Save Me Lisa Scottoline.2011-04-12 From the New York Times bestselling author of Think Twice and Look Again comes an emotionally powerful novel about a split-second choice, agonizing consequences, and the need for justice Rose McKenna volunteers as a lunch mom in her daughter Melly's school in order to keep an eye on Amanda, a mean girl who's been bullying her daughter. Her fears come true when the bullying begins, sending Melly to the bathroom in tears. Just as Rose is about to follow after her daughter, a massive explosion goes off in the kitchen, sending the room into chaos. Rose finds herself faced with the horrifying decision of whether or not to run to the bathroom to rescue her daughter or usher Amanda to safety. She believes she has accomplished both, only to discover that Amanda, for an unknown reason, ran back into the school once out of Rose's sight. In an instance, Rose goes from hero to villain as the small community blames Amanda's injuries on her. In the days that follow, Rose's life starts to fall to pieces, Amanda's mother decides to sue, her marriage is put to the test, and worse, when her daughter returns to school, the bullying only intensifies. Rose must take matters into her own hands and get down to the truth of what really happened that fateful day in order to save herself, her marriage and her family. In the way that Look Again had readers questioning everything they thought they knew about family, Save Me will have readers wondering just how far they would go to save the ones they love. Lisa Scottoline is writing about real issues that resonate with real women, and the results are emotional, heartbreaking and honest.

Pushout Monique W. Morris.2016-03-29 Fifteen-year-old Diamond stopped going to school the day she was expelled for lashing out at peers who constantly harassed and teased her for something everyone on the staff had missed: she was being trafficked for sex. After months on the run, she was arrested and sent to a detention center for violating a court order to attend school. Just 16 percent of female students, Black girls make up more than one-third of all girls with a school-related arrest. The first trade book to tell these untold stories, Pushout exposes a world of confined potential and supports the growing movement to address the policies, practices, and cultural illiteracy that push countless students out of school and into unhealthy, unstable, and often unsafe futures. For four years Monique W. Morris, author of Black Stats, chronicled the experiences of black girls across the country whose intricate lives are misunderstood, highly judged—by teachers, administrators, and the justice system—and degraded by the very institutions charged with helping them flourish. Morris shows how, despite obstacles, stigmas, stereotypes, and despair, black girls still find ways to breathe remarkable dignity into their lives in classrooms, juvenile facilities, and beyond.

Belonging and Becoming Barbara Cervone, Kathleen Cushman. 2017-11-14 Despite growing attention to the importance of grit and other character traits for achievement, developing them in students rarely finds its way into secondary school curricula. Authors Barbara Cervone and Kathleen Cushman investigate the exceptions, telling the stories of five high schools with a national reputation for infusing rigorous academics with social and emotional learning, which results in demonstrable benefits for students. Based on extensive interviews and on-site visits, the book identifies six elements that all of these schools have in common, including advisories and other structural supports for students and teachers; rituals and other means for establishing an intentional, reflective, and respectful community as well as a firm commitment to restorative justice; and a broad and engaging curriculum that includes service learning. Featuring the voices of educators and students alike, *Belonging and Becoming* not only shows how these schools stand out for their high degree of caring and success, but makes a strong case for why other schools should be inspired to take up the challenge and replicate their efforts.

A Deadly Education Naomi Novik.2020-09-29 NEW YORK TIMES BESTSELLER • From the author of *Uprooted* and *Spinning Silver* comes the first book of the Scholomance trilogy, the story of an unwilling dark sorceress who is destined to rewrite the rules of magic. FINALIST FOR THE LODESTAR AWARD • “The dark school of magic I’ve been waiting for.”—Katherine Arden, author of the *Winternight Trilogy* I decided that Orion Lake needed to die after the second time he saved my life. Everyone loves Orion Lake. Everyone else, that is. Far as I’m concerned, he can keep his flashy combat magic to himself. I’m not joining his pack of adoring fans. I don’t need help surviving the Scholomance, even if they do. Forget the hordes of monsters and cursed artifacts, I’m probably the most dangerous thing in the place. Just give me a chance and I’ll level mountains and kill untold millions, make myself the dark queen of the world. At least, that’s what the world expects. Most of the other students in here would be delighted if Orion killed me like one more evil thing that’s crawled out of the drains. Sometimes I think they want me to turn into the evil witch they assume I am. The school certainly does. But the Scholomance isn’t getting what it wants from me. And neither is Orion Lake. I may not be anyone’s idea of the shining hero, but I’m going to make it out of this place alive, and I’m not going to slaughter thousands to do it, either. Although I’m giving serious consideration to just one. With flawless mastery, Naomi Novik creates a school bursting with magic like you’ve never seen before, and a heroine for the ages—a character so sharply realized and so richly nuanced that she will live on in hearts and minds for generations to come. The magic of the Scholomance trilogy continues in *The Last Graduate* “The can’t-miss fantasy of fall 2020, a brutal coming-of-power story steeped in the aesthetics of dark academia. . . . *A Deadly Education* will cement Naomi Novik’s place as one of the greatest and most versatile fantasy writers of our time.”—BookPage (starred review) “A must-read . . . Novik puts a refreshingly dark, adult spin on the magical boarding school. . . . Readers will delight in the push-and-pull of El and Orion’s relationship, the fantastically detailed world, the clever magic system, and the matter-of-fact diversity of the student body.”—Publishers Weekly (starred review)

Widening the Circle Mara Sapon-Shevin.2007-03-15 *Widening the Circle* is a passionate, even radical argument for creating school and classroom environments where all kids, including children labeled as “disabled” and “special needs,” are welcome on equal terms. In opposition to traditional models of special education, where teachers decide when a child is

deemed “ready to compete” in “mainstream” classes, Mara Sapon-Shevin articulates a vision of full inclusion as a practical and moral goal. Inclusion, she argues, begins not with the assumption that students have to earn their way into the classroom with their behavior or skills, it begins with the right of every child to be in the mainstream of education, perhaps with modifications, adaptations, and support. Full inclusion requires teachers to think about all aspects of their classrooms—pedagogy, curriculum, and classroom climate. Crucially, Sapon-Shevin takes on arguments against full inclusion in a section of straight-talking answers to common questions. She agrees with critics that the rhetoric of inclusion has been used to justify eliminating services and “dumping” students with significant educational needs unceremoniously back into the mainstream with little or no support. If full inclusion is properly implemented, however, she argues, it not only clearly benefits those traditionally excluded but enhances the educations and lives of those considered mainstream in myriad ways. Through powerful storytelling and argument, Sapon-Shevin lays out the moral and educational case for not separating kids on the basis of difference.

Fires in the Middle School Bathroom Kathleen Cushman, Laura Rogers. 2009-09-08 Following on the heels of the bestselling *Fires in the Bathroom*, which brought the insights of high school students to teachers and parents, Kathleen Cushman now turns her attention to the crucial and challenging middle grades, joining forces with adolescent psychologist Laura Rogers. As teachers, counselors, and parents cope with the roller coaster of early adolescence, too few stop to ask students what they think about these critical years. Here, middle school students in grades 5 through 8 across the country and from diverse ethnic backgrounds offer insights on what it takes to make classrooms more effective and how to forge stronger relationships between young adolescents and adults. Students tackle such critical topics as social, emotional, and academic pressures; classroom behavior; organization; and preparing for high school. Cushman and Rogers help readers hear and understand the vital messages about adolescent learning that come through in what these students say. This invaluable resource provides a unique window into how middle school students think, feel, and learn, bringing their needs to the forefront of the conversation about education.

Teaching to Change the World Jeannie Oakes, Martin Lipton, Lauren Anderson, Jamy Stillman. 2015-11-17 This is an up-to-the-moment, engaging, multicultural introduction to education and teaching and the challenges and opportunities they present. Together, the four authors bring a rich blend of theory and practical application to this groundbreaking text. Jeannie Oakes is a leading education researcher and former director of the UCLA teacher education program. Martin Lipton is an education writer and consultant and has taught in public schools for 31 years. Lauren Anderson and Jamy Stillman are former public school teachers, now working as teacher educators. This unique, comprehensive foundational text considers the values and politics that pervade the U.S. education system, explains the roots of conventional thinking about schooling and teaching, asks critical questions about how issues of power and privilege have shaped and continue to shape educational

opportunity, and presents powerful examples of real teachers working for equity and justice. Taking the position that a hopeful, democratic future depends on ensuring that all students learn, the text pays particular attention to inequalities associated with race, social class, language, gender, and other social categories and explores teachers role in addressing them. The text provides a research-based and practical treatment of essential topics, and it situates those topics in relation to democratic values; issues of diversity; and cognitive, sociocultural, and constructivist perspectives on learning. The text shows how knowledge of education foundations and history can help teachers understand the organization of today s schools, the content of contemporary curriculum, and the methods of modern teaching. It likewise shows how teachers can use such knowledge when thinking about and responding to headline issues like charter schools, vouchers, standards, testing, and bilingual education, to name just a few. Central to this text is a belief that schools can and must be places of extraordinary educational quality and institutions in the service of social justice. Thus, the authors address head-on tensions between principles of democratic schooling and competition for always-scarce high-quality opportunities. Woven through the text are the voices of a diverse group of teachers, who share their analyses and personal anecdotes concerning what teaching to change the world means and involves. [Click Here for Book Website Pedagogical Features: Digging Deeper](#) sections referenced at the end of each chapter and featured online include supplementary readings and resources from scholars and practitioners who are addressing issues raised in the text. Instructor s Manual offers insights about how to teach course content in ways that are consistent with cognitive and sociocultural learning theories, culturally diverse pedagogy, and authentic assessment. **New to this Edition:**

Speaking of Fourth Grade Inda Schaenen. 2014-07-01 Fourth grade is ground zero in the fierce debates about education reform in America. It's when kids (well, some of them) make the shift from "learning to read" to "reading to learn," and tomes have been written about the fourth-grade year by educators, administrators, philosophers, and pundits. Now, in a fascinating and groundbreaking book, Inda Schaenen adds the voices of actual fourth-grade kids to the conversation. Schaenen, a journalist turned educator, spent a year traveling across the state of Missouri, the geographical and spiritual center of the country, visiting fourth-grade classrooms of every description: public, private, urban, rural, religious, charter. *Speaking of Fourth Grade* looks at how our different approaches to education stack up against one another and chronicles what kids at the heart of our great, democratic education experiment have to say about "What Makes a Good Teacher" and "What Makes a Good Student," as well as what they think about the Accelerated Reader programs that dominate public school classrooms, high-stakes testing, and the very purpose of school in the first place. A brilliant and original work at the intersection of oral history, sociology, and journalism, *Speaking of Fourth Grade* offers unique insight into the personal consequences of national education policy. The voices of the children in *Speaking of Fourth Grade* will stay with readers—parents, teachers, and others—for many years to come.

Teaching Boys who Struggle in School Kathleen Palmer Cleveland.2011 Learn how you can move underachieving boys from a position of weakness to one of strength using the Pathways to Re-Engagement model, which incorporates research findings and insights from the author's own experience.

The Power of the Adolescent Brain Thomas Armstrong.2016-07-14 Moody. Reckless. Impractical. Insecure. Distracted. These are all words commonly used to describe adolescents. But what if we recast these traits in a positive light? Teens possess insight, passion, idealism, sensitivity, and creativity in abundance--all qualities that can make a significant positive contribution to society. In this thought-provoking book, Thomas Armstrong looks at the power and promise of the teenage brain from an empathetic, strength-based perspective--and describes what middle and high school educators can do to make the most of their students' potential. Thoroughly grounded in current neuroscience research, the book explains what we know about how the adolescent brain works and proposes eight essential instructional elements that will help students develop the ability to think, make healthy choices, regulate their emotions, handle social conflict, consolidate their identities, and learn enough about the world to move into adulthood with dignity and grace. Armstrong provides practical strategies and real-life examples from schools that illustrate these eight key practices in action. In addition, you'll find a glossary of brain terms, a selection of brain-friendly lesson plans across the content areas, and a list of resources to support and extend the book's ideas and practices. There is a colossal mismatch between how the adolescent brain has evolved over the millennia and the passive, rote learning experiences that are all too common in today's test-obsessed educational climate. See the amazing difference—in school and beyond—when you use the insights from this book to help students tap into the power of their changing brains.

Out of the Classroom and into the World Salvatore Vascellaro.2011-11-01 Bank Street College of Education professor Salvatore Vascellaro is a leading advocate of taking children and teachers into a wider world as the key to improving our struggling schools. Combining practical and theoretical guidance, *Out of the Classroom and into the World* visits a rich variety of classrooms transformed by innovative field trip curricula—showing how students' hearts and minds are opened as they discover how a suspension bridge works, what connects them to the people and places of their neighborhood, and as they come to understand the ecosystem of a river by following it to its source. Vascellaro shows, equally, that what teachers can offer children is fueled by their own engagement with the world, and he offers stunning examples of teachers awakened by their direct experiences with the social issues plaguing American society—from the flood-torn areas of New Orleans to the mining areas of West Virginia. Based on the core principles of progressive pedagogy, and the wisdom gained from Vascellaro's experience as a teacher, school administrator, and teacher educator, *Out of the Classroom and into the World* is a direct retort to test scores and standards as adequate measures of teaching and learning—an inspiring call and major new resource for anyone interested in reinvigorating America's classrooms.

Fires in the Mind Kathleen Cushman, The students of What Kids Can Do. 2010-05-05 Teens talk to adults about how they develop motivation and mastery Through the voices of students themselves, *Fires in the Mind* brings a game-changing question to teachers of adolescents: What does it take to get really good at something? A Good Teacher in Every Classroom Linda Darling-Hammond, Joan Baratz-Snowden. 2005-07-28 What kind of experiences do children need in order to grow and learn? What kind of knowledge do teachers need in order to facilitate these experiences for children? And what kind of experiences do teachers need to develop this knowledge? *A Good Teacher in Every Classroom* addresses these questions by examining the core concepts and central pedagogies that should be at the heart of any teacher education program—and recommends the policy changes needed to ensure that all teachers gain access to this knowledge. The Skin That We Speak Lisa Delpit, Joanne Kilgour Dowdy. 2013-04-09 “Lucid, accessible” research on classroom language bias for educators and “parents concerned about questions of power and control in public schools” (Publishers Weekly). In this collection of twelve essays, MacArthur Fellow Lisa Delpit and Kent State University Associate Professor Joanne Kilgour Dowdy take a critical look at the issues of language and dialect in the education system. *The Skin That We Speak* moves beyond the highly charged war of idioms to present teachers and parents with a thoughtful exploration of the varieties of English spoken today. At a time when children who don’t speak formal English are written off in our schools, and when the class- and race-biased language used to describe those children determines their fate, *The Skin That We Speak* offers a cutting-edge look at this all-important aspect of education. Including groundbreaking work by Herbert Kohl, Gloria J. Ladson-Billings, and Victoria Purcell-Gates, as well as classic texts by Geneva Smitherman and Asa Hilliard, this volume of writing is what Black Issues Book Review calls “an essential text.” “The book is aimed at helping educators learn to make use of cultural differences apparent in language to educate children, but its content guarantees broader appeal.” —Booklist “An honest, much-needed look at one of the most crucial issues in education today.” —Jackson Advocate

Won’t Lose This Dream Andrew Gumbel. 2020-08-25 The extraordinary story of how Georgia State University tore up the rulebook for educating lower-income students Georgia State . . . has been reimaged—amid a moral awakening and a raft of data-driven experimentation—as one of the South’s more innovative engines of social mobility. —The New York Times *Won’t Lose This Dream* is the inspiring story of a public university that has blazed an extraordinary trail for lower-income and first-generation students in downtown Atlanta, the birthplace of the civil rights movement. Over the past decade Georgia State University has upended the conventional wisdom that large numbers of students are doomed to fail simply because of their economic background or the color of their skin. Instead, it has harnessed the power of big data to identify and remove the obstacles that previously stopped them from graduating and completely transformed their prospects. A student from a mediocre high school working two jobs to make ends meet is now no less likely to succeed than a child of wealth and privilege—an earth-shaking achievement that is reverberating across every college campus in the country. With unique

access to the key players and drawing on his skills as an investigative reporter, Andrew Gumbel delivers a thrilling, blow-by-blow account of a long battle to determine whether universities exist for their students or vice versa. The story is told through the visionary leaders who overcame fierce resistance to tear up the rules of their own institution and through the many remarkable students whose resilience and determination, often against daunting odds, inspired the work at every stage. Their success shows how the promise of social advancement through talent and hard work, the essence of the American dream, can be rekindled even in an age of deep inequalities and divisive politics.
