Successful Diversity Management Initiatives Patricia Arredondo. 1996-05-21 Just when you think you've read all about managing diversity and you've concluded that there is nothing new to say, Patricia Arredondo's book offers a fresh, insightful, and helpful blueprint for beginning and moving forward with a diversity initiative. Successful Diversity Management Initiatives not only outlines specific steps for a managing diversity process but also discusses the rationale for procedures, identifies potential roadblocks, and explores how barriers could be managed. Patricia Arredondo gives specific examples based on her research and her experiences within organizations so that the reader obtains an integrative and systematic perspective about the issues involved. Reading this book is essential for all management educators, organizational change teams, and consultants in the field interested in getting up-to-speed about the issues. Also, managers and executives who are engaged in gaining competitive advantage through the talents and abilities of the changing workforce and knowing about the needs of their diverse customers, will gain insight into the very real factors affecting their organizations. --Anna Duran, Ph.D, Principal, Anna Duran & Associates & Adjunct Professor, Graduate School of Business, Columbia University In this book Dr. Patricia Arredondo really captures the kind of experiences we have had as to what works and what doesn't in shaping a diversity initiative. Her concrete suggestions provide a very useful road map leading to a successful diversity initiative. -- William Watkins Jr., Executive Vice President, and Director of Economic Development, Narragansett Electric Thousands of organizations are beginning to address the issue of workforce diversity management. This important new book helps answer questions typically raised by these organizations as they face diversity-related change. Why should we do this? How will we know we are being successful? What kind of change can we expect? Successful Diversity Management Initiatives presents specific phases and steps to help plan, direct, and manage strategic organizational development. Serving as a developmental model for change, this model emphasizes on-going evaluation and clarification during each phase and proposes a prototype for measuring both qualitative and quantitative results. Vignettes based on organizational experiences are used to demonstrate how particular steps in the model occur and how they hold generic value. Intended for practical application, the book is supported by case examples, summaries at the end of each chapter that include a checklist for organizational self-assessment, models, and a glossary. Successful Diversity Management Initiatives is appropriate for professionals who have responsibility for designing and implementing programs as well as graduate students in organizational development,

industrial psychology, and human resources.

The Broadband Problem Charles H. Ferguson. 2004 While the Internet revolution has vastly improved communications among businesses and individuals in the US, pressure has been building for faster and less expensive broadband data services. However, broadband services and prices have not kept pace either with demand or with progress in information technology. This title analyses the markets and policy issues underlying the broadband dilemma. Ferguson asserts that the Telecommunications Act of 1996 and federal policy have failed to provide sufficient levels of new entry, competition and innovation in the local telecommunications market, which remains dominated by monopoly telephone companies. New entrants and Internet-based firms remain disadvantaged relative to the monopoly incumbent local exchange carriers (ILEC). The combined result of these market and policy failures is inadequate technological progress, innovation and productivity growth in advanced Internet services and in telecommunications services in general. Ferguson believes federal policy must be adjusted to ensure the robust infrastructure necessary for advanced Internet services, electronic commerce, open-systems HDTV, videoconferencing and improved voice telephony.

Real Research Loreen Therese Wolfer. 2007 Covering both quantitative and qualitative research, this new text teaches the skills for conducting research and how to read and evaluate published research. Real Research explains the systematic steps used by social scientists to examine the social world, and teaches the skills necessary to read, understand and realistically evaluate published research carried out by others. The author follows the stages of the research process and presents a model of ideal research; but she also emphasizes that research does not always involve an orderly set of steps, and is often affected by limitations such as time and money.--Publisher's website.

Albania: a Country Study Raymond Zickel. 2013-06-10 This volume is one in a continuing series of books prepared by the Federal Research Division of the Library of Congress under the Country Studies/Area Handbook Program sponsored by the Department of the Army.

National Policy-Making Pertti Alasuutari, Ali Qadir. 2013-12-04 Notions of social change are often divided into local versus international. But what actually happens at the national level—where policies are ultimately made and implemented—when policy-making is interdependent worldwide? How do policy-makers take into account the prior choices of other countries? Far more research is needed on the process of interdependent decision-making in the world polity. National Policy-Making: domestication of global trends offers a unique set of hybrid cases that straddle these disciplinary and conceptual divides. The

volume brings together well-researched case studies of policy-making from across the world that speak to practical issues but also challenge current theories of global influence in local policies. Distancing itself from approaches that conceive narrowly of policy transfer as a one-way street from powerful nations to weaker ones, this book argues instead for an understanding of national decision-making processes that emphasize cross-national comparisons and domestic field battles around the introduction of worldwide models. The case studies in this collection show how national policies appear to be synchronized globally yet are developed with distinct national flavors. Presenting new theoretical ideas and empirical cases, this book is aimed globally at scholars of political science, international relations, comparative public policy, and sociology.

International Management: Culture, Strategy and Behavior W/ OLC Card MP Richard M. Hodgetts, Fred Luthans, Jonathan Doh, Jonathan P. Doh. 2005-02-16 As a discipline of academy inquiry, International Management applies management concepts and techniques to their contexts in firms working in multinational, multicultural environments. Hodgetts' Luthans: International Management was the first mainstream International Management text in the market. Its 6th edition continues to set the standard for International Management texts with its research-based content and its balance between culture, strategy, and behavior. International Management stresses the balanced approach and the synergy/connection between the text's four parts: Environment (3 chapters): Culture (4 chapters), Strategy and Functions (4 chapters) and Organizational Behavior / Human Resource Management (4 chapters).

Telecommunications Law and Policy Stuart Minor Benjamin, Douglas Lichtman, Howard A. Shelanski. 2006 This book engages in advanced analysis of the key constitutional, administrative, and economic issues that arise in the various telecommunications settings. The new edition will continue the tradition of the first by offering a comprehensive yet lively and accessible introduction to the various regulatory regimes applicable to broadcast radio, broadcast television, cable television, all forms of telephony, and the Internet. The second edition will contain discussions and journal excerpts in addition to excerpts from important legal materials ? the cases and FCC documents that define regulatory policy today ? designed to help readers understand the technologies, economic principles, and business strategies that undergird the modern telecommunications market. The authors have streamlined much of the older material, resulting in a more compact casebook that will focus the bulk of its materials on current controversies and modern regulatory strategies. Summaries and previews at the start of each set of readings still help students know what to read for and questions at the end of each set still encourage students to think critically about those materials.

The Psychology and Management of Workplace Diversity Margaret S. Stockdale, Faye J. Crosby. 2004 Immigration and globalization, combined with new civil rights laws and changes in public opinion, have resulted in vastly increased workplace diversity in the last half-century. This work represents a timely addition to current offerings on this growing sub-discipline.

Stakeholders of the Organizational Mind Ian I. Mitroff. 1983-10-03 Presents a new way of analyzing and treating problems of organizational behavior and decision making.

The Telecommunications Act of 1996: The "Costs" of Managed Competition Dale E. Lehman, Dennis Weisman. 2012-12-06 The Telecommunications Act of 1996 envisioned a competitive free-for-all in the U.S. telecommunications industry with removal of barriers to entry in local telecommunications markets and the lifting of the artificial restrictions that kept the Regional Bell Operating Companies (RBOCs) out of the interLATA long-distance market. After close to 5 years, only one RBOC has been granted permission (controversially) to enter the interLATA market, and local competition has yet to provide most consumers with meaningful choices. In addition, the wave of mergers across the industry has raised the specter of putting the former Bell System back together again. Policymakers now openly question whether the Act can deliver what it promised. Three principal themes are developed in this book. First, there has been a coordination failure between Congress and the FCC in translating the principles embodied in the Act into practice. The authors provide evidence for this by analyzing stock market reactions to legislative and regulatory actions. This coordination failure was largely predictable, given the ambiguity in the Act, as well as conflicting jurisdictions between the FCC and the states. Second, the Act calls for wholesale prices to be 'based on cost.' Regulators adopted a costing standard (TELRIC) that provides a means to subsidize

competitive entry in local telephone service markets. The ready adoption of the TELRIC standard by regulators is shown to be tied to the third theme: price cap regulation provides regulators with 'insurance' against the adverse effects of competition in local telephone markets. Statistical analysis reveals that regulators in price cap states set uniformly lower unbundled network element prices (lower barriers to entry) in comparison with regulators in rate-of-return and earnings sharing states. The result is a triumph of regulatory processes over market processes - the antithesis of the purpose of the Act.
