can seem like a luxury or a moral failure. Far from questioning this conventional wisdom, modern philosophers have worked hard to develop new reasons to denigrate idleness. In *Idleness*, the first book to challenge modern philosophy's portrayal of inactivity, Brian O'Connor argues that the case against an indifference to work and effort is flawed--and that idle aimlessness may instead allow for the highest form of freedom. *Idleness* explores how some of the most influential modern philosophers drew a direct connection between making the most of our humanity and avoiding laziness. *Idleness* was dismissed as contrary to the need people have to become autonomous and make whole, integrated beings of themselves (Kant); to be useful (Kant and Hegel); to accept communal norms (Hegel); to contribute to the social good by working (Marx); and to avoid boredom (Schopenhauer

and de Beauvoir). O'Connor throws doubt on all these arguments, presenting a sympathetic vision of the inactive and unserious that draws on more productive ideas about idleness, from ancient Greece through Robert Burton's *Anatomy of Melancholy*, Schiller and Marcuse's thoughts about the importance of play, and recent critiques of the cult of work. A thought-provoking reconsideration of productivity for the twenty-first century, *Idleness* shows that, from now on, no theory of what it means to have a free mind can exclude idleness from the conversation.--Provided by publisher

The Regulation of Boxing Robert G. Rodriguez,2009-03-23 This first nationwide study of boxing regulations in the United States offers an historical overview of the subject, from the earliest attempts at regulating the sport to present-day legislation that may create a national boxing commission. It examines the disparity of regulations among states, as well as the reasons for some of these differences. The work features interviews with boxing officials, analysts and boxers, and includes the results of a national survey of state athletic commission personnel. In-depth case studies of boxing regulations in Nevada and Kansas provide a close look at different states' methods, and Argentina's centralized system of regulation is presented as a comparison to the U.S. approach.

41 Stories O. Henry, 2007-07-03 Including his most famous works, such as “The Gift of the Magi” and “The Furnished Room,” this collection of forty-one O. Henry short stories demonstrates his extraordinary technical genius. “There are stories in everything. I’ve got some of my best yarns from park benches, lampposts, and newspaper stands.”—O. Henry Readers the world over recognize O. Henry as the best short story writer of the early twentieth century—even today a masterful surprise at the end of a story is described as “an O. Henry twist,” and a prominent short fiction award bears his name. Widely known as a master of irony, O. Henry also displayed in his stories dazzling wordplay and a wry combination of pathos and humor. Cunningly arranged according to geographic location, these tales display the wide range of O. Henry’s world, from the streets of his beloved New York City to the heat of Honduras and other exotic locales. With his wonderful plot turns, unexpected climaxes, and deep insights into human nature, O. Henry’s works will live on as prime examples of the well-told tale. Includes an Introduction by Burton Raffel and an Afterword by Laura Furman

**Young Chekhov** Anton Chekhov, 2015-09-29 Young Chekhov contains a trilogy of plays by the Russian writer Anton Chekhov, written as he emerged as the greatest playwright of the late nineteenth century. The three works, Platanov, Ivanov and The Seagull, in contemporary adaptations by David Hare, will be staged at the Chichester Festival Theatre in the summer of 2015.
