The Health Of Women Jill Gay.2018-05-04 This book provides a state-of-the-art, comprehensive review of the many factors that affect women's health, ranging from low socioeconomic status and the impact of the debt crisis to more direct medical determinants, such as poor nutrition, hemorrhage, eclampsia, and infection. At stake are the unnecessary and preventable deaths of women and girls around the globe. The contributors assess the reduced quality of life for women and the often unacknowledged contributions of women and girls as the backbone of production in both developing and developed countries. Synthesizing perspectives of policymakers and practitioners, researchers and scholars, *The Health of Women* urges major new initiatives to understand and improve women's health, taking into account biological elements such as the life cycle of women as well as cultural constraints and socioeconomic realities.

Labour Rights as Human Rights Philip Alston.2005 Are efforts to protect workers' rights compatible with the forces of globalization? How can minimum standards designed to protect labour rights be implemented in a world in which national labour law is more and more at the mercy of international forces beyond its control? And does it make any difference if we see rights such as the right to freedom of association, to non-discrimination in the workplace, to freedom from child labour, and to safe and healthy working conditions in terms of international human rights law? Or are they more appropriately seen as 'principles' to be promoted as and where appropriate? The contributors to this volume argue that international agreements and institutions are of central importance if labour rights are to be protected in a globalized economy. But the report cards they give to the World Trade Organization, the European Union, NAFTA, and the Free Trade Agreement of the Americas are generally very critical. While there is a strong rhetorical commitment to labour rights, at least on the part of the US and the EU, the substance of what has been achieved to date is hardly impressive. The role of the International Labour Organization is central and the authors explore some of the options that are open to governments, civil society, and the labour movement in the years ahead.

Why Men Rebel Ted Robert Gurr.2015-11-17 Why Men Rebel was first published in 1970 after a decade of political violence across the world. Forty years later, serious conflicts continue in Africa, Asia and the Middle East. Ted Robert Gurr reintroduces us to his landmark work, putting it in context with the research it influenced as well as world events. Why Men Rebel remains highly relevant to today's violent and unstable world with its holistic, people-based understanding of the causes of political protest and rebellion. With its close eye on the politics of group identity, this book provides new insight into contemporary security challenges.

Collection of Essays by Legal Advisers of States, Legal Advisers of International Organizations and Practitioners in the Field of International Law United Nations. Office of Legal Affairs.1999 The world has changed radically since 1989, when the General Assembly declared the period from 1990 to 1999 as the United Nations Decade of International Law. During that time, the international community claimed some major achievements as reflected by the adoption of conventions and treaties. This publication presents a collection of essays from legal advisers of States and international organizations, all of whom are among those committed to promoting respect for international law. Their contribution provides a practical perspective on international law, viewed from the standpoint of those involved in its formation, application and administration.

Transnational Social Policies International Development Research Centre (Canada).1999 Relationships between social

policy and human development are the subject of much research and theorizing. The literature in this area, however, examines these issues strictly within national contexts. What influence will international agendas such as NAFTA, the World Summit for Social Development, and Habitat II have? *Transnational Social Policies* specifically addresses the worldwide trend for national policies on human and social development to be increasingly influenced by agendas that are international, or transnational, in nature. In doing so, the book examines the underlying international developmental, ethical, economic, and political issues shaping national policies in health, education, and employment in the developing world. This book's focus on the transnational character of the social policy debate makes it a truly unique and original contribution to the literature. It will appeal to the academic community, worldwide, in international development, public policy and administration, and social work; policymakers, researchers, and practitioners in the field of public (social) policy; and the international community of individuals and organizations working in international social development.

Chemical Thermodynamics of Neptunium and Plutonium Robert J. Lemire.2001-08-26 Unlike earlier books in this series, this review describes the selection of chemical thermodynamic data for species of two elements, neptunium and plutonium. Although this came about more by circumstance than design, it has allowed for a more consistent approach to chemical interpretation than might have occurred in two separate treatments. It has also drawn attention to cases where the available data do not show expected parallels, and where further work may be useful to confirm or refute apparent differences in the behaviour of neptunium and plutonium.

Salvator Rosa in French Literature James Patty.2005-01-31 Salvator Rosa (1615–1673) was a colorful and controversial Italian painter, talented musician, a notable comic actor, a prolific correspondent, and a successful satirist and poet. His paintings, especially his rugged landscapes and their evocation of the sublime, appealed to Romantic writers, and his work was highly influential on several generations of European writers. James S. Patty analyzes Rosa's tremendous influence on French writers, chiefly those of the nineteenth century, such as Stendhal, Honoré de Balzac, Victor Hugo, George Sand, and Théophile Gautier. Arranged in chronological order, with numerous quotations from French fiction, poetry, drama, art criticism, art history, literary history, and reference works, *Salvator Rosa in French Literature* forms a narrative account of the reception of Rosa's life and work in the world of French letters. James S. Patty, professor emeritus of French at Vanderbilt University, is the author of *Dürer in French Letters*. He lives in Nashville, Tennessee.

Braintrust Patricia S. Churchland.2018-05-22 What is morality? Where does it come from? And why do most of us heed its call most of the time? In *Braintrust*, neurophilosophy pioneer Patricia Churchland argues that morality originates in the biology of the brain. She describes the neurobiological platform of bonding that, modified by evolutionary pressures and cultural values, has led to human styles of moral behavior. The result is a provocative genealogy of morals that asks us to

reevaluate the priority given to religion, absolute rules, and pure reason in accounting for the basis of morality. Moral values, Churchland argues, are rooted in a behavior common to all mammals--the caring for offspring. The evolved structure, processes, and chemistry of the brain incline humans to strive not only for self-preservation but for the well-being of allied selves--first offspring, then mates, kin, and so on, in wider and wider caring circles. Separation and exclusion cause pain, and the company of loved ones causes pleasure; responding to feelings of social pain and pleasure, brains adjust their circuitry to local customs. In this way, caring is apportioned, conscience molded, and moral intuitions instilled. A key part of the story is oxytocin, an ancient body-and-brain molecule that, by decreasing the stress response, allows humans to develop the trust in one another necessary for the development of close-knit ties, social institutions, and morality. A major new account of what really makes us moral, *Braintrust* challenges us to reconsider the origins of some of our most cherished values.

Terra 2008 Leslie Rainer, Angelyn Bass Rivera, David Gandreau. 2011-06-14 Earthen architecture constitutes one of the most diverse forms of cultural heritage and one of the most challenging to preserve. It dates from all periods and is found on all continents but is particularly prevalent in Africa, where it has been a building tradition for centuries. Sites range from ancestral cities in Mali to the palaces of Abomey in Benin, from monuments and mosques in Iran and Buddhist temples on the Silk Road to Spanish missions in California. This volume's sixty-four papers address such themes as earthen architecture in Mali, the conservation of living sites, local knowledge systems and intangible aspects, seismic and other natural forces, the conservation and management of archaeological sites, research advances, and training.

The Sources of Innovation Eric von Hippel. 1988 It has long been assumed that new product innovations are typically developed by product manufacturers, an assumption that has inevitably had a major impact on innovation-related research

and activities ranging from how firms organize their research and development to how governments measure innovation. In this synthesis of his seminal research, von Hippel challenges that basic assumption and demonstrates that innovation occurs in different places in different industries. Presenting a series of studies showing that end-users, material suppliers, and others are the typical sources of innovation in some fields, von Hippel explores why this variation in the functional sources of innovation occurs and how it might be predicted. He also proposes and tests some implications of replacing a manufacturer-as-innovator assumption with a view of the innovation process as predictably distributed across users, manufacturers, and suppliers. Innovation, he argues, will take place where there is greatest economic benefit to the innovator.

The Discipline of Market Leaders Michael Treacy, Fred Wiersema. 2007-03-20 Why is it that Casio can sell a calculator more cheaply than Kellogg's can sell a box of corn flakes? Why can FedEx "absolutely, positively" deliver your package overnight but airlines have trouble keeping track of your bags? What does your company do better than anyone else? What unique value do you provide to your customers? How will you increase that value next year? As customers' demands for the highest quality products, best services, and lowest prices increase daily, the rules for market leadership are changing. Once powerful companies that haven't gotten the message are faltering, while others, new and old, are thriving. In disarmingly simple and provocative terms, Treacy and Wiersema show what it takes to become a leader in your market, and stay there, in an ever more sophisticated and demanding world.

Wassp Louise Wright, Anne Ayre. 2000 WASSP is a means of recording how a person who stutters perceives their stuttering at the start and end of a block of speech and language therapy. The only outcome measure for adult stuttering therapy that demonstrates change in the overt, covert and social dimensions of stuttering Comprehensive & quick to administer, WASSP not only measures change but is invaluable in planning therapy for all types of stuttering problems It consists of five reliable sub-scales: Behaviours: frequency of stutters, physical struggle during stutters, duration of stutters, uncontrollable stutters, urgency/fast speech rate, associated facial/body movements, general level of physical tension, loss of eye contact; Thoughts: Negative thoughts before, during and after speaking; Feelings about stuttering: Frustration, embarrassment, fear, anger, helplessness; Avoidance: Of words, of situations, of talking about stuttering with others, of admitting the problem to yourself; Disadvantage: At home, socially, educationally and at work.

Moral Education Émile Durkheim. 2012-04-30 The great French sociologist and philosopher Emile Durkheim is best known for his classic book *Suicide* (1897), a landmark in social psychology. Among his other major works is this study in the sociology of education, which features 18 lectures by an influential theorist who discusses his ideas on the school as the appropriate setting for moral education. The first element in developing a moral being, he maintains, is instilling a sense of discipline, followed by a willingness to behave in terms of the group's collective interest, and a sense of autonomy. Durkheim

also examines discipline and the psychology of the child, discipline of the school and the use of punishment, altruism in the child, the influence of the school environment, and the teaching of science, aesthetics, and history. Perceptive and provocative, this volume abounds in valuable insights for teachers and others involved in education.

The Age of Empathy Frans de Waal.2009-09-22 In this thought-provoking book, the acclaimed author of *Our Inner Ape* examines how empathy comes naturally to a great variety of animals, including humans. Are we our brothers' keepers? Do we have an instinct for compassion? Or are we, as is often assumed, only on earth to serve our own survival and interests? By studying social behaviors in animals, such as bonding, the herd instinct, the forming of trusting alliances, expressions of consolation, and conflict resolution, Frans de Waal demonstrates that animals—and humans—are preprogrammed to reach out. He has found that chimpanzees care for mates that are wounded by leopards, elephants offer reassuring rumbles to youngsters in distress, and dolphins support sick companions near the water's surface to prevent them from drowning. From day one humans have innate sensitivities to faces, bodies, and voices; we've been designed to feel for one another. De Waal's theory runs counter to the assumption that humans are inherently selfish, which can be seen in the fields of politics, law, and finance. But he cites the public's outrage at the U.S. government's lack of empathy in the wake of Hurricane Katrina as a significant shift in perspective—one that helped Barack Obama become elected and ushered in what perhaps could become an Age of Empathy. Through a better understanding of empathy's survival value in evolution, de Waal suggests, we can work together toward a more just society based on a more generous and accurate view of human nature. Written in layman's prose with a wealth of anecdotes, wry humor, and incisive intelligence, *The Age of Empathy* is essential reading for our embattled times. An important and timely message about the biological roots of human kindness.—Desmond Morris, author of *The Naked Ape*

Justice Gained? Bill Dixon,Elrena Van der Spuy.2004 Ten years into South Africa's new democracy, crime and what should be done about it are the subject of endless debate. Arguments rage about everything from the accuracy of the country's crime statistics to the state of its prison. but why is crime such a persistent problem? How have patterns of offending changed over the course of South Africa's transition to democracy. This book provides a series of essays examine the issues and provide insight into solutions.

The Bonobo and the Atheist: In Search of Humanism Among the Primates Frans de Waal,Frans B. M. Waal,Henry Cabot Lodge (Jr.).2013-03-25 In this thoroughly engaging book, leading primatologist and thinker Frans de Waal offers a heartening, illuminating new perspective on human nature. Bringing together his pioneering research on primate behavior, the latest findings in evolutionary biology, and insights from moral philosophy, de Waal explains that we don't need the specters of God or the law in order to act morally. Instead, our moral nature stems from our biology—specifically, our

primate social emotions, which include empathy, reciprocity, and fairness. We can glimpse this in the behavior of our closest relatives in the animal kingdom: chimpanzees soothe distressed neighbors, and bonobos will voluntarily open a door to offer a companion access to their own food. Building on a wealth of evidence, de Waal reveals that morality is not dictated to us by religion or social strictures. Rather, it is the inevitable product of our biological nature.

The Lime Works Thomas Bernhard.2013-01-02 For five years, Konrad has imprisoned himself and his crippled wife in an abandoned lime works where he's conducted odd auditory experiments and prepared to write his masterwork, *The Sense of Hearing*. As the story begins, he's just blown the head off his wife with the Mannlicher carbine she kept strapped to her wheelchair. The murder and the bizarre life that led to it are the subject of a mass of hearsay related by an unnamed life-insurance salesman in a narrative as mazy, byzantine, and mysterious as the lime works—Konrad's sanctuary and tomb.

Manie et dépression Marc-Louis Bourgeois.2007-01-25 Nous subissons tous des fluctuations d'humeur. Mais si des épisodes d'exaltation et de frénésie alternent avec des épisodes de dépression intense, il s'agit certainement d'un trouble bipolaire, maladie qui requiert alors un diagnostic précis et un suivi régulier. Autrefois appelée maniaco-dépression, cette pathologie fréquente est encore souvent ignorée ou mal comprise alors qu'elle peut avoir des conséquences graves sur la vie du malade et celle de son entourage. Pourtant, les connaissances scientifiques ont beaucoup évolué. On sait aujourd'hui que les médicaments régulateurs de l'humeur sont le traitement approprié, accompagnés d'une psychothérapie et de mesures de prévention et d'hygiène de vie adaptées. L'un des meilleurs spécialistes des troubles bipolaires explique dans un langage clair et accessible les dysfonctionnements de cette maladie et présente les traitements actuellement recommandés. Pour que nos variations d'humeur ne se trans-forment plus en dérapages incontrôlés...
